Sometimes you reach a point where you just can't take anymore—a breaking point, some call it. The day I watched my husband murder the woman who was pregnant with his child, my point didn't just break; it exploded like a full magazine's worth of hollow points firing through the barrel of a fully-automatic AK-47. Literally. I am no longer his American Princess, nor am I his slave. Now, I'm a murderer in hiding. My name was Bryleigh Carter Oliveira, and that was my story. Translucent is one woman's story of breaking free, starting over, and learning to trust again through willful submission.

Achieve lasting health—without cutting calories or following dieting “rules”! Instead of obsessing about the quantity of food you eat, shift your focus to the quality, say Noelle Tarr and Stefani Ruper. The popular hosts of the Well-Fed Women podcast want you to make sure you're getting enough food so that your body has the fuel and nourishment it needs to support a healthy, long, and energetic life. Noelle and Stefani know firsthand about the ups and downs of dieting. Like many people, they have struggled with confusing and frustrating health issues such as anxiety, infertility, and hormonal imbalance—but when they discovered that the secret to improving wellness was actually more food, they ditched the calorie counters and gave their bodies the nourishment they needed to heal. In the Coconuts and Kettlebells program, you'll eat at least 2,000 calories a day—setting a minimum intake of fat, protein, and carbohydrates to ensure that your diet is full of nutrients. Noelle and Stefani identify the Big Four foods that cause the most health problems—grains, dairy, vegetable oils, and refined sugar. While many diets require you to eliminate these foods entirely, Coconuts and Kettlebells provides an easy-to-follow step-by-step system to test these foods and determine which you need to cut back on to feel better—and which you can eat without restrictions. To help you discover how your body responds to the Big Four, you'll choose from two simple 4-week meal plans: one for Butter Lovers, people who tend to feel more satisfied eating higher ratios of fats, and one for Bread Lovers, people who tend to feel more satisfied eating higher ratios of carbs. Each meal plan comes with weekly shopping lists and instructions on how to batch cook, meal prep, and stock the pantry. In addition, you get more than 75 simple and delicious real food recipes, including: • Kale and Bacon Breakfast Skillet • Raspberry-Coconut Smoothie Bowl • Thai Coconut Curry Shrimp • Apple-Chicken Skillet • Moroccan Lamb Meatballs • Grilled Balsamic Flank Steak • Chocolate-Cherry Energy Bites • Lemon-Raspberry Mini Cheesecakes To go along with the meal plans, you'll find three 4-week fitness plans tailored to beginner, intermediate, and advanced experience levels. Best of all, the workouts can be done anywhere—at your home or on the road—and take no more than 30 minutes each. A comprehensive whole-body program, Coconuts and Kettlebells provides the knowledge and tools you need to be healthy inside and out.

From the author of Bunny, which Margaret Atwood hails as “genius,” comes a “wild, and exhilarating” (Lauren Groff) novel about a theater professor who is convinced staging Shakespeare's most maligned play will remedy all that ails her—but at what cost? Miranda Fitch's life is a waking nightmare. The accident that ended her burgeoning acting career left her with excruciating chronic back pain, a failed marriage, and a deepening dependence on painkillers. And now, she's on the verge of losing her job as a college theater director. Determined to put on Shakespeare's All's Well That Ends Well, the play that promised and cost her everything, she faces a mutinous cast hellbent on staging Macbeth instead. Miranda sees her chance at redemption slip through her fingers. That's when she meets three strange benefactors who have an eerie knowledge of Miranda's past and a tantalizing promise for her future: one where the show goes on, her rebellious students get what's coming to them, and the invisible doubted pain that's kept her from the spotlight is made known. With prose Margaret Atwood has described as “no punches pulled, no hilarities dodged...genius,” Mona Awad has concocted her most potent, subversive novel yet. All's Well is a “fabulous novel” (Mary Karr) about a woman at her breaking point and a formidable, piercingly funny indictment of our collective refusal to witness and believe female pain.

We nearly died. We very nearly did, didn't we?" Samantha Heather Mackey couldn't be more of an outsider in her small, highly selective MFA program at New England's Warren University. A scholarship student who prefers the company of her dark imagination to that of most people, she is utterly repelled by the rest of her fiction writing cohort—a clique of unbearably twee rich girls who call each other "Bunny," and seem to move and speak as one. But everything changes when Samantha receives an invitation to the Bunnies' fabled "Smut Salon," and finds herself inexplicably drawn to their front door--ditching her only friend, Ava, in the process. As Samantha plunges deeper and deeper into the Bunnies' sinister yet saccharine world, beginning to take part in the ritualistic off-campus "Workshop" where they conjure their monstrous creations, the edges of reality begin to blur. Soon, her friendships with Ava and the Bunnies will be brought into deadly collision. The spellbinding new novel from one of our most fearless chroniclers of the female experience, Bunny is a down-the-rabbit-hole tale of loneliness and belonging, friendship and desire, and the fantastic and terrible power of the imagination. Socially anxious, intensely private, and closeted, Nick doesn't expect to fall in so quickly with a tight-knit group of students from his college, and it's both exhilarating and scary. Dex Cartwell knows exactly who he is: a black queer guy who doesn't give a toss what anybody thinks of him. He is absolutely, one-hundred-percent, totally in control of his life. And the persistent broken heart he's been nursing for a while . . . When Nick and Dex meet, both find themselves intrigued. Countless late-night conversations only sharpen their attraction. But the last thing Nick wants is to face his deepest secret, and the last thing Dex needs is another heartache. Dex has had to fight too hard for his right to be where he is. Averee is a typical high schooler living in the near future where social media status has real world consequences. They embark on a quest that takes them to the corporate underbelly of Ranked, and discover how the technology was originally developed with good intentions but was twisted in order to fuel corporate greed and control people's lives. Erin Hicks brings charming humor to the trials and tribulations of a young female superhero, battling monsters both supernatural and mundane in an all-too-ordinary world. The expanded edition collects the original Eisner Award-winning comic, two new stories, and new art from creators including Tyler Crook, Ron Chan, Jake Wyatt, Paulina Ganucheau, and more! The first collection won an Eisner Award (Best Publication for Kids) and has gone through 4 printings "This charming modern vision of a Superhero Girl features a young woman living an uncertain life, unsure of the best way to contribute to society. It's superhero as person instead of as corporate symbol or fight machine. We see her struggling with relatable elements of daily life, like keeping her mother informed of how things are going or having to replace her cape after it shrunk in the laundry. One of the best strips has Superhero Girl explaining to a fan how she too can be a superhero without having a horrible tragedy in her past. This strip shines because it's fresh and lighthearted without wallowing in angst. Her arch-nemesis is a normal guy who keeps telling her she's doing it wrong. She struggles to balance her calling with a paying day job but keeps forgetting to take her mask off. Her annoying perfect brother Kevin shows her up, and she struggles with whether to stay hero or take the easier, villainous way to riches. The comic is perfectly suited to Hicks's expressive figures and energetic storytelling. The perfect laugh-filled tonic for heavier angst-filled superhero series." -Publishers Weekly "Have you ever wanted a superhero who lives in your world? If so, you will love Faith Erin Hicks' Eisner-award-winning story of a young woman who happens to be a superhero. " -YALSA The Hub

In a garden glade before a grand fountain, surrounded by a musical party, an elegant woman in a lustrous white gown dances as part of a foursome, raising her eyes to the viewer as if extending an invitation to the dance. This is the enticing scene in the J. Paul Getty Museum's painting "Dance before a Fountain" by Nicolas Lancret (1690-1743), an excellent example of the fete galante, a genre that was created and reached the peak of its popularity in France during the first half of the eighteenth century. This monograph seeks to familiarize American audiences with Lancret, a master of this genre, who was a revered painter in his own time, rivalling his contemporaries Antoine Watteau and Francois Boucher, and a favourite of crowned heads across Europe. Mary Tavener Holmes's engrossing text uses this painting as a springboard to reveal a remarkable amount about the painter, his mode of painting, Paris at the time this work was made, eighteenth-century dance, and the world of art patronage and collecting in France and elsewhere in the eighteenth and nineteenth centuries. Lavishly illustrated with comparative paintings by artists such as Watteau, Boucher, Peter Paul Rubens, Jean-Francois De Troy, Jean-Baptiste Oudry, and Hubert Robert, this fascinating peek into a bygone Parisian era is a treat for the eyes and the intellect alike.

If we lived in a liquid world, the concept of a "machine" would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of "being alive." Liquid Life references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, "brute" materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a "new materialist" and "liquid" study of matter, Armstrong conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. Liquid Life seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration, including contributor Rolf Hughes' "angelology" of language, which explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations that help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing, liquid life reunites us with the irreducible "soul substance" of living things, which will neither be simply "solved," nor go away.

"The global disruption to education caused by the COVID-19 pandemic is without parallel and the effects on learning are severe. The crisis brought education systems across the world to a halt, with school closures affecting more than 1.6 billion learners. While nearly every country in the world offered remote learning opportunities for students, the quality and reach of such initiatives varied greatly and were at best partial substitutes for in-person learning. Now, 21 months later, schools remain closed for millions of children and youth, and millions more are at risk of never returning to

education. Evidence of the detrimental impacts of school closures on children's learning offer a harrowing reality: learning losses are substantial, with the most marginalized children and youth often disproportionately affected. Countries have an opportunity to accelerate learning recovery and make schools more efficient, equitable, and resilient by building on investments made and lessons learned during the crisis. Now is the time to shift from crisis to recovery - and beyond recovery, to resilient and transformative education systems that truly deliver learning and well-being for all children and youth."--The World Bank website.
