Transport Planning guideline and manual to best practice

The "Transport Planning Guideline" is intended to act as a knowledge-base and toolbox – not just for planning, but also as a support for making decisions on different measures. The manual contains a number of tangible examples in Asia, Europe, the United States of America and Australia.

Considering operations needs during the design process requires transportation design professionals to work closely with those who have expertise in transportation operations, intelligent transportation, and transportation tech-nology. Design professionals should also anticipate working with practitioners from planning, transit, freight,

and TIM as
