Transport In Cells Pogil Answers - Joomlaxe.com

The cell in undergoing diffusion-water is moving from a higher to lower concentration. The sugar molecules are not undergoing diffusion-they are too large. Sugar molecules can enter cells through channel proteins, which require energy (ATP) to function.

Answers To Pogil Biology Transport Cells

Complete the Active Transport or Passive Transport Table. Define active transport. Movement of a substance against (up) a concentration gradient, which requires energy input from the cell and also requires membrane (channel) proteins. 35. Which type of cell transport would be best to move substances into or out of the cell quickly? Active ...
