Discover the untold  
story of African surf  
culture in this

glorious and colorful collection of profiles, Wata, a Cape Town essays, photographs, and illustrations. AFROSURF is the first book to capture and celebrate the surfing culture of Africa. This unprecedented collection is compiled by Mami Wata, a Cape Town surf company that fiercely believes in the power of African surf. Mami Wata brings together its co-founder Selema Masekela and some of Africa's finest photographers,

---

thinkers, writers, and and works with surfers to explore the unique culture of eighteen coastal countries, from Morocco to Somalia, Mozambique, South Africa, and beyond. Packed with over fifty essays, AFROSURF features surfer and skater profiles, thought pieces, poems, photos, illustrations, ephemera, recipes, and a mini comic, all wrapped in an astounding design that captures the diversity and character of Africa. A creative force of good in their continent, Mami Wata sources and manufactures all their wares in Africa

communities to strengthen local economies through surf tourism. With this mission in mind, Mami Wata is donating 100% of their proceeds to support two African surf therapy organizations, Waves for Change and Surfers Not Street Children. How often have you watched a sport on TV and thought you'd like to try it, only to be put off by a boring instruction manual? The Go series is designed just for you. It's a book and DVD package aimed at anyone with the inclination to play, from the 25+ generation with the disposable income to try new things, to the over-40s who are catching up on a youth spent working

---

too hard. We all learn better through visual demonstration, so the Go series uses the clarity of print and the dynamism of the moving image to provide the most natural, effective way to learn. Written in an inspirational style with an instructive DVD, the series aims to help you to stop thinking about a sport and just get out there and do it. The tone is easy-going and encouraging - theory is broken down into reader-friendly, bite-

sized chunks for maximum clarity and accessibility. 100 Greatest Waves Quirk Books Incredible Waves has just won Illustrated Book of the Year at The British Sports Book Awards! Beautiful, unique, kaleidoscopic, geometrically exquisite...perfect waves are some of Mother Nature's most alluring and mesmerizing creations. Incredible Waves is a stunning coffee-table book of photographs that capture the beauty and majesty of the world's most awesome waves. This breathtaking volume is a collection of the best

recent work by 20 top surf photographers including Clark Little, Brian Biemann, Chris Burkard, Russell Ord, DJ Struntz, Tungsten, Jeff Flindt, Ray Collins and Andrew Shield. Among the most spectacular shots are images of big-wave breaks such as Pipeline, Cloudbreak, The Right, Teahupoo and Jaws - waves which are as dangerous as they are enticing, for photographers as well as surfers. The stories behind the most dramatic shots are revealed in the accompanying text, along with essays and discussions about current trends in surf

---

photography. Readers interested in improving their own photographic skills will benefit from the technique sections throughout the book which offer tips and advice for getting better shots. Everything from basic composition to underwater photography is covered, along with tips for getting the best from board-mounted miniature cameras such as the GoPro. The photos in Incredible Waves are guaranteed to thrill surfers, longboarders, kite surfers and bodyboarders alike...in fact everyone who loves looking at images of the ocean at its most spectacular.

introduction to selected research topics in the broad field of flowing matter, including the dynamics of fluids with a complex internal structure -from nematic fluids to soft glasses- as well as active matter and turbulent phenomena. Flowing matter is a subject at	the crossroads between physics, mathematics, chemistry, engineering, biology and earth sciences, and relies on a multidisciplinary approach to describe the emergence of the macroscopic behaviours in a system from the coordinated dynamics of its microscopic constituents . Depending on the	microscopic interactions , an assembly of molecules or of mesoscopic particles can flow like a simple Newtonian fluid, deform elastically like a solid or behave in a complex manner. When the internal constituents are active, as for biological entities, one generally observes

complex large-scale collective motions. Phenomenology is further complicated by the invariable tendency of fluids to display chaos at the large scales or when stirred strongly enough. This volume presents several research topics that address these phenomena encompassing the traditional micro-, meso-, and macro-scales descriptions, and contributes to our understanding of the fundamentals of flowing matter. This book is the legacy of the COST Action MP1305 "Flowing Matter".
