My First Recession Minor Compositions

Exile and migration played a critical role in the diffusion and development of modernism around the globe, yet have long remained largely understudied phenomena within art historiography.

Focusing on the intersections of exile, artistic practice and urban space, this volume brings together contributions by international researchers committed to revising the historiography of modern art. It pays particular attention to metropolitan areas that were settled by migrant artists in the first half of the 20th century. These arrival cities developed into hubs of artistic activities and transcultural contact zones where ideas circulated, collaborations emerged, and concepts developed. Taking six major cities as a starting point – Bombay (now Mumbai), Buenos Aires, Istanbul, London, New York, and Shanghai – the authors explore how urban topographies and landscapes were modified by exiled artists re-establishing their practices in metropolises across the world. Questioning the established canon of Western modernism, *Arrival Cities* investigates how the migration of artists to different urban spaces impacted their work and the historiography of art. In doing so, it aims to encourage the discussion between international scholars from different research

fields, such as exile studies, art history, social history, architectural history, architecture, and urban studies.

Too many public art projects result in short-term, temporary interventions, often connected with an exhibition, biennial or event. "Locating the Producers" investigates how and why more longer-term, durational and accumulative projects have began to emerge in response to a single place. This dynamic and extensive publication provides the first in-depth examination of exemplary curatorial projects.

Advanced art education is in the process of developing research programs throughout Europe. What does the term research actually means in the practice of art? What is the relation to the scientific methods of alpha, beta or gamma sciences, directed toward knowledge production and the development of a certain scientific domaine? What will be the influence of scientific research on the art forms?

Combination Acts draws together fifteen years of conversations with artists, musicians, activists, and theorists about the nature of collaborative practice. Taken together these dialogues provide a series of study notes for and from the self-organisation of the undercommons, gesturing towards an aesthetics that occupies a space of power for itself by coming to close to, but never finally reaching, a set form.

Is revolution possible in the age of the Anthropocene? *Old Gods, New Enigmas* is the highly-anticipated book by the best-selling author of *City of Quartz* and *Planet of Slums*. Mike Davis spent years working blue collar jobs and sitting behind the wheel of an eighteen wheeler before his profile as one of the world's leading urbanists emerged with the publication of his sober, if dystopian survey of Los Angeles. Since then, he's developed a reputation not only for his caustic analysis of ecological catastrophe and colonial history, but as a stylist without peer. *Old Gods, New Enigmas* is Davis's book-length engagement with Karl Marx, marking the 200th anniversary of Marx's birth and exploring Davis's thinking on history, labor, capitalism, and revolution — themes ever present in the early work from this leading radical thinker. This will be his first book on Marxism itself. In a time of ubiquitous disgust with political and economic elites, explores the question of revolutionary agency—what social forces and conditions do we need to transform the current order?—and the situation of the world's working classes from the US to Europe to China. Even the most preliminary tasks are daunting. A new

theory of revolution needs to return to the big issues in classical socialist thought, such as clarifying “proletarian agency”, before turning to the urgent questions of our time: global warming, the social and economic gutting of the rustbelt, and the city's demographic eclipse of the countryside. What does revolution look like after the end of history?

The English of Tourism is a collection of essays on the English specific to the Tourism Industry. The approach is a linguistic one: the different aspects of the English used in the field of tourism (tourism industry, types of tourism, travel agencies, Internet sites of travel agencies, eco-tourism, travel) and in tourism-related fields (accommodation, advertising, entertainment, food services, hospitality, transportation) are analysed from a morphological (combination, derivation), syntactical (nominal phrases, verbal phrases), lexical and lexicographical, semantic (homonymy, semantic fields, synonymy, terminology), pragmatic (academic discourse, idiom, metaphor), etymological (etymon, Latin heritage), and contrastive (Croatian – Romanian, English – Croatian, English – Romanian, French – English, Romanian – English) points of view. This book will appeal to people employed in industries including hotels, transportation, events, food and beverage, parks and recreation, as well as to professors, researchers, students, and translators from Croatian-, English-, French-, and Romanian-speaking countries, active in their own countries or

abroad. The types of academic readership it will appeal to include: academic teaching staff, researchers and students in the field of tourism, of tourism-related fields – accommodation, advertising, entertainment, food services, hospitality, and transportation – and of languages.

More than 30-year operational satellite data have already been used for monitoring land, ocean and atmosphere. These applications have contributed to improve sustainable economy, produce healthy environment and enhance human life. The

Advanced Research Workshop sponsored by NATO and organized by the USA 's National Oceanic and Atmospheric Administration and Ukrainian 's Space Agency bring the scientists with the most mature research designed for practical use. The goals were to select those which is used for services today and identify the areas to expand research and services. Scientific and application results of the Workshop presented in this book can be used today in agriculture, forestry, water resources, healthy coastal life and fisheries, climate and land cover change, anthropogenic activities and others. The presented papers provide information on how to use operational satellites and in situ measurements for early detection of large-scale droughts, floods and fires, diagnose crop and pasture annual losses, predict periods with health/unhealthy vegetation based on such climate forcing events as ENSO, monitor air quality and geomagnetic activities, assess land cover trends in response to global warming etc. The available satellite/ground information and method is currently warn with a lead time sufficient to respond, recover and protect.

This study examines the dynamics of critical Internet culture after the medium opened to a broader audience in the mid 1990s. It is Geert Lovink's PhD thesis, submitted late 2002, written in between his two books on the same topic: *Dark Fiber* (2002) and *My First Recession* (2003). The core of the research consists of four case studies of non-profit networks: the Amsterdam community provider, The Digital City (DDS); the early years of the

nettime mailinglist community; a history of the European new media arts network Syndicate; and an analysis of the streaming media network Xchange. The research describes the search for sustainable community network models in a climate of hyper growth and increased tensions and conflict concerning moderation and ownership of online communities.

Postmodern Crises collects previously published and yet unpublished Mark Lipovetsky's articles on Russian literature and film. Written in different years, they focus on cultural and aesthetic crises that, taken together, constitute the postmodern condition of Russian culture. The reader will find here articles about classic subversive texts (such as Nabokov's *Lolita*), performances (Pussy Riot), and recent, but also subversive, films. Other articles discuss such authors as Vladimir Sorokin, such sociocultural discourses as the discourse of scientific intelligentsia; post-Soviet adaptations of Socialist Realism, and contemporary trends of "complex" literature, as well as literary characters turned into cultural tropes (the Strugatsky's progressors). The book will be interesting for teachers and scholars of contemporary Russian literature and culture; it can be used both in undergraduate and graduate

courses.

David G. Lewis explores Russia's political system under Putin by unpacking the ideological paradigm that underpins it. He investigates the Russian understanding of key concepts such as sovereignty, democracy and political community. Through the dissection of a series of case studies - including Russia's legal system, the annexation of Crimea, and Russian policy in Syria - Lewis explains why these ideas matter in Russian domestic and foreign policy.

Would there have been a Third World without the Second? Perhaps, but it would have looked very different. From Internationalism to Postcolonialism recounts the story of two Cold War-era cultural formations that claimed to represent the Third World project in literature and cinema, and offers a compelling genealogy of contemporary postcolonial studies.
