This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War.

Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

‘ One of the lancers rode by, and stabbed me in the back with his lance. I then turned, and lay with my face upward, and a foot soldier stabbed me with his sword as he walked by. Immediately after, another, with his firelock and bayonet, gave me a terrible plunge, and while doing it with all his might, exclaimed, “ Sacré nom de Dieu! ” ’ The

truly epic and brutal battle of Waterloo was a pivotal moment in history – a single day, one 24-hour period, defined the course of Europe's future. In March 1815, the Allies declared war on Napoleon in response to his escape from exile and the renewed threat to imperial European rule. Three months later, on 18 June 1815, having suffered considerable losses at Quatre-Bras, Wellington's army fell back on Waterloo, some ten miles south of Brussels. Halting on the ridge, they awaited Napoleon's army, blocking their entry to the capital. This would become the Allies' final stand, the infamous battle of Waterloo. In this intimate, hour-by-hour account, acclaimed military historian Robert Kershaw resurrects the human stories at the centre of the fighting, creating an authoritative single-volume biography of this landmark battle. Drawing on his profound insight and a field knowledge of military strategy, Kershaw takes the reader to where the impact of the orders was felt, straight into the heart of the battle, shoulder to shoulder with the soldiers on the mud-splattered ground. Masterfully weaving together painstakingly researched eyewitness accounts, diaries and letters – many never before seen or published – this gripping portrayal of Waterloo offers unparalleled authenticity. Extraordinary images of the men and women emerge in full colour; the voices of the sergeants, the exhausted foot-soldiers, the boy ensigns, the captains and the cavalry troopers, from both sides, rise from the page in vivid and telling detail, as the fate of Europe hangs by a thread.

' Fighting Scholars ' offers the first book-length overview of the ethnographic study of martial arts and combat sports. The book ' s main claim is that such activities represent privileged grounds to access different social dimensions, such as emotion, violence, pain, gender, ethnicity and religion. In order to explore these dimensions, the concept of ' habitus ' is presented prominently as an epistemic remedy for the academic distant gaze of the effaced academic body. The book ' s most innovative features are its empirical focus and theoretical orientation. While ethnographic research is a widespread and popular approach within the social sciences, combat sports and martial arts have yet to be sufficiently interrogated from an ethnographic standpoint. The different contributions of this volume are aligned within the same project that began to crystallize in Lo ĩ c Wacquant ' s ' Body and Soul ' : the construction of a ' carnal sociology ' that constitutes an exploration of the social world ' from ' the body.

But first, I have to ignore the urge to kiss and touch and make Mira mine again. --EXCERPT-- I grab her waist, guiding her back against the shelves. She kisses my cheekbone, nibbles my earlobe.
