Experience firsthand the joys of building and flying your very own model airplane design. Put into practice the lessons from my previous book, RCadvisor's Model Airplane Design Made Easy. Follow along as we design, build, and fly a modern radio-controlled model airplane. Lofty Design Goals Incorporating the latest innovations and research results, the design looks deceptively simple. However, 20 prototypes had to be built before one finally met all the design goals: Build it in just one day for less than \$5. A joy to fly with no bad habits. Build either a park flyer or an indoor slow flyer. New pilots can fly it without ailerons. Sturdy enough to survive hard landings. Easy to build for new scratch builders. Kid-friendly free flight glider version. Use inexpensive electric power systems and radio gear. Great starting point for your own unique designs. You can easily find the construction materials for the airplane at local discount or craft stores. So what are you waiting for? An Inside Look at the Design Process The book starts by describing the goals and the long prototyping process that led to the final design. Along the way you get to see firsthand the challenges that creating an innovative design presents. Learn the reasoning behind all the decisions that led to this unique design. A stand-alone book, it is complemented nicely by RCadvisor's online model airplane calculator and my first model airplane design book. Picking up where that book left off, it takes a very pragmatic approach to the entire design process. Carlos Reyes founded www.RCadvisor.com in 2007. He's had a life-long love affair with aviation, building and flying model airplanes since childhood. He holds a Private Pilot-Glider license and is the Vice President of his local model airplane club. ADVANCE PRAISE "Carlos Reyes is quickly building a reputation as a talented and experienced RC model aircraft expert and author. His first book, titled RCadvisor's Model Airplane Design Made Easy, set the stage for what I'm sure will be a series of books that will allow a rank beginner to get a start and then progress to any desired level in our wonderful hobby. The amount of detail in this new book is incredible and will certainly apply to many other aircraft that you build as you grow in the hobby. Carlos Reyes has a truly enjoyable style of writing. Fun to read while you are learning so much at the same time! This new book is excellent for any age group be they young or old. This is absolutely A MUST READ! I can only imagine (and look forward to) what book number three will be like!" - Bob Aberle, AMA 215, Technical Editor, Model Aviation magazine "I was really hoping Carlos' next book would be informative, entertaining, helpful, and have a brilliant educational aspect for RC flying hobbyists. However, this book didn't quite do this; it was BEYOND these expectations! Carlos kicks out another winner with this one. Yes, you can have entertaining and helpful media in RC other than podcasts!" - Jamie Burke, Host, www.AllThingsThatFly.com "Invading the mind of a designer is an intriguing adventure. After reading just the first chapter about the goals, along with what did and didn't work on the prototypes, I was eager to read on to see how the modified design worked out. Carlos continues by explaining what considerations were used, and how they were derived, to pick a "Winner" from the many prototypes. I carefully studied Carlos' ideas and techniques

and learned a lot about designing this type of plane. I am so excited about the design that I just have to build one to try it out. - Ken Myers, Editor, The Ampeer

Panic grips the world, as a nuclear showdown in the Middle East threatens to engulf the world in an atomic fireball. Suddenly, millions of people vanish off the face of the planet and not even the world's best scientists can explain why, leaving many to speculate that the disappearances were the result of some new secret weapon fired in the growing tensions in the Middle East standoff. Soon however, the leaders of the world, via a special worldwide television broadcast, introduce the citizens of all nations to a powerful race of beings known as the Balazons. Shocking words of revelation from Khur-ak, the alien leader, threaten to destabilize the world, as the aliens claim to have been invisibly influencing human development for millions of years and are the "gods" that humans have always worshipped. They've been watching us for millennia . . . now it's our turn to see them.

Everyone knows that "the face can wear a mask," that a person may be a good actor and put on a certain expression that may deceive even the best judgment. But hands cannot change as the result of a mere effort to please; the character they express is the real nature of the individual—the true character that has been formed by heredity or that has grown up with the person by long years of habit. The characteristics alluded to below are those which may be easily observed and which are aids to a rapid judgment of character and which I have never before been able to give to the public in such a concise way. The more elaborate details concerning the ultimate success of the person one is talking to, their more intimate character and their future development will be found in their proper place, in this book.

The similarities between the airplane and the missile extend beyond their flying capabilities, and at higher operational speeds, the configuration distinctions become even less apparent. "Missile Aerodynamics," a classic now available from AIAA and Nielsen Engineering and Research, Inc., combines the best of missile and airplane aerodynamics, drawing extensively from numerous technical papers to present a rational and unified account of the principles behind missile projection. Evaluate the missile versus the airplane in a multitude of areas, from longitudinal acceleration, wing loading, roll and dynamic stability, guidance and navigation, and more. J.N. Nielsen covers every aspect of missile aerodynamics, from the classification of missiles and basic formulas to innovative aerodynamic controls. In one reliable reference, readers will find hundreds of schematics, equations, and tables with practical applications in missile design and engineering. A fresh, witty rom-com romp set against the backdrop of a high-profile music competition and a riotous Indian wedding Zurika Damani is a naturally gifted violinist with a particular love for hip hop beats. But

when you're part of a big Indian family, everyone has expectations, and those certainly don't include hip hop violin. After being rejected by Juilliard, Zuri's last hope is a contest judged by a panel of top tier college scouts. The only problem? This coveted competition happens to take place during Zuri's sister's extravagant wedding week. And Zuri has already been warned, repeatedly, that she is not to miss a single moment. In the midst of the chaos, Zuri's mom is in matchmaking mode with the groom's South African cousin Naveen—who just happens to be a cocky vocalist set on stealing Zuri's spotlight at the scouting competition. Luckily Zuri has a crew of loud and loyal female cousins cheering her on. Now, all she has to do is to wow the judges for a top spot, evade getting caught by her parents, resist Naveen's charms, and, oh yeah . . . not mess up her sister's big fat Indian wedding. What could possibly go wrong?

Minority Accommodation through Territorial and Non-Territorial Autonomy explores the relationship between minority, territory, and autonomy, and how it informs our understanding of non-territorial autonomy (NTA) as a strategy for accommodating ethno-cultural diversity in modern societies. While territorial autonomy (TA) is defined by a claim to a certain territory, NTA does not assume that it is derived from any particular right to territory, allocated to groups that are dispersed among the majority while belonging to a certain self-identified notion of group identity. In seeking to understand the value of NTA as a public policy tool for social cohesion, this volume critically dissects the autonomy arrangements of both NTA and TA, and through a conceptual analysis and case-study examination of the two models, rethinks the viability of autonomy arrangements as institutions of diversity management. This is the second volume in a five-part series exploring the protection and representation of minorities through non-territorial means, examining this paradox within law and international relations with specific attention to non-territorial autonomy (NTA).

This book focuses on the artistic process, creativity and collaboration, and personal approaches to creation and ideation, in making digital and electronic technology-based art. Less interested in the outcome itself -- the artefact, artwork or performance -- contributors instead highlight the emotional, intellectual, intuitive, instinctive and step-by-step creation dimensions. They aim to shine a light on digital and electronic art practice, involving coding, electronic gadgetry and technology mixed with other forms of more established media, to uncover the practice-as-research processes required, as well as the collaborative aspects of art and technology practice.

The broad range of research topics reported in this abstract book is a valuable resource for researchers, advisors, teachers and professionals in agriculture. ICT in agriculture, the field of EFITA's interest, precision agriculture and precision livestock farming are becoming ever more relevant as the agricultural industry struggles to come to terms with various developments. These include issues of cooperation, Internet, standardisation, software architecture, robotics, environment, animal and human welfare, economics, traceability, farm management, vehicle guidance, crop management, animal disease and livestock management. Whilst some benefits have proved elusive, others contribute positively to today ' s agriculture. Research continues to be necessary and needs to be reported and disseminated to a wide audience. Also note that the reviewed papers from the 4th European Conference on Precision Livestock Farming and the 7th ECPA conference are presented in companion publications.

The stunning conclusion to Anne Holt's phenomenal series featuring Johanne Vik and Adam Stubo. On a summer's day, Johanne Vik arrives at the home of her friends Jon and Ellen Mohr and was greeted by a scene of devastation: their young son, left unattended, has tragically fallen to his death. Meanwhile, Oslo is under attack. An explosion has torn the city apart and newly qualified police officer Henrik Holme is the only one available to attend the Mohr household. As Holme investigates, he casts doubt on the claim that the death was a tragic accident and calls upon Johanne's profiling expertise to understand what really happened. But neither realise that those involved are determined to hide the truth - no matter what. Before the summer is over, more shocking deaths will occur...
