Learning Solution-Focused Therapy W.

W. Norton & Company

Every fifteen seconds someone commits a crime of domestic violence in the United States, and most violators will be court-mandated to receive group treatment. Outcome studies of traditional treatment programs (those with confrontational or educational approaches) indicate high rates of dropping out and low effectiveness, lending urgency to the need to find an alternative method. This book describes a cutting-edge treatment approach that creates effective, positive changes in domestic violence offenders. Solution-focused therapy focuses on holding offenders accountable and responsible for

building solutions, rather than emphasizing their problems and deficits. By focusing on "solution-talk" instead of "problem-talk," clients are assisted in developing useful goals and solution behaviors that are then amplified, supported, and reinforced through a solution-building process. The book will be of great interest to professionals and graduate students in social work, psychology, and counseling.

Many people have wondered what bipolar disorder is or what the symptoms are. While starting out with these simple facts, this guide goes much deeper into the subject. It covers a wide range of subtopics that will

help you understand the nature of the disorder better. For example, this book talks about the relationship of bipolar disorder to sleep deprivation, genetics, nutrients, and postpartum depression. It also highlights some facts about the brain of someone with bipolar disorder, the reason why it 's so dominant in the United States as compared to other countries, and much, much more.

Up to 65% of couples who seek therapy for marital problems have had at least one prior violent episode. Unfortunately, therapists often miss this critical information because they do not effectively assess for it. This book presents a safety-focused approach to assessment and treatment of couples who choose to remain together after one or both partners have been

violent. Treatment options for intimate partner violence have evolved alongside the growing awareness and broader definitions of domestic violence. Since 1997 the authors have conducted Domestic Violence Focused Couples Treatment (DVFACT), collected data, and refined their program. The authors outline their assessment and screening process and share case illustrations to demonstrate when conjoint treatment can be a safe and viable option. Readers get an overview of the 18-session course of DVFACT and tips for adapting it for multi-couple groups or for a single couple. The major tenets of solution-focused therapy, such as underscoring even the smallest of successes, are emphasized throughout, as are the following special features: -safety planning -mindfulness techniques for anger awareness and reduction -negotiated time-out procedures -drug and

alcohol use modules -psychoeducational tools and materials on violence Therapists will learn how to assess intimate partner violence and help couples eliminate all forms of violence and begin on a positive path toward their vision of a healthy relationship.

This important new book documents a major breakthrough in the treatment of the three most widespread learning disabilities--ADHD, dyslexia, and dyspraxia ("clumsy child syndrome"). Although these conditions have reached epidemic proportions, treatment has been limited to ineffective behavioral therapies or the controversial prescription drug Ritalin. Now Dr. B. Jacqueline Stordy, a leading researcher in the field, reveals a stunning new treatment based on a simple nutritional supplement: LCP (long chain polyunsaturated fatty acids). The LCP Solution is the first book to describe this new natural treatment and to explain

how children (and adults) can incorporate it into their daily lives. As a member of a family with a long history of dyslexia, Dr. Stordy discovered in a pioneering experiment that dyslexic and dyspraxic children who began taking a dietary supplement consisting of LCP experienced dramatic transformations in the quality of their lives. At the same time, parallel studies conducted at Purdue University came up with similar results with children who had ADHD. The effect of this dietary supplement was nothing short of revolutionary: after only a few weeks, dyslexic and ADHD children became calmer, more focused, easier to teach, while dyspraxics improved significantly

in dexterity and balance, showing markedly less anxiety. In *The LCP Solution*, Dr. Stordy documents how this life-changing treatment came about and explains step-by-step how sufferers of each of the three major conditions can use it to change their lives at home, at school, and at work. Illuminating, vividly presented, and authoritative in its findings, this book will revolutionize our approach to learning disabilities. LCPs are natural, simple to use, and amazing in their benefits. If you or someone you love suffers from a learning disability, this book is essential reading.
