Learning To Manual

Ten years ago when I started cycling the first bike I bought was a Trek 4300, an entry-level mountain bike. That bike served me well for a few years, but as my cycling skills improved I bought more expensive bikes and the Trek 4300 became my winter bike—since it was an inexpensive bike I didn't care that road salt would eventually destroy all the components.

The Trek 4300 is a tough, affordable mountain bike for the casual offroad rider. This bike features an aluminum frame and a plush Suntour fork. Reliable Shimano components make up the drivetrain, and parts from Formula, Wellgo and Bontrager finish this machine off. Powerful Shimano hydraulic discs take care of braking here.

composite

I have an 09 Trek 4300 disc.  
The so-called "manual" for the  
fork is just a folded piece of  
paper thats very ambiguous.  
And yes, i fully intend to  
replace the fork soon with  
something much better.
