"I was thrilled to see content that focuses on quality improvement, patient safety, interprofessional collaboration, care coordination, and other content that supports the role of the AGNP as a clinical leader and change agent. The authors give these topics the attention that they deserve, with clear, insightful guidance and importantly, the evidence base. The chapters that address roles (including during disasters!), settings of care, billing, and medication use address salient issues that will help the fledgling AGNP to hit the ground running and the seasoned AGNP to keep current. –Marie Boltz, PhD, GNP-BC, FGSA, FAAN Louise Ross Eberly and Robert Eberly Endowed Professor Toss and Carol Nese College of Nursing, Penn State University From the Foreword Written for Adult-Gerontology Primary Care Nurse Practitioners, faculty, and students, this primary text encompasses the full scope of AGNP primary care practice across multiple healthcare settings including telehealth. The text emphasizes the best available evidence to promote person-centered care, quality improvement of care, interprofessional collaboration, and reducing healthcare costs. The text delivers timely information about current healthcare initiatives in the U.S., including care coordination across the healthcare continuum, interprofessional collaboration, and accountable care organizations. Disease-focused chapters contain general and specific population-based assessment and interprofessional care strategies to both common and complex health issues. They offer consistent content on emergencies, relevant social determinants of health, and ethical dilemmas. The text also prepares students for the administrative aspects of practice with information on the physical exam, medications, billing, coding, and documentation. Concise, accessible information is supported by numerous illustrations, learning objectives, quality and safety alerts, clinical pearls, and case studies demonstrating best practice. A robust ancillary package includes an Instructor's Manual with case studies and teaching guides, a Test Bank reflective of clinical situations and patient conditions, PowerPoints covering key concepts, and an Image Bank of skin conditions and other figures. Key Features: Covers several key courses in the curriculum for ease of teaching/learning Embraces a broad population focus addressing specific care needs of adolescents through older adults Facilitates safe care coordination and reinforces best practices across various health care settings including telehealth Fosters understanding, diagnosis, and management of patients with multimorbid conditions Incorporates evidence-based practice information and guidelines throughout, to ensure optimal, informed patient care A robust ancillary package includes an Instructor's Manual, a Test Bank, PowerPoints, and an Image Bank.

Problems stemming from the misuse and abuse of alcohol and other drugs are by no means a new phenomenon, although the face of the issues has changed in recent years. National trends indicate substantial increases in the abuse of prescription medications. These increases are particularly prominent within the military, a population that also continues to experience long-standing issues with alcohol abuse. The problem of substance abuse within the military has come under new scrutiny in the context of the two concurrent wars in which the United States has been engaged during the past decade—in Afghanistan (Operation Enduring Freedom) and Iraq (Operation Iraqi Freedom and Operation New Dawn). Increasing rates of alcohol and other drug misuse adversely affect military readiness, family readiness, and safety, thereby posing a significant public health problem for the Department of Defense (DoD). To better understand this problem, DoD requested that the Institute of Medicine (IOM) assess the adequacy of current protocols in place across DoD and the different branches of the military pertaining to the prevention, screening, diagnosis, and treatment of substance use disorders (SUDs). Substance Use Disorders in the U.S. Armed Forces reviews the IOM's task of assessing access to SUD care for service members, members of the National Guard and Reserves, and military dependents, as well as the education and credentialing of SUD care providers, and offers specific recommendations to DoD on where and how improvements in these areas could be made.

The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends more on childbirth than any other country in the world, yet outcomes are worse than other high-resource countries, and even worse for Black and Native American women. There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. Birth Settings in America: Outcomes, Quality, Access, and Choice reviews and evaluates maternal and newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings research, and access to and choice of birth settings.

It follows them through the engagement, ceremony, and marriage, and discusses the many issues that arise, offering guidance on how to overcome them and strengthen a couple's marriage, as well as their relationships with those around them. There is no better, more comprehensive resource for those who are dealing with the pressures and problems unique to marriage in the military.

[Government Reports Announcements & Index](#) Wolters Kluwer

Increasingly over the past five years, uncertainty about reimbursement for routine patient care has been suspected as contributing to problems enrolling people in clinical trials. Clinical trial investigators cannot guarantee that Medicare will pay for the care required, and they must disclose this uncertainty to potential participants during the informed consent process. Since Medicare does not routinely "preauthorize" care (as do many commercial insurers) the uncertainty cannot be dispelled in advance. Thus, patients considering whether to enter trials must assume that they may have to pay bills that Medicare rejects simply because they have enrolled in the trial. This report recommends an explicit policy for reimbursement of routine patient care costs in clinical trials. It further recommends that HCFA provide additional support for selected clinical trials, and that the government support the establishment of a national clinical trials registry. These policies (1) should assure that beneficiaries would not be denied coverage merely because they have volunteered to participate in a clinical trial; and (2) would not impose excessive administrative burdens on HCFA, its fiscal intermediaries and carriers, or investigators, providers, or participants in clinical trials. Explicit rules would have the added benefit of increasing the uniformity of reimbursement decisions made by Medicare fiscal intermediaries and carriers in different parts of the country. Greater uniformity would, in turn, decrease the uncertainty about reimbursement when providers and patients embark on a clinical trial.
