Information security is about people, yet in most organizations protection remains focused on technical countermeasures. The human element is crucial in the majority of successful attacks on systems and attackers are rarely required to find technical vulnerabilities, hacking the human is usually sufficient. Ian Mann turns the black art of social

engineering into an information security risk that can be understood, measured and managed effectively. The text highlights the main sources of risk from social engineering and draws on psychological models to explain the basis for human vulnerabilities. Chapters on vulnerability mapping, developing a range of protection systems and awareness training provide a practical and authoritative guide to the risks and countermeasures that are available. There is a singular lack of useful information for security and IT professionals regarding the human vulnerabilities that social engineering attacks tend to exploit. Ian Mann provides a rich mix of examples, applied research and practical solutions that will enable you to assess the level of risk in your organization; measure the strength of your current security and enhance your training and systemic countermeasures accordingly. If you are responsible for physical or information security or the protection of your business and employees from significant risk, then

Hacking the Human is a must-read.

In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future.

With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

Absolute Magic IVP Books \_\_\_\_\_ As well as being an incredible stage performer, a brilliant writer and a talented painter, Derren Brown is also a fantastic street photographer. Here, for the first time, is a selection of his work. As he writes of his passion: 'Street photography is a fitting refuge for those who look at life from a distance. It both sanctifies our remoteness (by offering the standpoint of the observer) and challenges it, insisting we approach with a spritely curiosity. It offers a safe route back into the world: the camera is an entry ticket to daunting social situations and extraordinary environments where we might otherwise feel entirely out of place. Suddenly we have a role: a reason to be present. And for those of us smitten by its appeal, it provides a means of fortifying and forgetting ourselves, while extending out into the world with a controlled compassion.'

Sharon Marshall worked on four tabloid newspapers over the course of ten years. Along the way she did and saw some Very Bad Things, and failed - spectacularly - to find love. It was only when she realised that these two things were connected that she finally realised it was time to quit. In her hilarious and eye-opening memoir she reveals what really goes on behind the scenes at a major tabloid newspaper - just how far journalists will go to get a story, and just how far celebrities will go (secretly) to get their name in the headlines. In the tradition of *Hotel Babylon* and *City Boy*, **TABLOID GIRL** is a smart, funny, revealing look into a fascinating world.
