Using a unique write-in student text at every grade, students represent, solve, and explain -- all in one place. - Publisher. Brain Quest Workbook: Grade 6 Go Math! Blending scientific fact and sports trivia, Robert Adair examines what

a baseball or player in motion does-- and why. How fast can a batted ball go? What effect do stitch patterns have on wind resistance? How far does a curve ball break? Who reaches first base faster after a bunt, a right- or left-handed batter? The answers are often surprising--and always illuminating. This newly revised third edition considers

recent developments in the science of sport such as the neurophysiology of batting, bat vibration, and the character of the "sweet spot." Faster pitchers, longer hitters, and enclosed stadiums also get a good, hard scientific look to determine their effects on the game. Filled with anecdotes about famous players and incidents,
