In 1968, British Leyland brought together many of Britain's motor manufacturers, with the intention of creating a robust unified group that could equal the strength of the big European conglomerates. But this was not to be. There have been many books about the politics and the business activities of British Leyland, but British Leyland - The Cars, 1968-1986 looks exclusively at the cars that came from the company, both the models it inherited and those it created. The eighteen years of the corporation's existence saw a confusing multitude of different car types, but this book resolves these confusions, clarifying who built what, and when. The book takes 1986 as its cut-off point because this was the year that the old British Leyland ceased to exist and what was left of the car and light commercial business was renamed the Rover Group. The book includes: Production histories and technical specifications of every major model; The special overseas models; Appendices on engines, code names, and factories; Buying guidance on the models built in Britain. This is the most comprehensive book so far to focus on the cars from British Leyland between 1968-1986 and it provides an overview of each model's production history, together with essential specification details. It is profusely illustrated with 178 colour and 63 b&w photographs.

The Complete Catalog of British Cars 1895-1975 Crowood
A fascinating and well-researched look at the British motor industry which will appeal to both academic readers and practitioners alike. Why are there now no major car manufacturers in Britain? Whisler considers this and the surrounding issues, making valuable comparisons with overseas manufacturers operating both in the UK and abroad, which provide us with additional interest and insight. Based upon careful use of company archives, this book covers in particular the issues of product development, quality, design, and range, ensuring that The British Motor Industry is destined to make a distinctive contribution to our understanding of the performance of UK manufacturers.

Relating the story of Triumph cars is complex enough, but to include all the earlier events which persuaded Siegfried Bettman to begin car manufacture in 1923 is even more so. The two authors, however – both of them experts in all things Triumph, the cars, and the political events surrounding them – have assembled and presented an enthralling story of the way the car-making side of the business came to prosper, was then afflicted by financial problems, and then rescued from oblivion by Standard in 1944. Thereafter, Triumph once again became a prominent marque, eventually dominated Standard, and (from the 1960s onwards) became an important cast member in the melodramatic events which involved Leyland, BMC and eventually British Leyland. This, however, is not merely a turbulent trawl through the historical record, for both authors were also successful in locating the important characters whose efforts made it possible for Triumph to excite the world. Along the way, the career of cars as famous as the Glorias and Dolomites of the 1930s, the Heralds, Spitfires and TRs of the post-war years, and the headline-grabbing exploits in racing and rallying build up a story which no fictional writer could have created.

The British Motor Corporation's 1100 and 1300 model range was amongst the most successful in the Corporation's history, selling more than 2.1 million of all types between its introduction in 1962 and its demise in 1974. World-wide, it was sold under eight different marque names and in two-door saloon, four-door saloon, two-door estate, and five-door hatchback forms - and very nearly as a van as well. In Britain, it was the country's best-selling car between 1962 and 1971, being beaten just once (in 1967) by the Ford Cortina. BMC 1100 and 1300 looks at the design and development of a model range that at the time confirmed BMC as a pioneer of new automotive ideas and had a profound impact on other manufacturers. It covers not only the full standard model range, but special conversions, cars built abroad, and owning and running the

cars today. Superbly illustrated with 150 colour photographs.

What really happened at British Leyland (BL)? Was it ‘just’ the cars, or were other factors vital to the story? Who really was to blame for BL and MG Rover's death? The 'truth' about BL is deeper than its cars – were ultra- Left-wing plots to topple BL and British society real? Did secret deals and political intrigue really exist? Was it Labour or Conservative powers who ‘killed’ BL, or was it BL itself? How was it that BL’s design genius was hobbled? Author Lance Cole lifts the bonnet on BL and presents a forensic yet easy to read new analysis in a story of BL, its cars, and the era of their motoring as powers on the political Left and Right waged war, sometimes even with themselves. Here is a book about cars and more, a conversation on all things BL: this is a new account of a classic British story told across a trail of evidence in a British industrial and political drama. Many mistakes made BL, but some of the cars were superb, the designs of genius, the engineering excellent; it is just that we have either forgotten, or been brainwashed into believing the worst. In a BL book like no other, written by a classic car fanatic with a background in industrial design, automotive, and wider journalism, this story lifts the lid on BL's cars and more. The author also adds inside knowledge from time working in the motor industry. Lance Cole tells the deeper BL story across the era of its greatest successes and its biggest failures.

Iron Age Amberley Publishing Limited
For a whole generation of car enthusiasts, Triumph was the manufacturer to turn to when buying a sports car. Whether it was a Spitfire or GT6 - or the more costly TR models - this Coventry manufacturer was the sports car king during the twentieth century. Now that these machines are fully fledged classics, nothing has changed. While the Spitfire has the MGB as a formidable adversary, the GT6 is still in a class of its own. Triumph Spitfire and GT6 details the history and development of these classic cars, with specification guides for each of the five Spitfire derivatives and three GT6 models. Topics covered include the development and production of the five Spitfire derivatives from 1962 - 1980, the Spitfire 4, 4 Mk2, Mk3, MkIV and 1500; the GT6 models from 1966-1973, the Mk1, Mk2 and Mk3; the Spitfire and GT6 in motorsport - 24 Hours Le Mans, Alpine Rally and Tour de France, and racing in the US; full buying guide and tips on modifying, with colour and trim options, and details of optional extras available for each model. Also includes an insight into what the press thought of each Spitfire and GT6 derivative, with pages devoted to how the cars were marketed. Superbly illustrated with 291 colour photographs.

Saab 99 and 900 is a detailed account of the cars that came from Saab, the aeroplane maker, whose first car - the 92 model - set the standard for advanced design epitomized by the 99 and 900 cars. The author delves deep into the cars' design and history, and into the core Saab values that they carried into production. Topics include: detailed design history of the 99 and 900; year-by-year developments; technically detailed engineering overviews; detailed specifications; advice on owning and buying and, finally, coverage of rallying and special models.

Triumph Spitfire Competition Preparation Manual The History Press
This title was first published in 2000: Coventry is synonymous with both the creation and relative decline of the British motor car industry. This volume utilises the extensive range of primary sources on the subject to explore the relationship between the car industry in its local context and the wider economic, social and political environment. It analyses the emergence and early dominance of Coventry’s motor manufacturers, the rise of volume production in the 1930s and the instabilities and renaissance of the post-war era. Specific chapters deal with the industry’s response to the demands created by the two world wars. A number of themes run throughout the book including the structure of the industry and the relationship between its various sectors, resource provision, management and labour relations, and the nature and response to market demand. The book also provides fascinating insights into the history of some of the most evocative marques in the car industry, including Daimler, Jaguar, Alvis, Siddeley, Standard and Rover.
