GOD, IT'S NOT WORKING! Haven't we all said that? After another futile attempt at pursuing his dreams, after rounds of affirmations and visualizations, author Vincent Genna yelled, "God, it's not working!" Is there something wrong with me? How come so many seem to be living abundant lives and yet I'm still struggling to get some positive momentum in mine? Genna, metaphysician, psychotherapist, and spiritual teacher realized he's not alone. People trying to improve the quality of their lives spend over 10 billion dollars in the self-help industry, annually. Yet, most are still in unfulfilling jobs and relationships. Some are in financial distress. They make unhealthy lifestyle choices and have yet to find their passion. Then, he discovered that people don't believe what they think they believe. God It's Not Working! is a spiritual self-help book that details the new discoveries about the human mind and "self." With years of experience and training, Genna has distinguished two previously unlabeled divisions of the mind: the Environmental-Made Mind and the Adult-Made Mind. He's also identified a newly evolved defense mechanism--Obstructive Deceit. These three energies or storehouses are constantly at play, informing our choices and blocking our innate abilities to manifest an abundant life. Building on this knowledge he guides readers through a surprising truth that makes all other self-help books work!

What happens to gender at 120mph? Are Harley-Davidsons more masculine than Yamahas?

The Gendered Motorcycle answers such questions through a critical examination of motorcycles in film, advertising and television. Whilst bikers and biker cultures have been explored previously, the motorcycle itself has remained largely under-theorised, especially in relation to gender.

Esperanza Miyake reveals how representations of motorcycles can produce different gendered bodies, identities, spaces and practices. This interdisciplinary book offers new and critical ways to think about gender and motorcycles, and will interest scholars and students of gender, technology and visual cultures, as well as motorcycle industry practitioners and motorcycle enthusiasts.

"Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project, and places the Simplified Sign System in a wider context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totalling approximately 1000 signs, each with a clear illustration and a written description

of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience - such as healthcare professionals, aid workers, military personnel, travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators alike."--Publisher's website
