What happens to gender at 120mph? Are Harley-Davidsons more masculine than Yamahas? The Gendered Motorcycle answers such questions through a critical examination of motorcycles in film, advertising and television. Whilst bikers and biker cultures

have been explored previously, the motorcycle itself has remained largely under-theorised, especially in relation to gender. Esperanza Miyake reveals how representations of motorcycles can produce different gendered bodies, identities, spaces and practices. This interdisciplinary book offers new and critical ways to think about gender and motorcycles, and will interest scholars and students of gender, technology and visual cultures, as well as motorcycle industry practitioners and motorcycle enthusiasts. GOD, IT'S NOT WORKING! Haven't we all said that? After another futile attempt at pursuing his dreams, after rounds of affirmations and visualizations, author Vincent Genna yelled, "God, it's not working!" Is there something wrong with me? How come so many seem to be living abundant lives and yet I'm still struggling to get some positive momentum in mine? Genna, metaphysician, psychotherapist, and spiritual teacher realized he's not alone. People trying to improve the quality of their lives spend over 10 billion dollars in the self-help industry, annually. Yet, most are still in unfulfilling jobs and relationships. Some are in financial distress. They make unhealthy lifestyle choices and have yet to find their passion. Then, he discovered that people don't believe what they think they believe. God It's Not Working! is a spiritual self-help book that details the new discoveries about the human mind and "self." With years of experience and training, Genna has distinguished two previously unlabeled

divisions of the mind: the Environmental-Made Mind and the Adult-Made Mind. He's also identified a newly evolved defense mechanism--Obstructive Deceit. These three energies or storehouses are constantly at play, informing our choices and blocking our innate abilities to manifest an abundant life. Building on this knowledge he guides readers through a surprising truth that makes all other self-help books work!

When the U.S. military invaded Iraq, it lacked a common understanding of the problems inherent in counterinsurgency campaigns. It had neither studied them, nor developed doctrine

and tactics to deal with them. It is fair to say that in 2003, most Army officers knew more about the U.S. Civil War than they did about counterinsurgency. The U.S. Army / Marine Corps Counterinsurgency Field Manual was written to fill that void. The result of unprecedented collaboration among top U.S. military experts, scholars, and practitioners in the field, the manual espouses an approach to combat that emphasizes constant adaptation and learning, the importance of decentralized decision-making, the need to understand local politics and customs, and the key role of intelligence in winning the support of the population. The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations: sometimes the more you protect your forces, the less secure you are; sometimes the more force you use, the less effective it is; sometimes doing nothing is the best reaction. An new introduction by Sarah Sewall, director of the Carr Center for Human Rights Policy at Harvard's Kennedy School of Government, places the manual in critical and historical perspective, explaining the significance and potential impact of this revolutionary challenge to conventional U.S. military doctrine. An attempt by our military to redefine itself in the aftermath of 9/11 and the new world of international terrorism, The U.S. Army / Marine Corps Counterinsurgency Field Manual will play a vital role in American military campaigns for years to come. The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation, a private-public partnership that supports the families of America's injured servicemen.
