*Mass Communication, an Introduction* Harvard University Press  
What's old is new again, and the newest trend on the block is Café Racers. Written by well-known motorcycle and automotive author Doug Mitchel, *How to Build a Café Racer* starts

with a history lesson. While those first bikes were built in the UK for racing from café to café, the current rage for Café Racers has definitely spread to the US. Converting a stock motorcycle to a Café Racer requires more than a fairing and a few decals. The book starts with chapters on planning and choosing an appropriate bike, followed by chapters that detail the modifications that will likely be embraced by anyone converting a stocker to a rocker. From shocks and tires to engine modifications, Doug's book lays out each type of modification and how it's best carried through. The center of the book holds a gallery of finished bikes. These are not just Triumphs or Nortons, but nearly every brand imaginable from Japan, Italy, the UK, and Germany. The final chapters

include two, start-to-finish cafe builds. This is the chance for the reader to see how professional shops take a stock Honda, Triumph, or Ducati and convert it into a fast, sexy, and functional Cafe Racer, ready to race from cafe to cafe on Saturday night, or around the race track on Sunday afternoon.

"Much has been written about the famous conflicts and battlegrounds of the East during the American Revolution. Perhaps less familiar, but equally important and exciting, was the war on the western frontier, where Ohio Valley settlers fought for the land they had claimed -- and for their very lives. George Rogers Clark stepped forward to organize the local militias into a

united front that would defend the western frontier from Indian attacks. Clark was one of the few people who saw the importance of the West in the war effort as a whole, and he persuaded Virginia's government to lend support to his efforts. As a result Clark was able to cross the Ohio, saving that part of the frontier from further raids. Lowell Harrison captures the excitement of this vital part of American history while giving a complete view of George Rogers Clark's significant achievements. Lowell H. Harrison, is a professor emeritus of history at Western Kentucky University and is the author or co-author of numerous books, including Lincoln of Kentucky, A New History of Kentucky, and Kentucky's Governors."

Music is one of the most universal ways of expression and communication in human life and is present in the everyday lives of people of all ages and from all cultures around the world. Music represents an enjoyable activity in and of itself, but its influence goes beyond simple amusement. Listening to music, singing, playing, composing and improvising, individually and collectively, are common activities for many people: these activities not only allow the expression of personal inner states and feelings, but also can bring many positive effects to those who engage in them. There is

---

an increasing wealth of literature concerning the wider benefits of musical activity, and research in the sciences associated with music suggests that there are many dimensions of human life (physical, social, psychological—including cognitive and emotional) which can be affected positively by music. The impact that musical activity has on human life can be found in different processes, including a transfer of learning from the musical to another cognitive domain. Abilities that have been developed through music education and training may also be effectively applied in other cognitive tasks. Engagement in successful music activity may also have a positive impact on social skills and social inclusion, thus supporting the participation of the individual in collective and collaborative musical events. The promotion of social participation through music can foster many kinds of inclusion, including intercultural, intergenerational, and support for those who are differently abled. The aim of this Research Topic is to present a diverse range of original articles that investigate and discuss, in different ways, the crucial role that musical activity can play in human development and well-being.

1945 to 1955 (and later?) Models: An illustrated workshop manual covering Triumph twin-cylinder motorcycles from 1945 to 1955: This is a faithful reproduction of the Factory Workshop Manual No. 11, originally published in the US by Floyd Clymer. The major revision in the later pre-unit factory manuals was the addition of technical specifications for the T120 Bonneville (1959). Unfortunately, those revisions also included the deletion of repair data for rigid frame, sprung hub and 3T models. This makes the Factory Workshop Manual No. 11 the most comprehensive workshop manual available for pre-unit, twin-cylinder Triumph motorcycles up to and including 1962 models as it includes repair and maintenance data for the full line of rigid frame, sprung hub, swing-arm and 350cc models. Much more detailed than the owner's handbook, this manual provides the information necessary for the overhaul of engines, gear boxes, frames, swing-arm, forks, wheels, hubs, carburetors, electrics, etc., essential information for the enthusiast, owner or restorer of these classic motorcycles. Size: 5.5" x 8.5" with 224 pages and 84 illustrations, includes 8 pages of detailed technical specification

charts and both an illustration index and a comprehensive index of contents. Applicable to the following models: 5T Speed Twin, T100 Tiger 100, TR5 Trophy, 6T Thunderbird, T110 Tiger 110 and 3T De-Luxe. Includes maintenance and repair data for the following engines: Twin Cylinder 350cc OHV, 500cc OHV and 650cc OHV.
