Twins Haynes Manuals N.

America, Incorporated

1945 to 1955 (and later?)

Models: An illustrated
workshop manual covering
Triumph twin-cylinder
motorcycles from 1945 to
1955: This is a faithful
reproduction of the Factory
Workshop Manual No. 11,
originally published in the
US by Floyd Clymer. The major
revision in the later pre-
unit factory manuals was the
addition of technical
specifications for the T120
Bonneville (1959).
Unfortunately, those

revisions also included the
deletion of repair data for
rigid frame, sprung hub and 3T
models. This makes the Factory
Workshop Manual No. 11 the
most comprehensive workshop
manual available for pre-unit,
twin-cylinder Triumph
motorcycles up to and
including 1962 models as it
includes repair and
maintenance data for the full
line of rigid frame, sprung
hub, swing-arm and 350cc
models. Much more detailed
than the owner's handbook,
this manual provides the
information necessary for the
overhaul of engines, gear
boxes, frames, swing-arm,
forks, wheels, hubs,
carburetors, electrics, etc.,
essential information for the
enthusiast, owner or restorer
of these classic motorcycles.
Size: 5.5" x 8.5" with 224
pages and 84 illustrations,
includes 8 pages of detailed
technical specification charts
and both an illustration index
and a comprehensive index of
contents. Applicable to the
following models: 5T Speed
Twin, T100 Tiger 100, TR5
Trophy, 6T Thunderbird, T110
Tiger 110 and 3T De-Luxe.
Includes maintenance and
repair data for the following
engines: Twin Cylinder 350cc
OHV, 500cc OHV and 650cc OHV.

A typical Haynes manual covers: general information; troubleshooting; lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams.
