From Africa to Asia and Latin America, the era of climate wars has begun. Extreme weather is breeding banditry, humanitarian crisis, and state failure. In *Tropic of Chaos*, investigative journalist Christian Parenti travels along the front lines of this gathering catastrophe--the belt of economically and politically battered postcolonial nations and war zones girding the planet's midlatitudes. Here he finds failed states amid climatic disasters. But he also reveals the unsettling presence of Western military forces and explains how they see an opportunity in the crisis to prepare for open-ended global counterinsurgency. Parenti argues that this incipient "climate fascism"--a political hardening of wealthy states-- is bound to

fail. The struggling states of the developing world cannot be allowed to collapse, as they will take other nations down as well. Instead, we must work to meet the challenge of climate-driven violence with a very different set of sustainable economic and development policies.

William Sydney Porter (September 11, 1862 - June 5, 1910), known by his pen name O. Henry, was an American short story writer. O. Pharma-funded mainstream media has convinced millions of Americans that Dr. Anthony Fauci is a hero. He is anything but. As director of the National Institute of Allergy and Infectious Diseases (NIAID), Dr. Anthony Fauci dispenses \$6.1 billion in annual taxpayer-provided funding for scientific research, allowing him to dictate the subject, content, and outcome of scientific health research across the globe. Fauci uses the financial clout at his disposal to wield extraordinary influence over hospitals, universities, journals, and thousands of influential doctors and scientists—whose careers and institutions he has the power to ruin, advance, or reward.

During more than a year of painstaking and meticulous research, Robert F. Kennedy Jr. unearthed a shocking story that obliterates media spin on Dr. Fauci . . . and that will alarm every American—Democrat or Republican—who cares about democracy, our Constitution, and the future of our children's health. The Real Anthony Fauci reveals how "America's Doctor" launched his career during the early AIDS crisis by partnering with pharmaceutical companies to sabotage safe and effective off-patent therapeutic treatments for AIDS. Fauci orchestrated fraudulent studies, and then pressured US Food and Drug Administration (FDA) regulators into approving a deadly

chemotherapy treatment he had good reason to know was worthless against AIDS. Fauci repeatedly violated federal laws to allow his Pharma partners to use impoverished and dark-skinned children as lab rats in deadly experiments with toxic AIDS and cancer chemotherapies. In early 2000, Fauci shook hands with Bill Gates in the library of Gates' \$147 million Seattle mansion, cementing a partnership that would aim to control an increasingly profitable \$60 billion global vaccine enterprise with unlimited growth potential. Through funding leverage and carefully cultivated personal relationships with heads of state and leading media and social media institutions, the Pharma-Fauci-Gates alliance exercises dominion over global health policy. The Real Anthony Fauci details how Fauci, Gates, and their cohorts use their control of media outlets, scientific journals, key government and quasi-governmental agencies, global intelligence agencies, and influential scientists and physicians to flood the public with fearful propaganda about COVID-19 virulence and pathogenesis, and to muzzle debate and ruthlessly censor dissent.

In November 1991 the American flag was lowered for the last time at Clark Air Base in the Philippines. This act brought to an end American military presence in the Philippines that extended back over 90 years. It also

represented the final act in a drama that began with the initial rumblings in April of that year of the Mount Pinatubo volcano, located about nine miles to the east of Clark. This book tells the remarkable story of the men and women of the Clark community and their ordeal in planning for and carrying out their evacuation from Clark in face of the impending volcanic activity. It documents the actions of those who remained on the base during the series of Mount Pinatubo's eruptions, and the packing out of the base during the subsequent months. This is the story of the Ash Warriors, those Air Force men and women who carried out their mission in the face of an incredible series of natural disasters, including volcanic eruption, flood, typhoons, and earthquakes, all of which plagued Clark and the surrounding areas

during June and July 1991.

Cain. ” —Denver Post Michael Gruber 's Night of the Jaguar—like his earlier novels featuring Miami detective Jimmy Paz (Tropic of Night, Valley of Bones)—transforms the conventional thriller into something extraordinary, taking the crime novel to a place it has never gone before. Combining a grisly murder investigation with chilling supernatural elements and provocative thought, Night of

the Jaguar is a bravura display of the originality and artistry that has won Gruber the title, “ the Stephen King of crime fiction ” while inspiring the Washington Post Book World to name the Jimmy Paz trilogy, “ among the essential novels of recent years. ”

Gods in Print is the first comprehensive collection of early hand-colored lithographs, multiple-block chromolithographs, and offset print images of India ’ s world of gods and goddesses. India ’ s love of gods in print began in the 1870s with the founding of the Calcutta Art Studio and the Chitrashala Press. In 1894, artists Ravi and Raja Varma set up the Ravi Varma Fine Art Lithographic Press outside Bombay. By the early 1900s, these presses had begun selling their prints throughout the subcontinent. Collectors Mark Baron and Elise Boisante have traveled to remote corners of India to document and preserve this fragile and beautiful popular art form. Their diligence in tracking down “ God prints ” and restoring them to their original brilliance has resulted in the extraordinary and comprehensive collection featured in this volume. For the first time, the full scope of India ’ s sacred imagery in print can be viewed from its earliest days.

In the Land of Mirrors is a journey through the politics of Cuban exiles since the 1959 Cuban Revolution. It explores the development of Cuban exile politics and identity within a context of U.S. and Cuban realities, as well as within the broader inquiry of the changing nature of nation-states and its impact on the politics and identity of diaspora communities. Topics covered include: the origins of the post-revolution exile enclave of the 1960s; the evolution of the Cuban community over the 1960s; the pluralization

of exile politics in the 1970s, particularly regarding the relationship with the island; the emergence of Cuban-American political action committees in the 1980s; post-Cold War developments; and the transition of Miami by the coming of age of a second generation of Cuban-Americans and the arrival of a new wave of exiles. Interspersed with vignettes from the author's own experiences and political activism, *In the Land of Mirrors* explores the meanings and ramifications of exile, of belonging, and of seeing the self in the other. It will appeal to political scientists, Latin Americanists, and those studying the politics of exile. Mara de los Angeles Torres was born in Cuba and came to the United States as a young child. From acclaimed author Dr. Jason Fung, a revolutionary guide to reversing diabetes. Dr. Jason Fung forever changed the way we think about obesity with his best-selling book, *The Obesity Code*. Now he has set out to do the same for type 2 diabetes.

Today, most doctors, dietitians, and even diabetes

specialists consider type 2 diabetes to be a chronic and progressive disease—a life sentence with no possibility of parole. But the truth, as Dr. Fung reveals in this paradigm-shifting book, is that type 2 diabetes is reversible. Writing with clear, persuasive language, he explains why conventional treatments that rely on insulin or other blood-glucose-lowering drugs can actually exacerbate the problem, leading to significant weight gain and even heart disease. The only way to treat type 2 diabetes effectively, he argues, is proper dieting and intermittent fasting—not medication. The startling reviews of *Tropic of Night* announced Michael Gruber as one of the most talented thriller writers to debut in many years. Now, with the much-anticipated publication of *Valley of Bones*, Gruber fulfills that genre-bending promise as perhaps no writer since Graham Greene, with a genuinely exhilarating thriller that simultaneously offers a profound, deeply provocative exploration of the nature of faith itself. The setting is Miami. Rookie cop Tito Morales arrives at the Trianon Hotel to investigate a routine disturbance call -- and, to his shock and

horror, watches as a wealthy oilman plunges ten stories and impales himself on a nearby fence. Soon Morales is joined by detective Jimmy Paz, famous throughout the city for solving -- or at least providing a plausible solution to -- the so-called Voodoo Murders that left Miami burning months earlier. Together Paz and Morales enter the hotel and discover, in the dead man's room, a most unusual suspect, an otherworldly woman by the name of Emmylou Dideroff. She emerges from a rapturous, prayerlike state and admits that she had a motive for killing the oilman. Ultimately, she says she wants to confess, and asks for a pen and several notebooks in which to convey the details of her confession. What Emmylou writes is nothing like what Paz expects; he enlists psychologist Lorna Wise in

an effort to make sense of things that go beyond Emmylou's explanation of the murder: details of childhood abuse, of other crimes committed, of regular communion with saints -- and with the devil. Is she mentally disturbed or playacting in hopes of getting declared unfit for trial? Or does she really believe herself to be an instrument of God? And why is it that so many people -- including Paz's biological father -- are suddenly interested in the contents of these notebooks and in preventing them from becoming public? As Valley of Bones moves toward its startling and dramatic finale, Emmylou's "confessions" lead Jimmy Paz, Lorna Wise, and Tito Morales down a series of unexpected and dangerous turns that puts them in the path of perhaps the most terrifying

evil imaginable and forces each of them to confront questions about faith, love, and the possibility of the miraculous.

Marching Powder by Rusty Young is the story of Thomas McFadden, a small-time English drug smuggler who was arrested in Bolivia and thrown inside the notorious San Pedro prison. He found himself in a bizarre world, the prison reflecting all that is wrong with South American society. Prisoners have to pay an entrance fee and buy their own cells (the alternative is to sleep outside and die of exposure), prisoners' wives and children often live inside too, high quality cocaine is manufactured and sold from the prison. Thomas ended up making a living by giving backpackers tours of the prison - he became a fixture on the backpacking circuit and was named in the Lonely Planet guide to Bolivia.

When he was told that for a bribe of 5000 USD his sentence could be overturned, it was the many backpackers who'd passed through who sent him the money. Sometimes shocking, sometimes funny, Marching Powder is an always riveting story of survival.
