How to be a Redhead has the answers to all your redhead beauty questions, with specialized advice and tips for hair care, skincare, makeup, health and fashion. With this book, redheads get: - The best products, tools and tips to keep your hair stunning and your complexion clear - Easy step-by-step hairstyle tutorials - Tips for nourishing your sensitive skin throughout the year - Effortlessly cool day-to-night makeup looks - How to achieve the perfect red lip - Redhead fashion dos and don 'ts - How to look and feel your best Written by redheads, sisters and starters of the Red Hair Revolution, Adrienne & Stephanie Vendetti, How to be a Redhead is packed full of all the inspiration and advice a redhead could ever want. With this must-have book, you 'll learn to rock your red head with confidence, grace and glowing beauty.

Annual Report DIANE Publishing

Discovering Addiction brings the history of human and animal experimentation in addiction science into the present with a wealth of archival research and dozens of oral-history interviews with addiction researchers. Professor Campbell examines the birth of addiction science---the National Academy of Sciences's project to find a pharmacological fix for narcotics addiction in the late 1930s---and then explores the human and primate experimentation involved in the succeeding studies of the "opium problem," revealing how addiction science became "brain science" by the 1990s. Psychoactive drugs have always had multiple personalities---some cause social problems; others solve them---and the study of these drugs involves similar contradictions. Discovering Addiction enriches discussions of bioethics by exploring controversial topics, including the federal prison research that took place in the 1970s---a still unresolved debate that continues to divide the research community---and the effect of new rules regarding informed consent and the calculus of risk and benefit. This fascinating volume is both an informative history and a thought-provoking guide that asks whether it is possible to differentiate between ethical and unethical research by looking closely at how science is made. Nancy D. Campbell is Associate Professor of Science and Technology Studies at Rensselaer Polytechnic Institute and the author of Using Women: Gender, Drug Policy, and Social Justice. "Compelling and original, lively and engaging---Discovering Addiction opens up new ways of thinking about drug policy as well as the historical discourses of addiction." ---Carol Stabile, University of Wisconsin--Milwaukee Also available: Student Bodies: The Influence of Student Health Services in American Society and Medicine, by Heather Munro Prescott Illness and the Limits of Expression, by Kathlyn Conway White Coat, Clenched Fist: The Political Education of an American Physician, by Fitzhugh Mullan

How to Be a Redhead Ludwig von Mises Institute

Winner, 2009 Outstanding Book Award, History of Education Society Winner, 2009 Richard Slatten Prize for Excellence in Virginia Biography, Virginia Historical Society Conceptual founder of the Massachusetts Institute of Technology, William Barton Rogers was a highly influential scientific mind and educational reformer of the nineteenth century. A. J. Angulo recounts the largely unknown story of one man's ideas and how they gave way to the creation of one of America's premier institutions of higher learning. MIT's long tradition of teaching, research, and technological innovation for real-world applications is inexorably linked to Rogers' educational philosophy. Emphasizing the "useful arts"—a curriculum of specialized scientific study stressing theory and practice, innovation and functionality—Rogers sought to revolutionize standard educational practices of the day. Controversial in an era typified by a generalist approach to teaching the sciences, Rogers' model is now widely emulated by institutions throughout the world. Exploring the intersection of Rogers' educational philosophy and the rise of technical institutes in America, this biography offers a long-overdue account of the man behind MIT.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

The History of Londonderry, Comprising the Towns of Derry and Londonderry, N. H. Routledge

This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

The Lott Family in America ... Army

"I got to be a millionaire afore I know'd it hardly," remarked the Wall Street financier Daniel Drew (1797-1879). An uneducated farm boy from Putnam County, New York, he became in turn a successful cattle drover, a circus clown, tavern keeper, a shrewd Hudson River steamboat operator, and an unscrupulous speculator. As the colorful "Uncle Daniel" of Wall Street—his whiskered face seamed with wrinkles and twinkling with steel-gray eyes—time and again he disrupted the financial markets with manipulations whereby he either won or lost millions of dollars. Having "got religion" upon hearing a scary hell-fire sermon at the age of fourteen, Drew was also a fervent Methodist. Rumors of his financial operations—epic struggles that pitted him against Cornelius Vanderbilt, Jay Gould, and Jim Fisk, and that subjected him to threats of arrest and even kidnapping, and on one occasion to a most undignified flight from the state—baffled and disturbed the Methodists, who admittedly had little grasp of Wall Street but knew firsthand Brother Drew's tearful repentance at prayer meetings and his generosity in founding churches and seminaries. With its dual commitment to religion and rascality, Drew's career is a rich study in contradictions, an exciting chronicle of high drama and low comedy capped by bankruptcy. To understand Drew in his complexity, the author argues, is to get a grip on the heady and exploitative age that produced him—the yesterday of "smartness" and "go ahead" that helped engender the America of today. Based on primary sources, this is the first full-fledged biography of Drew, who hitherto has been known chiefly through a fictionalized and fraudulent account of 1910.

Rob White's pioneering work in the establishment and growth of green criminology has been part of a paradigm shift for the field of criminology as it has moved to include crimes committed against the environment. For the first time, this book brings together a selection of White's essays that explore the theories, research approaches and concepts that have been instrumental to our understanding of environmental harm and eco-justice. The book provides an additional foundation for scholarship that goes beyond expression of opinion or immediate empirical finding; the emphasis is on systematic analysis and theoretically informed consideration of complex realities. It serves as a platform for further debate and discussion of green criminology's theories, perspectives, approaches and concepts and their application to specific sub-areas such as environmental law enforcement, wildlife trafficking, pollution and climate change. Its aim is not to provide answers, but to stimulate further dedicated theoretical

contemplation of environmental harms, threats to biodiversity and extinction of species. This is essential reading for all those engaged with green criminology, as well as criminological theory, eco-justice and environment and sustainability studies.

Union Agriculturist and Western Prairie

Farmer Dalcassian Publishing Company The Earth has limited resources while the resources in space are virtually unlimited. Further development of humanity will require going beyond our planet and exploring of extraterrestrial bodies and their resources. This book investigates Outer Solar Systems and their prospective energy and material resources. It presents

past missions and future technologies and solutions to old problems that could become reality in our life time. The book therefore is a great resource of condensed information for specialists interested in current and impending Outer Solar Systems related activities and a good starting point for space researchers, inventors, technologists and potential investors.

Wit and Humor of the Age

In 1932, John T. Flynn had begun to rethink his old-style "progressivism" to develop intellectually into a defender of markets as against the regimentation of government management. A first product of these steps is this classic and extraordinary full biography of John D. Rockefeller. In this highly sympathetic portrayal, Flynn shows how Rockefeller employed the tools of capitalism to become enormously rich in the service of others, and how this unleashed the most unexpected backlash from anti-capitalists of all sorts, culminating in the breakup of Standard Oil. He saw that this was done at the behest of Rockefeller's competition, and not in the public interest. It was the first and probably still the best biography of an American original.
