The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world.

---

Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

value of graduate attributes for students, graduates and lecturers in higher education. A coherent, intelligent, subtle and important enhancement to the field, this text guides readers through a theoretical and historical analysis of graduate attributes, using interdisciplinary and interprofessional lenses. This unique approach offers pertinent coverage of a wider range of graduate attributes than one usually sees, generating multiple perspectives and discourses that have implications for both theory and practice. Through an open and exploratory analysis, this text asks questions such as the following:

- Are programmes of study which claim ‘ postgraduate ’ attributes providing something further, deeper or enhanced in comparison, or just more of the same?
- Should we be developing continuing professional development attributes for our professional learning programmes of study, or are attributes of this nature established at the undergraduate level?
- How can we embed graduate attributes in curricula in a wide range of subject discipline-specific and interdisciplinary ways?
- In a culture of lifelong learning and a cross-disciplinary changing global market, are attributes simply a starting point – a launch pad for future and ongoing development required for a world of increasing complexity? Clearly structured and offering a mix of case study and theoretical frameworks to explore each GA, practical guidance is offered at the end of each chapter on how to embed the relevant graduate attribute whilst providing well-researched theoretical underpinning. The varied methods applied and methodological attitudes espoused will prove

inclusive to a wide range of readers. Bringing together analysis of specific case studies from a wide range of professional and discipline-specific contexts, *Graduate Attributes in Higher Education* will be a valuable text for educators and professionals focused on curriculum development and professional learning.

Organizational communication impacts service efficiency and productivity. An increase in federal funding to strengthen communication within the airport stakeholders has failed to deliver expected results. The purpose of this qualitative case study is to explore whether miscommunication among the TSA agents and airport employees relates to effective implementation of airport security policies. The central research question focuses on the degree to which miscommunication between the TSA and airlines regarding prohibited items at security checkpoints impeded the effective execution of federal law regarding carry on luggage on commercial aircraft. Using Weick ' s organizational information theory, this study examines the implementation of airport security policy focusing on communication between government and industry organizations. A sample of 13 private airline employees and 7 airport employees at a large U.S. commercial airport participated in the study. Data was collected via semi structured interview questions. Data was coded and analyzed following an inductive coding strategy. According to study results, there is very little evidence of miscommunications between government and airline

stakeholders regarding policy changes and expectations related to security procedures. However, miscommunication about the same policy changes to consumers confuses travelers, which may explain incidences of prohibited items at the security checkpoints. Implications for positive social change related to this study may assist policy makers in clarifying language to better inform travelers about security changes and prohibited items, the objective of which will promote safer flying experiences, reduce the potential for harm, and result in more expedient traveling.

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances

and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

Examine cataloging and classification training programs around the world  
Education for Library Cataloging: International Perspectives examines the global development of educational programs for cataloging and classification in the library and information field. Library school faculty and professional librarians from more than 20 countries discuss a wide range of topics, including formal school and continuing education of catalog librarians, education and training for paraprofessional staff in cataloging and technical services, changes in library school programs, and metadata and information organization instruction. Faculty members and seasoned librarians from Europe, Africa, Asia, Australia, Latin America, and the Middle East present case studies and overviews of library and information school programs, bibliographies of cited works in both Western and non-Western language literature, and plenty of helpful tables and charts. Articles presented in Education for Library Cataloging: International Perspectives are organized geographically to make it easier to check which countries are covered in each region, and to determine regional similarities

---

and differences. Political, historical, cultural, religious, and linguistic factors were also considered to demonstrate the wide range of educational efforts and programs to cultivate cataloging professionals all over the world. Topics examined in *Education for Library Cataloging: International Perspectives* include: \* education and training development for librarians in the University of Botswana Library \* the library science school curricula in the Cross River State of Nigeria \* the training of students in cataloging via distant education in South Africa \* education programs in China \* the education for knowledge organization (including cataloging and classification) in India \* the current status of cataloging education in Japan \* on the job training of catalog librarians in South Korea \* the education for cataloging in Australia \* how catalog librarians are trained in Germany and Austria \* recent changes to the library education system in Poland \* a critical study of cataloging instruction within the library and information science programs in Spain \* a recent survey of graduate education and training for cataloging and classification in the United Kingdom \* an overview of the education for cataloging and classification in Mexico \* the current status of cataloging and classification education in Egypt \* recent changes to cataloging teaching in Israel \* the continuing education for catalogers in Saudi Arabia \* and much more. Many of the articles presented in *Education for Library Cataloging: International Perspectives* document the initial efforts to introduce education for cataloging in particular countries, including Egypt and Japan. This book is an invaluable resource for library and information school educators, administrators, and students.
