First Aid for the USMLE Step 1 2020, Thirtieth edition John Wiley & Sons

In this hugely acclaimed author's new novel, history comes alive before us when, in the seventeenth century, a Jesuit missionary ventures into the wilderness in search of converts—the defining moment of first contact between radically different worlds, each at once old and new in its own ways. What unfolds over the next few years is truly epic, constantly illuminating and surprising, sometimes comic, always entrancing, and ultimately all-too-human in its tragic grandeur. Christophe, as educated as any Frenchman could be about the “sauvages” of the New World whose souls he has sworn to save, begins his true enlightenment shortly after he sets out when his native guides—terrified by even a scent of the Iroquois—abandon him to save themselves. But a

Huron warrior and elder named Bird soon takes him prisoner, along with a young Iroquois girl, Snow Falls, whose family he has just killed. The Huron-Iroquois rivalry, now growing vicious, courses through this novel, and these three are its principal characters. Christophe and Snow Falls are held captive in Bird's massive village. Champlain's Iron People have only lately begun trading with the Huron, who mistrust them as well as this Jesuit Crow who has now trespassed onto their land; and Snow Falls's people, of course, have become the Hurons' greatest enemy. Bird knows that to get rid of them both would resolve the issue, but he sees Christophe, however puzzling, as a potential envoy to those in New France, and Snow Falls as a replacement for the two daughters he'd lost to the Iroquois. These relationships wax and wane as life comes at them relentlessly: a lacrosse match with an allied tribe, a dangerous mission to trade furs with the French for the deadly shining wood that could save the Huron nation, shocking victories in combat and devastating defeats, then a sickness the likes of which none of them has ever seen. The world of *The Orenda* blossoms to include such unforgettable characters as Bird's oldest friend, Fox; his lover, Gosling, who some believe possesses magical powers; two more Jesuit Crows who arrive to help form a mission; and boys from both tribes whose hearts veer wildly from one side to the other, for one reason or another. Watching over all of them are the spirits that guide their every move. The *Orenda* traces a story of blood and hope, suspicion and trust, hatred and love, that comes to a head when Jesuit and Huron join together against the stupendous wrath of the Iroquois, when everything that any of them has ever known or believed in faces nothing less than annihilation. A saga nearly four hundred years old, it is also timeless and eternal. This eBook edition includes a Reading Group Guide.

Medicinal Orchids of Asia Bedford/St. Martin's

This is the first book in Chinese linguistics which discusses the grammar of a dialect group, in this case the Xiang dialect spoken in Hunan, from both a synchronic and diachronic perspective. The author uses new data and new frameworks to present her analysis. The synchronic part covers contemporary grammar across localities within the Xiang-speaking area by using the methods and theories of comparative and typological linguistics. The diachronic analysis reconstructs earlier grammatical systems based mainly on modern

data but also on historical written records, and analyses the development of the syntactic systems of the Xiang dialects, adopting the methods and theories of historical linguistics and grammaticalization. The discussions in this book raise new issues on dialect research which have not yet been fully acknowledged by Chinese dialectologists. The author shows, for example, how the earlier layers of grammar may be reconstructed on the basis of modern data, and how the path of grammaticalization of functional words may be traced. The discussions reveal that the Xiang dialect group forms a transitional zone between northern and southern dialects. The syntactic constructions in these two areas often co-exist or are mingled in Xiang. Thus, the grammatical constructions in different localities of the Xiang dialect group often provide a bridge connecting the

constructions of northern and southern Chinese, or Modern Chinese and Chinese of earlier periods. This book is of interest to scholars and students who are working on grammar, dialectology, historical linguistics, comparative linguistics, typological linguistics, and grammaticalization, as well as those researchers focusing on language policy, language acquisition, and education.

Indigenous Toronto Walter de Gruyter
HERITAGE TORONTO 2022 BOOK AWARD
NOMINEE Rich and diverse narratives of Indigenous Toronto, past and present Beneath many major North American cities rests a deep foundation of Indigenous history that has been colonized, paved over, and, too often, silenced. Few of its current inhabitants know that Toronto has seen twelve thousand years of uninterrupted Indigenous presence and nationhood in this region, along with a vibrant culture and history that thrives

to this day. With contributions by Indigenous Elders, scholars, journalists, artists, and historians, this unique anthology explores the poles of cultural continuity and settler colonialism that have come to define Toronto as a significant cultural hub and intersection that was also known as a Meeting Place long before European settlers arrived. "This book is a reflection of endurance and a helpful corrective to settler fantasies. It tells a more balanced account of our communities, then and now. It offers the space for us to reclaim our ancestors' language and legacy, rewriting ourselves back into a landscape from which non Indigenous historians have worked hard to erase us. But we are there in the skyline and throughout the GTA, along the coast and in all directions." -- from the introduction by Hayden King

This textbook has been designed to emphasize
the differences between languages and how this

affects the translation of a text from one
language into another. It is based upon the
principle that the translator must first know the
meaning of the source text before he can
translate it into the receptor language. Meaning
is presented as a structure which stands behind
any text. Meaning-based, rather than form-
based, translation is the goal of the textbook.
