Economic Theory, Econometrics, and Mathematical Economics: New Quantitative Techniques for Economic Analysis provides a critical appraisal of the results, the limits, and the developments of well-established quantitative techniques. This book presents a detailed analysis of the quantitative techniques for economic analysis.

Organized into four parts encompassing 16 chapters, this book begins with an overview of the general questions concerning models and model making. This text then provides the main results and various interesting economic applications of some quantitative techniques that have not been widely used in the economic field. Other chapters consider the principle of optimality in dynamic programming wherein the infinite sequence of consumption-saving decisions can be reduced to

one decision. This book discusses as well the methods for online control and management of large-scale systems. The final chapter deals with special problems. This book is a valuable resource for economists, social scientists, epistemologists, economic historians, and research workers.

Business English (Book Only) Madeira Park, B.C. : Harbour Pub. Quantitative Techniques: Theory and Problems adopts a fresh and novel approach to the study of quantitative techniques, and provides a comprehensive coverage of the subject. Essentially designed for extensive practice and self-study, this book will serve as a tutor at home. Chapters contain theory in brief, numerous solved examples and exercises with exhibits and tables.

Guide for BBA/BBS/BBM 2021 New Press, The In the heart of Louisiana, the most powerful people in the South live behind elegant gates, mossy trees, and pleasant masks. Once every ten years, the pretense falls away and a tournament is held to determine who will rule them. The Acquisition is a crucible for the Southern nobility, a love letter written to a time when

barbarism was enshrined as law. Now, Sinclair Vinemont is in the running to claim the prize. There is only one way to win, and he has the key to do it - Stella Rousseau, his Acquisition. To save her father, Stella has agreed to become Sinclair's slave for one year. Though she is at the mercy of the cold, treacherous Vinemont, Stella will not go willingly into darkness. As Sinclair and Stella battle against each other and the clock, only one thing is certain: The Acquisition always ends in blood.

Renault, Samsung, Lacoste This book provides opportunities to discover a selection of issues recently faced by 10 major French companies. Each case offers in a clear and structured manner: a case presentation sheet

including the problem statement, learning objectives, as well as the main themes and marketing tools used throughout the case; a narrative reviewing important information about the company and its environment, leading to the problem to be investigated; a series of questions guiding the draft of a structured solution; a detailed solution outlining the main strategic recommendations. Based on real issues and written in collaboration with the companies, the 10 field-based case studies allow applying marketing principles, theories and models: segmentation, positioning, marketing plan, as well as designing strategies at the product, price, place and promotion levels. Learning by doing, applied to marketing!"

In November and December 1967, Dr. Martin Luther King, Jr., delivered five lectures for the renowned Massey Lecture Series of the Canadian Broadcasting Corporation. The collection was immediately released as a book under the title Conscience for Change, but after King ' s assassination in 1968, it was republished as The Trumpet of Conscience. The collection sums up his lasting creed and is his final testament on racism, poverty, and war. Each oration in this volume encompasses a distinct theme and speaks prophetically to today ' s perils, addressing issues of equality, conscience and war, the mobilization of young people, and nonviolence. Collectively, they reveal some of King ' s most introspective reflections and final impressions of the movement while illustrating how he never lost sight of our shared goals for justice. The book concludes with " A Christmas Sermon on Peace " —a powerful lecture that was broadcast live from

Ebenezer Baptist Church on Christmas Eve in 1967. In it King articulates his long-term vision of nonviolence as a path to world peace.

Eat a take-out meal, buy a pair of shoes, or read a newspaper, and you ' re soon faced with a bewildering amount of garbage. The United States is the planet ' s number-one producer of trash. Each American throws out 4.5 pounds daily. But garbage is also a global problem. Today, the Pacific Ocean contains six times more plastic waste than zooplankton. How did we end up with this much rubbish, and where does it all go? Journalist and filmmaker Heather Rogers answers these questions by taking readers on a grisly and fascinating tour through the underworld of garbage. Gone Tomorrow excavates the history of rubbish handling from the nineteenth century to the present, pinpointing the roots of today ' s waste-addicted society. With a " lively authorial voice, " Rogers draws connections between modern industrial production, consumer culture, and our throwaway lifestyle (New York Press). She also investigates the politics of recycling and the export of trash to poor countries, while offering a potent argument for change. " A clear-thinking and peppery writer, Rogers presents a galvanizing expos é of how we became the planet ' s trash monsters. . . . [Gone Tomorrow] details everything that is

wrong with today ' s wasteful packaging, bogus recycling, and flawed landfills and incinerators. . . . Rogers exhibits black-belt precision. ” —Booklist, starred review

Protides of the Biological Fluids covers the proceedings of the 28th Meeting on Protides of the Biological Fluids held in 1980. This book mainly focuses on the evolution of proteins; the molecular biology of blood coagulation and fibrinolysis; and the hybridomas. In studying the evolution of proteins, this text looks into the evolutionary studies of immunoglobulin protein and nucleic acid sequences, fibrinogen, proteases, and other proteins. This book then explains molecular biology of blood coagulation and fibrinolysis by explaining the Hageman factor, kallikrein – kinin system, human high molecular weight, and other biological processes involved. The hybridomas and monoclonal antibodies are also tackled by specifically discussing the production of monoclonal antibodies; monoclonal antibody conformation; and monoclonal antibodies against molecules. This publication will be invaluable to students, practitioners, and researchers in the field of biology and physiology who are interested in studying protides.

From “ a major new talent ” come short stories set in modern Nepal, about arranged marriages, forbidden desires, and the universal yearning for human connection (Amitav Ghosh). Set in a city where gods are omnipresent, privacy is elusive, and family defines identity, these are stories of men and women caught between their own needs and the demands of their society and culture. Psychologically rich and astonishingly acute, with “ a masterful narrative style ” (Ian MacMillan), Arresting God in Kathmandu

introduces a potent new voice in contemporary fiction. “ Upadhyay brings to readers the flavor of Nepal and its culture in this impressive collection of nine short stories. Like Ha Jin ’ s *Bridegroom*, Upadhyay ’ s stories portray the lives of simple yet psychologically complex characters and reveal much about the universal human condition in us all. . . . Upadhyay ’ s stories leave the reader with much food for thought and will make a good choice for book discussion groups. ” —Library Journal

Applications of Liquid Scintillation Counting deals with liquid scintillation counting and its applications in fields such as the biosciences, medicine, environmental and space sciences, chemistry, and physics. These applications include dual-labeled counting; Cerenkov counting; radioimmunoassay, chemiluminescence and bioluminescence; pulse shape discrimination; flow cell counting; and large-volume counters. This book is comprised of 18 chapters and begins with a historical overview of the liquid scintillation method, the first liquid scintillation counters, and early scintillator solutes. The following chapters focus on the theory of liquid scintillation

counting; the components of the liquid scintillator solution; and the development of the liquid scintillation counter and multiplier phototubes. The discussion then turns to the detection and measurement of different types of particles produced by radionuclides using liquid scintillation techniques; the techniques and problems of sample preparations (homogeneous and heterogeneous); oxidation techniques; and importance and difference of several types of counting vials. The sources of quenching in counting samples and methods of monitoring and correction for variable quench within samples are also considered. Several special applications of liquid scintillation techniques are presented, including dual-labeled counting, radioimmunoassay, and flow cell counting. In conclusion, the statistical considerations involved in determining the reliability and accuracy of data obtained by nuclear counting techniques are highlighted. This monograph will serve as a reliable source of information for those who are already using or starting to use liquid scintillation counting techniques.
