When Kyle Tackwell Ball's search for a quaint country home near Florence, Italy, in move-in condition somehow led to the purchase of an abandoned church in a small borgo near Greve-in-Chianti called Le Convertioie, she ended up with much more than a project to overcome her newly contracted "empty nest syndrome." Ball soon found herself starring in a "Stones and Bones Classic"; the ruin she'd purchased would require years of renovation and an endless amount of money before it would become habitable. But her journey had unexpected rewards, too: she reconnected with some wonderful friends, made new ones, learned the language of her newly adopted home country, and became experienced in the Italian knack of getting around the

system. Most importantly, she learned to appreciate Italian culture, food and wine, and how rewarding it is to give new life to a beautiful old building. Ball's renovation was featured in the March 2010 "Before & After" issue of *Architectural Digest*, beautifully documented by Kim Sargent of *Sargent Architectural Photography*.

Surrealist Women displays the range and significance of women's contributions to surrealism. Penelope Rosemont, affiliated with the Paris Surrealist Group in the 1960s and now a Chicago poet and painter, has assembled nearly three hundred texts by ninety-six women from twenty-eight countries.

She opens the book with a succinct summary of surrealism's basic aims and principles, followed by a discussion of the place of gender in the origins of the movement. The texts are organised into historical periods ranging from the 1920s to the present, with introductions describing trends in the movement for each period; and each surrealist's work is prefaced by a brief biographical statement.

A forerunner of the modern highway system, the Long Island Motor Parkway was constructed during the advent of the automobile and at a pivotal time in American history. Following a spectator death during the 1906 Vanderbilt Cup Race, the concept for a privately owned speedway on Long Island was developed by William K. Vanderbilt Jr. and his business associates. It would be the first highway built exclusively for the automobile.

Vanderbilt's dream was to build a safe, smooth, police-free road without speed limits where he could conduct his beloved automobile races without spectators running onto the course. Features such as the use of reinforced concrete, bridges to eliminate grade crossings, banked curves, guardrails, and landscaping were all pioneered for the parkway. Reflecting its poor profitability and the availability of free state-built public parkways, the historic 48-mile Long Island Motor Parkway closed on Easter Sunday, April 17, 1938.

Tuscany is Il Piccolo Rustico, a 300-year-old stone farmhouse that Nancy Doran dreams of lovingly restoring into an idyllic home. All her husband Phil can see is a crumbling money pit that, as far as dreams go, is more of a nightmare. Reluctantly leaving behind high-octane, air-conditioned Los Angeles where he lives and works as a writer-producer, Phil is uprooted to a strange country intoxicated by O sole mio, virgin olive oil and oak-aged Chianti. The local village reveals itself to be a hive of seething passions, secrets and age-old blood feuds, and the newcomers find that life is not all strolls around town during the passeggiata and relaxing under the awnings of picturesque cafes. Beset by a rift of exasperating challenges - from the cunning tricks of the Pinatore family to an infuriating Byzantine Italian bureaucracy - it is only with an inspired touch of the 'Inner Italian' that Phil and Nancy finally manage to soften the hearts of their neighbours and are embraced by the community.

Migrant women stepping into ethnic catering; homeless men employed to take care of bees producing honey for sale; young people on the edge getting microcredit funding to start social businesses; or former criminals joining forces to create social and economic structures for an honest lifestyle. These initiatives capture the transformative power of social enterprise and might indicate how social enterprises have the potential to make a difference for people and societies. The Nordic countries represent an interesting case. Social enterprises and co-operatives played a significant part in paving the way for the Nordic solidaristic welfare state. As the welfare state grew, civil society organizations and co-operatives lost ground, to a certain extent. But in recent decades, the welfare state has been restructured and, simultaneously, the concepts social entrepreneurship and social enterprises have gained attention. The

Nordic context, with extensive public welfare structures and a high degree of citizens' participation in public affairs, might affect the emergence of social entrepreneurship and social enterprises.

A stunning four-color biography of Congresswoman Alexandria Ocasio-Cortez in the bestselling tradition of Notorious RBG and Pelosi that explores her explosive rise and impact on the future of American culture and politics. The candidate was young—twenty-eight years old, a child of Puerto Rico, the Bronx, and Yorktown Heights. She was working as a waitress and bartender. She was completely unknown, and taking on a ten-term incumbent in a city famous for protecting its political institutions. “Women like me aren't supposed to run for office,” Alexandria Ocasio-Cortez said in a video launching her campaign, the camera following her as she hastily pulled her hair into a bun. But she did. And in perhaps the most stunning upset in recent memory, she won. At twenty-nine, she was sworn in as the youngest member of the 116th Congress and

became the youngest woman to serve as a representative in United States history. Before long, Ocasio-Cortez had earned her own shorthand title—AOC—and was one of the most talked-about public figures (loved and loathed) in the world. Her natural ability to connect with everyday people through the social media feeds grew her following into the multimillions. Every statement she made, every tweet and Instagram Live, went viral, and her term had barely begun before people were speculating that she could one day be president. The question seemed to be on everyone's mind: How did this woman come from nowhere to acquire such influence, and so fast? Now, in *Take Up Space*, that question is answered through a kaleidoscopic biography by the editors of *New York* magazine that features the riveting account of her rise by Lisa Miller, an essay by Rebecca Traister that explains why she is an unprecedented figure in American politics, and multiform explorations (reportage, comic, history, analysis, photography) of AOC's outsize impact on American culture and politics. Throughout, AOC is revealed in all her power and vulnerability, and understood in the context of the fast-changing America that made her possible—and perhaps even inevitable.

American chef and author of *A Thousand Days in Venice* moves to rural Tuscany, where she and her husband discover village secrets of food, life, and love. Searching for the rhythms of country living, American chef Marlena de Blasi and her Venetian husband, Fernando, move to a barely renovated former stable in Tuscany. They dwell among two hundred villagers, ancient olive groves, and hot Etruscan springs. In this patch of earth where Tuscany, Umbria, and Lazio collide, there is much to feed de Blasi's two passions—food and love. In *A Thousand Days in Tuscany*, de Blasi brings us along as she and Fernando harvest grapes, gather chestnuts, forage for wild mushrooms, and climb trees in the cold of December to pick olives, one by one. They befriend the mesmeric Barlozzo, a self-styled village chieftain whose stories lead de Blasi deeper into the soul of Tuscany. Together they visit sacred festivals and taste just-pressed olive oil, drizzled over roasted country bread. In a cauldron set over a wood fire, they braise beans in red wine, and a stew of wild boar simmers overnight in the ashes of their hearth. Barlozzo shares his knowledge of Italian farming traditions and ancient health potions, but he has secrets he doesn't share, and one of them concerns the beautiful Floriana, whose illness teaches Marlena that happiness is truly a choice. Like the pleasurable tastes and textures of a fine meal, A

Dr. Tucker, in a follow-up to his book *Life Before*

Life, explores American cases of young children who report memories of previous lives in the New York Times bestseller, *Return to Life*. A first-person account of Jim Tucker's experiences with a number of extraordinary children with memories of past lives, *Return to Life* focuses mostly on American cases, presenting each family's story and describing his investigation. His goal is to determine what happened—what the child has said, how the parents have reacted, whether the child's statements match the life of a particular deceased person, and whether the child could have learned such information through normal means. Tucker has found cases that provide persuasive evidence that some children do, in fact, possess memories of previous lives. Among others, readers will meet a boy who describes a previous life on a small island. When Tucker takes him to that island, he finds that some details eerily match the boy's statements and some do not. Another boy points to a photograph from the 1930s and says he used to be one of the men in it. Once the laborious efforts to identify that man are successful, many of the child's numerous memories are found to match the details of his life. Soon after his second birthday, a third boy begins expressing memories of being a World War II pilot who is eventually identified. Thought-provoking and captivating, *Return to Life* urges its readers to think about life and death and reincarnation, and reflect about their own consciousness and spirituality.

Set in Appalachia, *Krampus the Yule Lord* is a twisted fairytale about a failed West Virginia songwriter who gets ensnared on Christmas Eve in an eternal war between a not-so-saintly Saint Nick and his dark enemy Krampus, aka Black Peter, an ancient trickster demon. *Krampus the Yule Lord* is Gregory Maguire (*Wicked*) meets Susanna Clarke (*Jonathan Strange & Mr. Norrell*) in the realm of Guillermo Del Toro's *Pan's Labyrinth*, as Clive Barker (*Mr. B. America's top-rated cable news host offers his first book in over ten years: a look at America's fight against those who would reverse our tradition of freedom. America is great for a reason. Built on principles of freedom, rugged individualism, and self-sufficiency, no country has ever accumulated more power and wealth, abused it less, or used that power more to advance the human condition. And yet, as America blossomed, leftwing radicalism and resentment festered beneath the surface, threatening to undermine democracy in the form of social justice warriors, the deep state, and compromised institutions like academia and the mainstream media. With the Democratic victory in 2020, we are now at risk for a big step toward full-blown socialism along with the economic dysfunction and social strife that are its hallmarks. With radical Democrats demanding the Green New Deal, socialized medicine, abortion on demand, open borders, abolishing the Electoral

College, packing the Supreme Court, and an end to free speech, our great nation will be fundamentally transformed beyond recognition. Ronald Reagan once said, "Freedom is but one generation away from extinction," and his words have never rung truer. In *Live Free or Die*, Sean demonstrates why now is an All Hands on Deck moment to save the Republic.

A remarkable debut by one of America's premier young reporters on financial corruption, Casey Michel's *American Kleptocracy* offers an explosive investigation into how the United States of America built the largest illicit offshore finance system the world has ever known. "An indefatigable young American journalist who has virtually cornered the international kleptocracy beat on the US end of the black aquifer." —The Los Angeles Review of Books For years, one country has acted as the greatest offshore haven in the world, attracting hundreds of billions of dollars in illicit finance tied directly to corrupt regimes, extremist networks, and the worst the world has to offer. But it hasn't been the sand-splattered Caribbean islands, or even traditional financial secrecy havens like Switzerland or Panama, that have come to dominate the offshoring world. Instead, the country profiting the most also happens to be the one that still claims to be the moral leader of the free world, and the one that claims to be leading the fight against the crooked and the corrupt: the USA. *American Kleptocracy* examines just how the United States' implosion into a center of global offshoring took place: how states like Delaware and Nevada perfected the art of the anonymous shell company, and how post-9/11 reformers watched their success usher in a new flood of illicit finance directly into the U.S.; how African despots and post-Soviet oligarchs came to dominate American coastlines, American industries, and entire cities and small towns across the American Midwest; how Nazi-era lobbyists birthed an entire industry of spin-men whitewashing trans-national crooks and despots,

and how dirty money has now begun infiltrating America's universities and think tanks and cultural centers; and how those on the front-line are trying to restore America's legacy of anti-corruption leadership—and finally end this reign of American kleptocracy.

Life Skills, Grade 2 Harper Collins

In the United States at the height of the Cold War, roughly between the end of World War II and the early 1980s, a new project of redefining rationality commanded the attention of sharp minds, powerful politicians, wealthy foundations, and top military brass. Its home was the human sciences—psychology, sociology, political science, and economics, among others—and its participants enlisted in an intellectual campaign to figure out what rationality should mean and how it could be deployed. *How Reason Almost Lost Its Mind* brings to life the people—Herbert Simon, Oskar Morgenstern, Herman Kahn, Anatol Rapoport, Thomas Schelling, and many others—and places, including the RAND Corporation, the Center for Advanced Study in the Behavioral Sciences, the Cowles Commission for Research and Economics, and the Council on Foreign Relations, that played a key role in putting forth a “ Cold War rationality. ”

Decision makers harnessed this picture of rationality—optimizing, formal, algorithmic, and mechanical—in their quest to understand phenomena as diverse as economic transactions, biological evolution, political elections, international relations, and military strategy. The authors chronicle and illuminate what it meant to be rational in the age of nuclear brinkmanship.
