This book challenges the adult-centric tendencies of migration research and policy which often overlooks children and young people's own experiences of migration. A wide range of international contributors provide careful analysis of the situations of children in contemporary transnational migratory contexts in the Global North and South. Drawing on studies with migrant children and young people in a variety of situations, Transnational Migration and Childhood makes a unique contribution to furthering our understandings of transnational childhoods. It explores the laws and policies that govern children and young people's experiences of transnational migration whilst foregrounding their own accounts of migration and transnationalism. The book shifts our attention away from dominant discourses of migrant children as 'victims', towards the development of broader conceptualisations of transnational migration and childhood. It incorporates different migratory flows, a variety of sending and receiving contexts, and child-centred perspectives. Transnational Migration and Childhood will be of interest to researchers and policy makers working in the fields of migration, asylum, and childhood at local, national, and transnational scales. This book was originally published as a special issue of the Journal of Ethnic and Migration Studies.

A shorter, simpler first draft of the Gospel of Mark has been theorized by New Testament scholars for almost two hundred years. Using literary tools, David Oliver Smith strips away interpolation and redaction from the canonical Gospel to reveal that long-sought first draft--the Original Gospel of Mark. Original Mark, shorter than the canonical version and with several large blocks of text replaced in their original locations, reveals a coherent structure and a different picture of who Jesus is. But it is anything other than simple. The Original Gospel also presents puzzles for the curious reader of Mark to solve, and Smith has found the keys to their solution. Analysis of the text that was interpolated into Mark reveals who that redactor might have been. Evidence is presented that it was the author of the Gospel of Luke who redacted the first-written Gospel, jumbled its structure, and changed its Christology. Follow the analysis of literary structures created by the genius who wrote Mark's Gospel and discover the astounding design of the Original Gospel of Mark.

But no sooner is their ship out to sea than devilry begins to blight the voyage. A strange symbol appears on the sail. A dead leper stalks the decks. Livestock dies in the night. And then the passengers hear a terrible voice, whispering to them in the darkness, promising three unholy miracles, followed by a slaughter. First an impossible pursuit. Second an impossible theft. And third an impossible murder. Could a demon be responsible for their misfortunes? With Pipp's imprisoned, only Arent and Sara can solve a mystery that stretches back into their past and now threatens to sink the ship, killing everybody on board. This work seeks to explore the widely held assumption that the discipline of International Relations is dominated by American scholars, approaches and institutions. It proceeds by defining 'dominance' along Gramscian lines and then identifying different ways in which such dominance could be exerted: agenda-setting, theoretically, methodologically, institutionally, gate-keeping. Turton dedicates a chapter to each of these forms of dominance in which she sets out the arguments in the literature, discusses their theoretical implications, and tests for empirical support. The work argues that the self-image of IR as an American dominated discipline does not reflect the state of affairs once a detailed sociological analysis of the production of knowledge in the discipline is undertaken. Turton argues that the discipline is actually more plural than widely recognized, challenging widely held beliefs in International

Relations and it taking a successful step towards unpacking the term 'dominance'. An insightful contribution to the field, this work will be of great interest to students and scholars alike.

Traditionally child sexual abuse has been perceived as a male crime, however, recent research suggests that a significant minority of offenders are female. While recognizing the importance of male perpetrators, this groundbreaking book places the behavior of these offending women into social context, challenging conventional perceptions of female offenders, femininity, and mothering. Including case studies and responses from professionals in the field, this key text highlights the problems inherent in protecting children and identifies ways in which we can develop a clearer understanding of the social processes involved through an analysis of the denial and minimisation used by female perpetrators. It offers a critical understanding of the notions of harm, the rights of the child, and professional practice while defining some of the limitations and possibilities of a feminist analysis of child sexual abuse by women.

International Relations and American Dominance Amsterdam University Press This international collection of essays offers a unique approach to the understanding of imperial Ethiopia, out of which the present state was created by the 1974 revolution. After the 1880s, Abyssinia, under Menilek II, expanded its ancient heartland to incorporate vast new territories to the south. Here, for the first time, these regions are treated as an integral part of the empire. The book opens with an interpretation of nineteenth-century Abyssinia as an African political economy, rather than as a variant on European feudalism, and with an account of the north's impact on peoples of the new south. Case studies from the southern regions follow four by historians and four by anthropologists, each examining aspects of the relationship between imperial rule and local society. In revealing the region's diversity and the relationship of the periphery to the centre, the volume illuminates some of the problems faced by post-revolutionary Ethiopia.
