The majority of professors have never had a formal course in education, and the most common method for learning how to teach is on-the-job training. This represents a challenge for disciplines with ever more complex subject matter, and a lost opportunity when new active learning approaches to education are yielding dramatic improvements in student

learning and retention. This book aims to cover all aspects of teaching engineering and other technical subjects. It presents both practical matters and educational theories in a format useful for both new and experienced teachers. It is organized to start with specific, practical teaching applications and then leads to psychological and educational theories. The "practical orientation" section explains how to develop objectives and then use them to enhance student learning, and the "theoretical orientation" section discusses the theoretical basis for learning/teaching and its impact on students. Written mainly for PhD students and professors in all areas of engineering, the book may be used as a text for graduate-level classes and professional workshops or by professionals who wish to read it on their own. Although the focus is engineering education, most of this book will be useful to teachers in other disciplines. Teaching is a complex human activity, so it is impossible to develop a formula that guarantees it will be excellent. However, the methods in this book will help all professors become good teachers while spending less time preparing for the classroom. This is a new edition of the well-received volume published by McGraw-Hill in 1993. It includes an entirely revised section on the Accreditation Board for Engineering and Technology (ABET) and new sections on the characteristics of great teachers, different active learning methods, the application of technology in

the classroom (from clickers to intelligent tutorial systems), and how people learn.

Confined to a wheelchair, retired historian Lyman Ward sets out to write his grandparents' remarkable story, chronicling their days spent carving civilization into the surface of America's western frontier. But his research reveals even more about his own life than he's willing to admit. What emerges is an enthralling portrait of four generations in the life of an American family. "Cause for celebration . . . A superb novel with an amplitude of scale and richness of detail altogether uncommon in contemporary fiction."

Some people need love... I need sex, money, control, and

power. Anyone could have those four things, but only one could have VIP. Becoming Madam was never a choice for me, it was a mandated order from the most powerful woman I knew—my mother. I was born to fill her shoes, never to make mistakes, or to show weakness. You are the product of your environment. They say the apple doesn't fall far from the tree; you learn from what you see, not from what you're told. Nature vs. Nurture. I learned from it all; what I saw, what I didn't see, what I was told, and from reading between the lines. I was raised with the belief that the world spun ONLY because of me. I held power as far back as I can remember, saw things no one ever talks

about, and witnessed illegal acts of sex, drugs, and money by the time I was eighteen. You saw a glimpse of me in VIP, now see it from the beginning. Enter my world where anything goes; no judgments, no remorse, no guilt. You play by my rules, or you don't play at all. There are no limits to what I can do, or to what I can show you...I will ensure my legacy by any means necessary. My name is Lilith Veronica Stone, and I am The Madam.

Following Me Harper
Collins

The nationally
bestselling author

of the Ten Tiny Breaths series and Burying Water—which Kirkus Reviews called up the mess made “a sexy, romantic, gangster-tinged page-turner”—returns with a new novel packed with romance, plot twists, and psychological suspense. Ivy Lee, a talented tattoo artist who spent the early part of her twenties on the move, is looking for a place to call home. She thinks she might have finally found it working in her uncle’s tattoo shop in San Francisco. But all that changes when a robbery turns deadly, compelling her to pack up her things yet again. When they need the best, they call him.

That’s why Sebastian Riker is back in California, cleaning up the mess made after a tattoo shop owner who resorted to blackmail and got himself shot. But it’s impossible to get the answers he needs from a dead body, leaving him to look elsewhere. Namely, to the twenty-something-year-old niece who believes this was a random attack. Who needs to keep believing that until Sebastian finds what he’s searching for. Ivy has one foot out of San Francisco when a chance encounter with a stranger stalls her departure. She’s always been drawn to intense men, so it’s no wonder that she

now finds a reason to stay after all, quickly intoxicated by his dark smile, his intimidating strength, and his quiet control. That is, until Ivy discovers that their encounter was no accident—and that their attraction could be her undoing.
