Working with progressive conceptual categories relating to indigenous property, cultural identity, the right to an adequate standard of living and healthcare, the Inter-American Court of Human Rights continues to build a justiciability to determine the

social rights of marginalised individuals and groups in the Americas. In a context of interpretative tensions of the social rights as political goals and direct effects provisions, Isaac de Paz González unveils the abilities, and the practices of the Inter-American Court's contribution to the human rights practice in the Global South.

Human rights have a rich life in the world around us. Political rhetoric pays tribute to them, or scorns them. Citizens and activists strive for them. The law enshrines them. And they live inside us too. For many of us, human rights form part of how we understand the world and what must

(or must not) be done within it. The ubiquity of human rights raises questions for the philosopher. If we want to understand these rights, where do we look? As a set of moral norms, it is tempting to think they can be grasped strictly from the armchair, say, by appeal to moral intuition. But what, if anything, can that

kind of inquiry tell us about the human rights of contemporary politics, law, and civil society – that is, human rights as we ordinarily know them? This volume brings together a distinguished, interdisciplinary group of scholars to address philosophical questions raised by the many facets of human rights: moral, legal, political, and historical. Its original chapters, each accompanied by a critical commentary, explore topics including: the purpose and methods of a philosophical theory of human rights; the "Orthodox-Political" debate; the relevance of history to philosophy; the relationship between human rights morality and law; and the value of political critiques of human rights.

EU Consumer Law and Human Rights Oxford University Press, USA
This book offers a stimulating introduction to the links between areas of global governance, human rights global economy and international law. By drawing on a range of diverse subject

areas, Errol P. Mendes argues that the foundations of global governance, human rights and international law are undermined by a conflict or 'tragic flaw', where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self-interest for both the state and the global community. The book explores how human rights and international law are applied in some of the critical institutions of global governance and in the operations of the global private sector, and how States, institutions and global civil society struggle to fight this 'tragic flaw'. The book is brought up to date by considering developments in the role of the IMF, the World Bank, bilateral investment treaties; the likely failure of the Doha round of WTO negotiations; the legacy of the 2008 financial crisis; and the role of the International Criminal Court and the evolving Responsibility to Protect doctrine in international peace and security crises in the Middle East, Central and West

Africa among other regions of the world. With its intensely interdisciplinary approach, this book motivates new thinking in the realm of global governance and international law, and promotes the development of new strategies for negotiating between conflicting leadership and organisational values within global institutions. The book will be of great interest and use to students and researchers of public international law, international relations and political science, business and human rights, global governance and international trade and economic law. *Human Rights in Scotland* Psychology Press

The Mortgage (Rights) Scotland Act 2001 alters the law relating to property repossessions in Scotland. It gives the courts a discretionary power to refuse repossession orders where a secured lender wishes to recover property. This book gives an account of this legislation and its likely impact

Traditionally, consumer law has

played an instrumental role in the EU as a tool for market integration. There are now signs in the new legal framework and jurisprudence that this may be changing. The Lisbon Treaty contains provisions affecting consumer law and, at the same time, it grants binding legal force to the EU Charter, which in turn adds a fundamental rights dimension to consumer protection. This evolution, however, is still at an early stage and may be thwarted by conflicting trends. Moreover, it may generate tensions between social objectives and economic goals. This book provides the first comprehensive analysis of these developments and examines new avenues that may be opening for consumer law, focusing on three key areas: financial services, electronic communication and access to justice. Through a systematic analysis of relevant cases, the book traces the development of a human rights dimension in consumer law and details the ramifications that the post-Lisbon legal framework may have on consumer protection and policy. This book concludes by proposing new directions in consumer law, striking a compromise between social and economic demands.

This volume reflects the findings of a conference organized in preparation of setting up a national human rights commission and ombudsman institution in the Federal Democratic Republic of Ethiopia. The meeting assembled experts in the field of the protection and promotion of human rights, and of the problems of countries

in transition from a non-democratic system, characterized by gross violations of human rights, towards a democratic system based on the rule of law and respect for human rights. The book analyses the functioning of national human rights commissions and ombudsman institutions in 23 different countries, by means of country report written in the

main by members of these institutions themselves and containing an assessment of their experience. Many offer relevant constitutional and legislative provisions as well. This volume thus forms a unique collection of materials dealing with national human rights commissions and ombudsman offices.

This reference work reflects the growing international concern over human rights. It provides explanations of the terminology, issues, organizations and laws surrounding this emotive subject
Business and Human Rights Routledge

Today the majority of the armed conflicts around the world are fought between States and armed groups, rather than between States.

This changed conflict landscape creates an imperative to clarify the obligations of armed groups under international law. While it is generally accepted

that armed groups are bound by international humanitarian law, the question of whether they are also bound by human rights law is controversial. This book brings significant new understanding to the question of whether and when armed groups might be bound by human rights law. Its conclusions will

benefit international law academics, legal practitioners, and political scientists and anthropologists working on issues related to rebel governance and civil wars. This book addresses the debate on this topic by employing a theoretical, historical, and comparative analysis that spans

international humanitarian law, international criminal law, and international human rights law. Embedding these different perspectives in public international law, this book brings several key points of clarification to the legal framework. Firstly, the book draws upon social science

literature on armed conflict to present a new viewpoint on the role that human rights law plays vis-à-vis international humanitarian law in non-international armed conflicts. Secondly, the book sheds light on the circumstances in which armed groups acquire obligations under human rights law. It brings illumination to

these topics by combining historical and comparative research on belligerency, insurgency, and international humanitarian law with a theoretical analysis of legal personality under international law. In the final part of the book, the author tests the four most utilised theories of how

armed groups are bound by human rights law, examining whether armed groups can be bound by virtue of (i) treaty law (ii) control of territory (iii) international criminal law and (iv) customary international law. In the book's conclusions, the author presents final remarks that are designed to

provide concrete guidance on how the issue of armed groups and human rights law can be dealt with more thoroughly in practice. *Human Rights, the Rule of Law, and Development in Africa* Hart Publishing This volume constitutes a commentary on Articles 43-45 of the United Nations Convention on the Rights of the Child.

It is part of the series, "A Commentary on the United Nations Convention on the Rights of the Child," which provides an article by article analysis of all substantive, organizational and procedural provisions of the CRC and its two Optional Protocols. For every article, a comparison with related human rights provisions is made, followed by an in-depth exploration of the nature and scope of State obligations deriving from that article. The series constitutes an essential tool for actors in the field of children's rights, including academics, students, judges, grassroots workers, governmental, non-governmental and international officers. Written by psychologists, historians, and lawyers, this handbook demonstrates the central role psychological science plays in addressing some of the world's most

pressing problems. Over 100 experts from around the world work together to supply an integrated history of human rights and psychological science using a rights and strengths-based perspective. It highlights what psychologists have done to promote human rights and what continues to be done at the

United Nations. With emerging visions for the future uses of psychological theory, education, evidence-based research, and best practices, the chapters offer advice on how to advance the 2030 Global Agenda on Sustainable Development.
