This is the definitive history of the sport that has exhilarated and infatuated about 30 million Americans and Canadians over the course of the last fifty years. Consummate insider John Fry chronicles the rise of a ski culture and every aspect of the sport's development, including the emergence of the mega-resort and advances in equipment, technique, instruction, and competition. The Story of Modern Skiing is laced with revelations from the author's

personal relationships with skiing greats such as triple Olympic gold medalists Toni Sailer and Jean-Claude Killy, double gold medalist and environmental champion Andrea Mead Lawrence, first women's World Cup winner Nancy Greene, World Alpine champion Billy Kidd, Sarajevo gold and silver medalists Phil and Steve Mahre, and industry pioneers such as Vail founder Pete Seibert, metal ski designer Howard Head, and plastic boot inventor Bob Lange. There is something extraordinarily special about sliding on snow that has excited generations of snow sports enthusiasts. Add to this the dimension of travelling through the mountains and the result is a recipe for some of the best outdoor activity days you could ever imagine. I have been fortunate to share some of these adventures with Henry Branigan: Skiing off the summit of Mount Blanc at dawn or, equally enjoyable, skiing under the northern lights from hut to hut in Norway, still my all-time favourite way of travelling through the mountains. A complete guide to alpine ski touring, ski mountaineering and nordic ski touring sets out to provide the fundamentals about going off piste and then journeying through mountain terrain, in a logical, easy to read format. Adapting ski technique for various off piste

conditions is an essential skill that makes all the difference between surviving and savouring adventures off piste. The book also covers the fundamental mountaineering knowledge including navigation, weather and avalanches that are essential before venturing beyond the confines of a ski area.

Equipment and planning a tour are covered, whether it is in an Alpine or Nordic environment. All in all this is a very comprehensive and valuable resource for anyone aspiring to venture into the mountains on skis. People have been skiing and no doubt teaching others to do the same for thousands of years. The earliest evidence for it is a picture on the wall of a cave in Norway that was drawn sometime around 4500 BC. Skiing is something that we do. It is a behavior. Teaching others to ski is also something that we do. It, too,

is a behavior. Pavlov and his dog helped to demonstrate that behavior is lawful and orderly. Various forms of conditioning as well as reinforcement, generalization, discrimination, punishment, and extinction change behavior. But why do we ski and teach others to do the same? These behaviors can also be accounted for, but no one has done it until now. Develop a better understanding of why we ski and become a better skier or ski instructor in the process. You'll gain a greater appreciation of the sport once you discover *Its About Skiing and Not the Skis*.

Thirty years ago a frustrated physicist from Seattle named Ron Gregg was retreating from an aborted attempt at a new alpine style route on Denali. His

partner had been evacuated by helicopter, but Ron chose to ski back to the highway solo. In the process, Ron found a new direction in life. At that time, outdoor gear left much to be desired. Many of the best climbers and alpinists designed their own equipment out of necessity. They fashioned climbing harnesses, backpacks and entire kits in basements and garages. Nobody cared what the gear looked like. For a mountaineer with a penchant for design, the 70s and 80s were an era of extreme entrepreneurial opportunity and epic adventure. Designed by *Adventure: 30 Years of Outdoor Research* follows Ron Gregg's seminal early years as he bootstraps what would become an iconic company known for relentless commitment to functionality and durability. His intense passion for making better products in his own factory establishes *Outdoor Research* as an outdoor industry

leader, yet Ron ' s devotion to his Seattle factory eventually imperils the company as globalization changes the game. His sudden and tragic death in the mountains of British Columbia creates a crisis as his family and the management team struggle to find a solution to keep the company going. Ultimately a new team comes together to build on Ron ' s legacy and principles, building Outdoor Research into one of the fastest growing companies in its industry.
