[U.S. Experimental & Prototype Aircraft
Projects: Fighters ...](#)

The case for U.S. built flying wing disc aircraft (aka flying saucers) begins with an unprecedented true account by a retired WWII combat veteran and publisher, herein referred to as "Jack". During the 1960's, and on into 1972, Jack and his business associate Harold published for the Air Force certain house-organ magazines (club-calendar-events) for NCO and Officer's Club facilities for several military bases in Florida.

US Saucers

The Vought XF5U "Flying Flapjack" was an
experimental U.S. Navy fighter aircraft
designed by Charles H. Zimmerman for
Vought during World War II. This unorthodox
design consisted of a flat, somewhat disc-shaped
body (hence its name) serving as the lifting
surface. Two piston engines buried in the body
drove propellers located on the leading edge at
the wingtips.

WW2 U.S. X-planes (1941-1945) - Military
Factory

The story of how the US military and the
American aviation industry turned this

situation around is the focus of Bill Norton ' s U.S. Experimental & Prototype Aircraft Projects: Fighters 1939-1945. It is hard to appreciate today how much progress had to be compressed into a few years in the 1940s, and how many different aircraft types, for many diverse roles, were created or at least proposed.
