The Civil War changed the United States in many ways--economic, political, and social. Of these changes, none was more important than Emancipation. Besides freeing nearly four million slaves, it brought agricultural wage labor to a reluctant South and gave a vote to black adult males in the former slave states. It also offered former slaves new opportunities in education, property ownership--and military service. From late 1862 to the spring of 1865, as the Civil War raged on, the federal government accepted more than 180,000 black men as soldiers, something it had never done before on such a scale. Known collectively as the United States Colored Troops and organized in segregated regiments led by white officers, some of these soldiers guarded army posts along major rivers; others fought Confederate raiders to protect Union supply trains, and still others took part in major operations like the Siege of Petersburg and the Battle of Nashville. After the war, many of the black regiments took up posts in the former Confederacy to enforce federal Reconstruction policy. **Freedom by the Sword** tells the story of these soldiers' recruitment, organization, and service. Thanks to its broad focus on every theater of the war and its concentration on what black soldiers actually contributed to Union victory, this volume stands alone among histories of the U.S. Colored Troops.

This accessible, hands-on text not only introduces students to the important topics in historical linguistics but also shows them how to apply the methods described and how to think about the issues; abundant examples and exercises allow students to focus on how to do historical linguistics. Distinctive to this text is its integration of the standard topics with others now considered important to the field, including syntactic change, grammaticalization, sociolinguistic contributions to linguistic change, distant genetic relationships, areal linguistics, and linguistic prehistory. Examples are taken from a broad range of languages; those from the more familiar English, French, German, and Spanish make the topics more accessible, while those from non-Indo-European languages show the depth and range of the concepts they illustrate. This second edition features expanded explanations and

examples as well as updates in light of recent work in linguistics, including a defense of the family tree model, a response to recent claims on lexical diffusion/frequency, and a section on why languages diversify and spread.

Ezekiel 25-32 contains some of the most virulent speeches directed against the neighboring nations of Judah. Assuming the opposing statuses between the nations and Judah, some emphasize that the destruction of the nations in chapters 25-32 means the upcoming salvation of God's people. Presupposing the nations as judged according to a separate standard of morality, others render the judgment executed upon the nations irrelevant to that upon Judah. Are these then the only two readings of Ezekiel's oracles against the nations? In this study, Lydia Lee postulates a third way to perceive the

rhetorical roles of the nations in Ezek 25-32. Unravelling the intricate connections between the oracles against the nations and those against Judah, Lee argues that Ezek 25-32 contains a daring message directed not only against the foreign nations, but also against Judah's land, temple, and nation. In the end, Lee places Ezek 25-32 in a broader context, considering how samples of its early reception within the prophetic book affirm or transform the bleak message about the oblique judgment for the house of Judah.
