Common Ground Univ of California Press

This groundbreaking survey of significant work and ideas focuses on imagemakers who have pushed beyond the boundaries of photography as a window on our material world. Through interviews with more than 40 key artists, this book explores a diverse group of curious experimentalists who have propelled the medium's evolution by visualizing their subject matter as it originates from their mind's eye. Many favor the historical techniques commonly known as alternative photographic processes, but all these makers demonstrate that the real alternative is found in their mental approach and not

in their use of physical methods.

Within this context, photographer and photography historian Robert Hirsch outlines the varied approaches these artists have utilized to question conventional photographic practices, to convey internal realities, and to examine what constitutes photographic reality.

Hirsch explores the half-century evolution of these concepts and methodologies and their popularity among contemporary imagemakers who are merging digital and analog processes to express what was thought to be photographically inexpressible.

This collection of essays and photographs, originally published as a special issue of California History, the journal of the California Historical Society, documents the creation and management of California's first three national parks, focusing on the debate over preservation versus development. As the authors of these essays remind us, tourists visited Yosemite long before its establishment as a national park; and the issues of park development so hotly debated today were raised and debated first in Yosemite,

nearly a hundred years ago. See U of Minnesota Press  
**The Encyclopedia of Twentieth-Century Photography** explores the vast international scope of twentieth-century photography and explains that history with a wide-ranging, interdisciplinary manner. This unique approach covers the aesthetic history of photography as an evolving art and documentary form, while also recognizing it as a developing technology and cultural force. This Encyclopedia presents the important developments, movements, photographers, photographic institutions, and theoretical aspects of the field along with information about equipment, techniques, and practical applications of photography. To bring this

Dramatic advances in

genetics, cloning, robotics, and nanotechnology have given rise to both hopes and fears about how technology might transform humanity.

As the possibility of a posthuman future becomes increasingly likely, debates about how to interpret or shape this future abound. In Japan, anime and manga artists have for decades been imagining the contours of posthumanity, creating dazzling and sometimes disturbing works of art that envision a variety of human/nonhuman hybrids: biological/mechanical, human/animal, and human/monster. Anime

---

and manga offer a constellation of posthuman prototypes whose hybrid natures require a shift in our perception of what it means to be human. Limits of the Human—the third volume in the Mechademia series—maps the terrain of posthumanity using manga and anime as guides and signposts to understand how to think about humanity's new potentialities and limits. Through a wide range of texts—the folklore-inspired monsters that populate Mizuki Shigeru's manga; Japan's Gothic Lolita subculture; Tezuka Osamu's original cyborg hero, Atom, and his manga version of Fritz Lang's Metropolis (along with Ôtomo Katsuhiro's 2001 anime film adaptation); the robot anime, Gundam; and the notion of the uncanny in

Ghost in the Shell 2: Innocence, among others—the essays in this volume reject simple human/nonhuman dichotomies and instead encourage a provocative rethinking of the definitions of humanity along entirely unexpected frontiers. Designers, photographers, and artists use Photoshop to create fantastic and realistic images for illustrations, fine art, and editorial content. Whether they're landscape or portrait photographers, illustrators or fine artists, masking and compositing are essential skills to master for combining images to the extent that it is impossible to tell where one image stops and the other one begins. In this completely revised edition of her best-

selling guide to masking and compositing, Photoshop artist and educator Katrin Eismann--along with compositing experts Sean Duggan and James Porto--takes readers through numerous step-by-step examples, highlighting the tools and techniques used for masking and combining images. Featuring work by leading artists and photographers, this book focuses on the techniques used to create compelling compositions, including making fast and accurate selections, mastering Photoshop's masking tools, and implementing the concept and photography from start to finish. The book addresses working with Photoshop's selection tools; selecting and maintaining fine details and edges; and working with difficult image elements, such as cloth, hair, or translucent objects. All-new photographic

See the images and read the stories behind the creative process of one of America's most respected landscape photographers, William Neill. For more than two decades, William Neill has been offering his thoughts and insights about photography and the beauty of nature in essays that cover the techniques, business, and spirit of his photographic life.

Curated and collected here for the first time, and accompanying 128 beautiful reproductions of Neill's photographs, these essays are both pragmatic and profound, offering readers an intimate look behind the scenes at Neill's creative process behind individual photographs as well as a discussion of the larger and more foundational topics that are key to his philosophy and approach to work.

Ansel Adams' Examples: The Making of 40 Photographs and Galen Rowell's Mountain Light: In Search of the Dynamic Landscape, Light on the Landscape covers in detail the core photographic fundamentals such as light, composition, camera angle, and exposure choices, but it also deftly considers those subjects that are less frequently examined: portfolio development, marketing, printmaking, nature stewardship, inspiration, preparation, self-improvement, and more. The result is a profound and wide-ranging exploration of that magical convergence of light, land, and camera. Filled with beautiful and inspiring photographs, Light on the Landscape is also full of the kind of wisdom that only comes from a deeply thoughtful photographer who has spent a lifetime communicating with a camera. Incorporating the lessons within the book, you too can learn to achieve not only technically excellent and beautiful images, but photographs that truly rise above your best and reveal your deeply personal and creative perspective--your vision, your voice.

In the perennial best-seller *Art & Fear*, Ted Orland (with David Bayles) examined the obstacles that artists encounter each time they enter their studio and stand before a new blank canvas. Now, in *The View From The Studio Door*, Orland turns his attention to broader issues that stand to either side of that artistic moment of truth. In a text marked by grace, brevity and humor, Orland argues that when it comes to art making, theory and practice are always intertwined. There are

timeless philosophical questions (How do we make sense of the world?) that address the very nature of art making, as well as gritty real-world questions (Is there art after graduation?) that artists encounter the moment they 're off the starting blocks and producing work on a regular basis. Simply put, this is a book of practical philosophy. As a teacher and working artist himself, Orland brings authentic insight and encouragement to all those who face the challenge of making art in an uncertain world. The breadth of material covered is reflected in chapters that include *Making Sense of the World*, *Art & Society*, *The Education of the Artist*, *Surviving Graduation*, *Making Art That Matters*, *The Artistic Community*, and more. *The View From The Studio Door* is the perfect companion piece to *Art & Fear*, and will appeal to a similar (and already-established) audience of
