'Springbok' was a term used to describe the 200,000 white South African men who volunteered to serve during the Second World War. Volunteers developed bonds of comradeship, and rites of passage were expressed in the idiom of 'the front'. Without exception, volunteers nurtured hopes for some form of post-war 'social justice'. Neil Roos provides a fresh approach in considering comradeship and social justice ethnographically, as a way of focusing on ordinary Springboks' expectations and experiences during and after the war. As troops were demobilized, the contradictions of social justice in a colonial society were exposed. The majority of white veterans used the memory of service to stake their claim as white men who had served their country, and to negotiate a better position for themselves within the context of segregated colonial society. However, social justice amongst white veterans did not necessarily assume a racist character. A small group of radical white veterans invoked their war experience and traditions of anti-fascism to challenge the very precepts of racialized South African society. These veterans featured in the struggle against apartheid during the 1950s, and were especially prominent in the shift towards armed resistance to apartheid in 1961. Drawing heavily on the testimony of veterans, the book includes previously unreferenced documentary and visual material on the history of white servicemen, including official responses such as military intelligence reports on the political mood of serving soldiers, as well as material produced by veterans' organisations, such as the Springbok Legion, the War Veterans' Torch Commando and the Memorable Order of Tin Hats (MOTH). Roos offers a new framework for examining the social, cultural and political history of whites (and whiteness) in South Africa. The book will appeal to those interested in the elaboration of apartheid society and the types of acceptance and resistance that it engendered, and will also co

therapy.MR-angiography in the diagnosis of pulmonary embolism.Scintigraphy-ventilation/perfusion scanning and imaging of the embolus.- Clinical course and prognosis of acute pulmonary embolism.- The molecular mechanisms of inherited thrombophilia.
Marco Polo Was in China Routledge

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Conservation Biology in Sub-Saharan Africa NYU Press

Labour Beyond Cosatu is the fourth volume in the series *Taking Democracy Seriously* – a ground-breaking, textured and nuanced study on workers and democracy – which was established in the 1990s. The series looks at members of trade unions affiliated to the Congress of South African Trade Unions (Cosatu) and provides a rich database of trade union members and research conducted over the past twenty years. It is one of the very few such resources available to researchers anywhere in the world. *Labour Beyond Cosatu* paints a complex picture. The 12 chapters of the volume explore various rebellions and conflicts in the trade union sector, starting with the National Union of Mineworkers (NUM) and rivalries between Cosatu affiliates. Unpacking the conflicts between state-sector and private-sector workers, contributors look at the impact of generational and educational shifts, seen by some commentators as proof that Cosatu is now 'middle class'. The book also raises the issue of gender in the unions by usefully locating the controversy around charges levelled at Zwelinzima Vavi in 2013 in the larger context of serious problems in the gender politics within parts of Cosatu. Refuting the image of a union federation solidly committed to the ANC, *Labour Beyond Cosatu* presents evidence of a sharp decline in support for the ANC within Cosatu, and growing scepticism towards the Alliance. It shows that attempts to understand the labour movement in South Africa in the future will need to include research of smaller, independent unions and social movements. The volume's contributors make a major contribution to key debates on labour and democracy, providing new material that can potentially shift the discussion in important ways. This book will be of great value to students and researchers in Industrial Sociology, Political Studies, Industrial Psychology and Economics and Management.

Charting the debates and difficulties surrounding the formation of the unique and self-reliant Solomon Mahlangu Freedom College (SOMAFSCO), this study examines the curricula, philosophies, and experiences at this controversial institute. Describing student life, campus organizations, and political activities, the detailed research also follows the often-traumatized state of the exiled pupils.

An Intercultural Debate University of Michigan Press

Writing more than one hundred years ago, African American scholar W.E.B. Du Bois speculated that the great dilemma of the twentieth century would be the problem of "the color line." Nowhere was the dilemma of racial discrimination more entrenched-and more complex-than South Africa. Gordian Knot examines South Africa's freedom struggle in the years surrounding African decolonization, using the global apartheid debate to explore the way new nation-states changed the international community during the mid-twentieth century. At the highpoint of decolonization, South Africa's problems shaped a transnational conversation about nationhood. Arguments about racial justice, which crested as Europe relinquished imperial control of Africa and the Caribbean, elided a deeper contest over the meaning of sovereignty, territoriality, and development. Based on research in African, American, and European archives, Gordian Knot advances a bold new interpretation about African decolonization's relationship to American power. In so doing, it promises to shed light on U.S. foreign relations with the Third World and recast understandings of the fate of liberal internationalism after World War II.

BACOMET cannot be evaluated solely on the basis of its publications. It is important then that the reader, with only this volume on which to judge both the BACOMET activities and its major outcome to date,

should know some thing of what preceded this book's publication. For it is the story of how a group of educators, mainly tutors of student-teachers of mathematics, committed themselves to a continuing period of work and self-education. The concept of BACOMET developed during a series of meetings held in 1978-79 between the three editors, Bent Christiansen, Geoffrey Howson and Michael Otte, at which we expressed our concern about the contributions from mathematics education as a discipline to teacher education, both as we observed it and as we participated in it. The short time which was at the teacher-educator's disposal, allied to the limited knowledge and experience of the students on which one had to build, raised puzzling problems concerning priorities and emphases. The recognition that these problems were shared by educators from many different countries was matched by the fact that it would be fruitless to attempt to search for an internationally (or even nationally) acceptable solution to our problems. Different contexts and traditions rule this out.

The Spirit of Leadership Routledge

This book explores the global history of anti-apartheid and international solidarity with southern African freedom struggles from the 1960s. It examines the institutions, campaigns and ideological frameworks that defined the globalization of anti-apartheid, the ways in which the concept of solidarity was mediated by individuals, organizations and states, and considers the multiplicity of actors and interactions involved in generating and sustaining anti-apartheid around the world. It includes detailed accounts of key case studies from Europe, Asia, and Latin America, which illustrate the complex relationships between local and global agendas, as well as the diverse political cultures embodied in anti-apartheid. Taken together, these examples reveal the tensions and synergies, transnational webs and local contingencies that helped to create the sense of 'being global' that united worldwide anti-apartheid campaigns.

Labour in the Age of Insecurity Royal College of Physicians

This text is aimed at defining the current concepts that define trauma induced coagulopathy by critically analyzing the most up-to-date studies from a clinical and basic science perspective. It will serve as a reference source for any clinician interested in reviewing the pathophysiology, diagnosis, and management of the coagulopathic trauma patient, and the data that supports it. By meticulously describing the methodology of most traditional as well as state of the art coagulation assays the reader will have full understanding of the tests that are used to study trauma induced coagulopathy. The evolving use of blood products as well as recently introduced hemostatic medications are reviewed in detail. Trauma Induced Coagulopathy will also be a valuable source for quick reference to the clinician that is faced with specific clinical challenges when managing coagulopathy.

National Clinical Guideline for Diagnosis and Initial Management of Acute Stroke and Transient Ischaemic Attack (TIA) Ohio University Press
AN INSTANT NEW YORK TIMES BESTSELLER The "lively" (The New Yorker), "convincing" (Forbes), and "riveting pick-me-up we all need right now" (People) that proves humanity thrives in a crisis and that our innate kindness and cooperation have been the greatest factors in our long-term success as a species. If there is one belief that has united the left and the right, psychologists and philosophers, ancient thinkers and modern ones, it is the tacit assumption that humans are bad. It's a notion that drives newspaper headlines and guides the laws that shape our lives. From Machiavelli to Hobbes, Freud to Pinker, the roots of this belief have sunk deep into Western thought. Human beings, we're taught, are by nature selfish and governed primarily by self-interest. But what if it isn't true? International bestseller Rutger Bregman provides new perspective on the past 200,000 years of human history, setting out to prove that we are hardwired for kindness, geared toward cooperation rather than competition, and more inclined to trust rather than distrust one another. In fact this instinct has a firm evolutionary basis going back to the beginning of Homo sapiens. From the real-life Lord of the Flies to the solidarity in the aftermath of the Blitz, the hidden flaws in the Stanford prison experiment to the true story of twin brothers on opposite sides who helped Mandela end apartheid, Bregman shows us that believing in human generosity and collaboration isn't merely optimistic—it's realistic. Moreover, it has huge implications for how society functions. When we think the worst of people, it brings out the worst in our politics and economics. But if we believe in the reality of humanity's kindness and altruism, it will form the foundation for achieving true change in society, a case that Bregman makes convincingly with his signature wit, refreshing frankness, and memorable storytelling. "The Sapiens of 2020." —The Guardian "Humankind made me see humanity from a fresh perspective." —Yuval Noah Harari, author of the #1 bestseller *Sapiens* Longlisted for the 2021 Andrew Carnegie Medal for Excellence in Nonfiction One of the Washington Post's 50 Notable Nonfiction Works in 2020 Oral Tradition and Literacy Central European University Press
This collective work analyzes the ongoing conflict in Ukraine, providing a coherent picture of Ukraine and Eastern Europe in the period 2013 – 2020. Giving voice to different social groups, scholarly communities and agencies relevant to Ukraine's recent history, *The War in Ukraine's Donbas* goes beyond simplistic media interpretations that limit the analysis to Vladimir Putin and Russian aims to annex Ukraine. Instead, the authors identify the deeper roots linked to the autonomy and history of Donbas as a region. The contributions explore local society and traditions and the alienation from Ukraine caused by the events of Euromaidan, which saw the removal of the Donetsk-based president Viktor Yanukovich. Other chapters address the refugee crisis, the Minsk Accords in 2014 and the impact of the new president Volodymyr Zelensky and his efforts to bring the war to an end by negotiations among Russia, Ukraine, France, and Germany. The book concludes with four proposals for a durable peace in Donbas: territorial

power-sharing; the conversion of rebels into legitimate political parties; amnesty for all participants of the armed conflict; and a transitional period of several years until political institutions are fully re-established.

Origins, Contexts, and the Future Elsevier Health Sciences

In this book, you'll find the latest updates about the current use of anticoagulants in medical practice. This includes clinical pharmacotherapy, laboratory monitoring, and antidotes. You'll also find a special focus on heparin-induced thrombocytopenia, including various mechanisms and presentations. Finally, you'll find important details that will help you to understand what patients receiving anticoagulants know about these drugs and how to improve their quality of life.

Queer in Africa "O'Reilly Media, Inc."

This brilliant little book tells the story of the African National Congress (ANC) Youth League from its origins in the 1940s to the present and the controversies over Julius Malema and his influence in contemporary youth politics. Glaser analyzes the ideology and tactics of its founders, some of whom (notably Nelson Mandela and Oliver Tambo) later became iconic figures in South African history as well as inspirational figures such as A. P. Mda (father of author Zakes Mda) and Anton Lembede. It shows how the early Youth League gave birth not only to the modern ANC but also to its rival, the Pan Africanist Congress. Dormant for many years, the Youth League reemerged in the transition era under the leadership of Peter Mokaba — infused with the tradition of the militant youth politics of the 1980s.

Throughout its history the Youth League has tried to “ dynamize ” and criticize the ANC from within, while remaining devoted to the mother body and struggling to find a balance between loyalty and rebellion.
