The Turning Key Univ of California Press  
The third and fourth books of Cicero's  
Tusculan Disputations deal with the nature  
and management of human emotion: first  
grief, then the emotions in general. In lively  
and accessible style, Cicero presents the  
insights of Greek philosophers on the  
subject, reporting the views of Epicureans  
and Peripatetics and giving a detailed  
account of the Stoic position, which he  
himself favors for its close reasoning and  
moral earnestness. Both the specialist and  
the general reader will be fascinated by the  
Stoics' analysis of the causes of grief, their  
classification of emotions by genus and  
species, their lists of oddly named character  
flaws, and by the philosophical debate that  
develops over the utility of anger in politics

and war. Margaret Graver's elegant and  
idiomatic translation makes Cicero's work  
accessible not just to classicists but to anyone  
interested in ancient philosophy and  
psychotherapy or in the philosophy of  
emotion. The accompanying commentary  
explains the philosophical concepts discussed  
in the text and supplies many helpful  
parallels from Greek sources.

anthropology, ethnobiology, ethnomusicology, history, and cultural and literary study. The book divides cultural property into three types: Tangible, unique property like the Parthenon marbles; intangible property such as folktales, music, and folk remedies; and communal "representations," which have lead groups to censor both outsiders and insiders as cultural traitors.

In *The Representation of Business in English Literature*, five scholars of different periods of English literature produce original essays on how business and businesspeople have been portrayed by novelists, starting in the eighteenth century and continuing to the end of the twentieth century. The contributors to *Representation* help readers understand the partiality of the various writers and, in so doing, explore the issue of what determines public opinion about business. Arthur Pollard (1922-2001) was Professor Emeritus of English at the University of Hull in Hull, East Yorkshire, England. John Blundell is General

Director of the Institute of Economic Affairs, London. Please note: This title is available as an ebook for purchase on Amazon, Barnes and Noble, and iTunes.

Like my two other books about security and territorial issues in the U.S.-Japan relationship, *The Origins of the Bilateral Okinawa Problem: Okinawa in U.S.-Japan Relations, 1945-1952* and *The Return of the Amami Islands: The Reversion Movement and U.S.-Japan Relations*, 4 this is first and foremost a study on the "intra-alliance" dynamics in which one country, the United States, continued to occupy and administer islands that were recognized as Japanese territory but, for a number of reasons, the United States and its wartime allies felt necessary to continue to administer. The longer

---

this control continued, the more unnecessary it was seen by increasingly larger segments of the public and government of both countries due to the political erosion of the relationship caused by this friction. The question for policy makers and political leaders was finding the balance between security concerns, reversion demands, and national sentiment (in both countries), particularly as it related to the memory and sacrifices at Iwo Jima, in an effort to maintain friendly and cooperative relations. Eventually, the U.S. government agreed to Japanese requests to return the islands and this was done on 26 June 1968, a full four years prior to the even more problematic, but strategically important, Okinawa.

The egotism that fuels the desire for greatness has been associated exclusively with men, according to one feminist view; yet many women cannot suppress the need to strive for greatness. In this forceful and compelling book, Alison Booth traces through the novels, essays, and other writings of George Eliot and Virginia Woolf radically conflicting attitudes on the part of each toward the possibility of feminine greatness. Examining the achievements of Eliot and Woolf in their social contexts, she provides a challenging model of feminist historical criticism.

**A Hazard of New Fortunes** London J. Murray 1914.

The book, which takes place in late 19th century New York City, tells the story of Basil March, who finds himself in the middle of a dispute between his employer, a self-made millionaire named Dryfoos,

and his old German teacher, an advocate for workers' rights named Lindau. The main character of the novel, Basil March, provides the main perspective throughout the novel. He resides in Boston with his wife and children until he is persuaded by his idealistic friend Fulkerson to move to New York to help him start a new magazine, where the writers benefit in a primitive form of profit sharing. Considered by to be author's best work, the book is also considered to be the first novel to portray New York City. In this novel, Howells primarily deals with issues of post-war "Gilded Age" America, like labor disputes, the rise of the self-made millionaire, the growth of urban America, the influx of immigrants, and other industrial-era problems. Also, Howells here portrays a variety of people from different backgrounds. The book was well-received for its portrayal of social injustice. \_x000D\_ William Dean Howells (1837-1920) was an American realist author, literary critic, and playwright. He was the

first American author to bring a realist aesthetic to the literature of the United States. His stories of Boston upper crust life set in the 1850s are highly regarded among scholars of American fiction.

**Cicero on the Emotions** Greenfield, Ind. : W. Mitchell Printing Company

"Ten years in the making, this book is the sequel to Jared Taylor's seminal *Paved With Good Intentions*. In *White Identity*, Taylor systematically marshals the data to show that: People of all races pay lip service to the ideal of integration but generally prefer to remain apart. ; Study after scientific study suggests that racial identity is an inherent part of human nature. ; Diversity of race, language, religion, etc. is not a strength for America but a source of chronic tension and conflict. ; Non-whites--especially blacks and Hispanics but now even Asians--openly take pride in their race and put group interests ahead of those of the country as a whole. ; Only whites continue to believe that it is possible or even desirable to

transcend race and try to make the United States a nation in which race does not matter. Taylor argues that America must reassess dated assumptions, and that we need policies based on a realistic understanding of race, not on fantasies. Most provocatively, Taylor argues that whites must exercise the same rights as other groups--that they must be unafraid of considering their own legitimate interests. He concludes by warning whites that if they do not defend their interests they will be marginalized by groups that do not hesitate to assert themselves, numerically and culturally. The culmination of 25 years of writing about race, immigration, and America's future, this is Jared Taylor's best and most complete statement of why it is vitally important for whites to defend their legitimate group interests."--Amazon.com.

"They will melt like snowflakes in the sun," said one observer of nineteenth-century Irish emigrants to America. Not only did they not melt, they formed one of the most extensive and persistent ethnic subcultures in American history. Dennis Clark now offers an insightful analysis of the social means this group has used to perpetuate its distinctiveness amid the complexity of American urban life. Basing his study on family stories, oral interviews, organizational records, census data, radio scripts, and the recollections of revolutionaries and intellectuals, Clark offers an absorbing panorama that shows how identity, organization, communication, and leadership have combined to create the Irish-American tradition. In his pages we see gifted storytellers, tough dockworkers, scribbling editors, and colorful actresses playing their roles in the Irish-American saga. As Clark shows, the Irish have defended and extended their self-image by cultivating their ethnic identity through transmission of family memories and by correcting community portrayals of themselves in the press and theatre. They have strengthened their ethnic ties by mutual association in the labor force and professions and in response to social problems. And they have created a network of communications ranging from 150 years of Irish newspapers to America's longest-running ethnic radio show and a circuit of university teaching about Irish literature and history. From this framework of subcultural

---

activity has arisen a fascinating gallery of leadership that has expressed and symbolized the vitality of the Irish-American experience. Although Clark draws his primary material from Philadelphia, he relates it to other cities to show that even though Irish communities have differed they have shared common fundamentals of social development. His study constitutes a pathbreaking theoretical explanation of the dynamics of Irish-American life.

Every church congregation encounters  
challenging situations, some the same the  
world over, and others specific to each  
church. Richard Osmer here seeks to teach  
congregational leaders -- including, but not  
limited to, clergy -- the requisite knowledge  
and skills to meet such situations with  
sensitivity and creativity. Osmer develops a  
framework for practical theological  
interpretation in congregations by focusing  
on four key questions: What is going on in a  
given context? Why is this going on? What  
ought to be going on? and How might the  
leader shape the context to better embody  
Christian witness and mission? The book is  
unique in its attention to interdisciplinary  
issues and the ways that theological

reflection is grounded in the spirituality of  
leaders. Useful, accessible, and lively -- with  
lots of specific examples and case studies --  
Osmer's Practical Theology effectively  
equips congregational leaders to guide their  
communities with theological integrity.
