Universal Dictionary of the English Language Springer Knowledge-based systems, fully integrated with software, have become essential enablers for both science and commerce. But current software methodologies, tools and techniques are not robust or reliable enough for the demands of a constantly changing and evolving market, and many promising approaches have proved to be no more than case-oriented methods that are not fully automated. This book presents the proceedings of

the 17th international conference on New Trends in Intelligent Software Methodology, Tools and Techniques (SoMeT18) held in Granada, Spain, 26-28 September 2018. The SoMeT conferences provide a forum for the exchange of ideas and experience, foster new directions in software development methodologies and related tools and techniques, and focus on exploring innovations, controversies, and the current challenges facing the software engineering community. The 80 selected papers included here are divided into 13 chapters, and cover subjects as diverse as intelligent software systems; medical informatics and bioinformatics; artificial intelligence techniques; social learning software and

sentiment analysis; cognitive systems and neural analytics; and security, among other things. Offering a state-of-the-art overview of methodologies, tools and techniques, this book will be of interest to all those whose work involves the development or application of software.

This book discusses multilingual postcolonial common law, focusing on Malaysia ' s efforts to shift the language of law from English to Malay, and weighing the pros and cons of planned language shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack proficiency in the traditional legal medium. Through analysis of legislation and policy

documents, interviews with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes? This book focuses on writing strategies required

for theses and academic reports. It is intended for research students particularly those at the post-graduate level who are at the writing stage of their study. The book is structured into chapters according to the generic structure of a thesis and examples are taken from six PhD theses representing the areas of humanities, social sciences, and science and technology. Excerpts are extracted from each chapter of the sample theses in its attempt to provide authentic examples. Emphasis is given to the use of textual strategies in writing the chapters based on the communicative purposes of each chapter.

UNISCON 2009 (United Information Systems Conference) was the third conference in the series that is based on the idea to pool smaller but highly interesting scientific events on information systems into one

large conference. Here, people from different scientific backgrounds can present their research results, share their ideas and discuss future trends in these various areas.

UNISCON 2009 was held in Sydney, Australia in the University of Western Sydney, Campbelltown Campus. In 2009 the following scientific events were held under the umbrella of UNISCON 2009: the 8 International Conference on Information Systems Technology and Its Applications (ISTA 2009) the 8 International Workshop on Conceptual Modelling Approaches for e- Business (eCOMO 2009) – Second Workshop on Model-Based Software and Data Integration (MBSDI 2009) We received 115 papers for the three events. Papers were submitted from over 25 countries. After a rigorous review process, 39 papers were accepted as full papers and 14 papers as short papers for presentation at the conference and published in these proceedings. In addition to the above three events, we also organized a Doctoral Consortium to provide a forum for doctoral students to get feedback from experts in the area about their research projects.

Basic Anesthesia Handbook is a core anaesthesia knowledge packed in a nutshell for a quick grasp and fast read on the important facts of perioperative anaesthesia management primarily designed for medical students. It also provides a concise and comprehensive knowledge of the basic principle of anaesthesia for doctors who are in their early exposure of the specialty and those who intend to pursue this field as their future professional career. The contents of the handbook are clearly highlighted in point forms and reinforced with diagrams, figures, graphs, tables, flowcharts and mnemonics. Description of the subjects is presented in a systematic manner using simple language that is easily understood. This handbook serves as one of the references in anaesthesia, hence prior basic knowledge on anatomy, physiology and pharmacology is still essential to appreciate the true beauty anaesthesia.

Envisioning the Future of Online Learning UiTM Press

This book presents the latest research of the field of optimization, modeling and algorithms, discussing the real-world application problems associated with new

innovative methodologies. The requirements and demands of problem solving have been increasing exponentially and new computer science and engineering technologies have reduced the scope of data coverage worldwide. The recent advances in information communication technology (ICT) have contributed to reducing the gaps in the coverage of domains around the globe. The book is a valuable reference work for researchers in the fields of computer science and engineering with a particular focus on modeling, simulation and optimization as well as for postgraduates, managers, economists and decision makers

This book examines how business, the social sciences, science and technology will impact the future of ASEAN.

Following the ASEAN VISION 2020, it analyses the issues faced by ASEAN countries, which are diverse, while also positioning ASEAN as a competitive entity through partnerships. On the 30th anniversary of ASEAN, all ASEAN leaders agreed to the establishment of the ASEAN VISION 2020, which delineates the formation of a peaceful, stable and dynamically developed region while maintaining a community of caring societies in Malaysia, Indonesia, Singapore, Brunei, Vietnam, Thailand, the Philippines, Myanmar,

Laos and Cambodia. In keeping with this aspiration, Universiti Teknologi MARA (UiTM) Perlis took the initial steps to organise conferences and activities that highlight the role of the ASEAN region. The Second International Conference on the Future of ASEAN (ICoFA) 2017 was organised by the Office of Academic Affairs, Universiti Teknologi MARA Perlis, to promote more comprehensive integration among ASEAN members. This book, divided into two volumes, offers a useful guide for all those engaged in research on business, the social sciences, science and technology. It will also benefit researchers worldwide who want to gain more knowledge about ASEAN countries.
