The joy of finding an old box in the attic filled with postcards, invitations, theater programs, laundry lists, and pay stubs is discovering the stories hidden within them.

The paper trails of our lives -- or ephemera -- may hold sentimental value, reminding us of great grandparents.

They chronicle social history.

They can be valuable as collectibles or antiques. But the greatest pleasure is that these ordinary documents can reconstruct with uncanny immediacy the drama of day-to-day life. The Encyclopedia

of Ephemera is the first work of its kind, providing an unparalleled sourcebook with over 400 entries that cover all aspects of everyday documents and artifacts, from bookmarks to birth certificates to lighthouse dues papers.

Continuing a tradition that started in the Victorian era, when disposable paper items such as trade cards, die-cuts and greeting cards were accumulated to paste into scrap books, expert Maurice Rickards has compiled an enormous range of paper collectibles from the obscure to the commonplace. His artifacts come from around the world and include such throw-away items as cigarette packs and crate labels as well as the ubiquitous faxes, parking tickets, and phone cards of daily life. As this major new reference shows, simple slips of paper can speak volumes about status, taste, customs, and taboos, revealing the very roots of popular culture.

The Politics of Reappraisal

1918–1939 Routledge

A vivid and whip-smart memoir from the legendary editor who spent decades leading newspapers in London and New York. In *My Paper Chase*, Harold Evans recounts the wild and wonderful tale of newspapering life. His story stretches from the 1930s to his service in WWII, through towns big and off the map. He discusses his passion for the crusading style of reportage he championed, his clashes with Rupert Murdoch, and his struggle to use journalism to better the lives of those less fortunate. There's a star-studded cast and a tremendously vivid sense of what once was: the lead type, the smell of the presses, eccentrics throughout, and angry editors screaming over the intercoms. *My Paper Chase* tells the story of Evans's great loves: newspapers and Tina Brown, the bright, young journalist

who became his wife. In an age when newspapers everywhere are under threat, *My Paper Chase* is not just a glorious recounting of an amazing life, but a nostalgic journey in black and white.

Using a rich variety of historical sources, Suzanne Morton traces the history of gambling regulation in five Canadian provinces - Nova Scotia, Quebec, Ontario, Manitoba, and B.C. - from the First World War to the federal legalization in 1969. This regulatory legislation, designed to control gambling, ended a long period of paradox and pretence during which gambling

was common, but still illegal. Morton skilfully shows the relationship between gambling and the wider social mores of the time, as evinced by labour, governance, and the regulation of 'vice.' Her focus on the ways in which race, class, and gender structured the meaning of gambling underpins and illuminates the historical data she presents. She shows, for example, as "Old Canada" (the Protestant, Anglo-Celtic establishment) declined in influence, gambling took on a less deviant connotation - a process that continued as charity became secularized and gambling became a lucrative fundraising activity eventually linked to the welfare

state. At Odds is the first Canadian historical examination of gambling, a complex topic which is still met by moral ambivalence, legal proscription, and volatile opinion. This highly original study will be of interest to the undergraduate history or social science student, but will also hold the attention of a more general reader.

This book explores the key issues of racism, anti-racism and identity in British football. It relates the history of black players in the game, analyses the racism they have experienced, and evaluates the efficacy of anti-racist campaigns. The efficacy of the

policing of racism is also assessed. The nationalism and xenophobia evident in much of the media's coverage of major tournaments is highlighted in the context of the way that English, Scottish and Welsh identities are constructed within British football.

"Mum, where is Dad, has he gone to bed?" I didn't know where my dad had gone because he just disappeared. I should really have got used to my dad getting drunk because he seemed to spend a lot of time drinking. But when I think about it, his drunkenness didn't bother me too much: it was the punching of my mum and myself that hurt me the most. However, I did find

time to have fun with a couple of friends that I had. The secret agent games that I invented from time to time coincided with the true-life games and excitement that I found along the way.

The intriguing story and turbulent history of a paper Charles Dickens praised for its 'range of information and profundity of knowledge', and which Queen Elizabeth, the Queen Mother, simply endorsed with the remark: 'Of course I read *The Sporting Life*'.

It was the Queen Mother's love of horseracing that made her such an avid reader of the Life and coverage of that sport forms the core of this book, but there is so much more to fascinate the reader including eyewitness accounts of the first fight for the heavyweight championship of the world and Captain Webb's heroic Channel swim of 1875. Highlights in the history of cricket, football and rugby are also featured, while chapters on coursing and greyhound racing rank alongside surreal reports on ratting contests and songbird singing competitions. And for 30 years Tommy Wisdom made his motoring reports unique by competing against the best at Brooklands, Le Mans and in many Monte Carlo rallies, while Henry Longhurst's golfing column was simply the best. The paper's strident campaigns for racing reforms are also chronicled along with its coverage of major news stories, from Fred Archer's shocking suicide to its own untimely demise. Its

Topics covered range from the

design of machine-independent programming languages to the use of recursive procedures in ALGOL 60. A multi-pass translation scheme for ALGOL 60 is described, along with some commercial source languages. The structure and use of the syntax-directed compiler is also considered. Comprised of 12 chapters, this volume begins with a discussion on the basic ideas involved in the description of a computing process as a program for a computer, expressed in a formal symbolic language such as ALGOL 60. The emphasis is on the information conveyed by the program constituents (semantics), rather than the particular form used (syntax). Subsequent chapters

focus on generalized ALGOL; the design of machine-independent programming languages; JOVIAL, a programming language for real-time command systems; and a complete ALGOL translator, expressed in ALGOL itself. A detailed description of the compiler compiler is also presented, together with the Rapidwrite program. The final chapter is devoted to file processing in SEAL (Standard Electronic Accounting Language). This monograph will be of interest to computer programmers.
