The UL symbol or letters "UL" on the wire/cable itself is only a supplemental

method of identifying UL coverage and should not be considered primary evidence of UL coverage. UL's Guide Information located in the Online Certification Directory will indicate if the UL symbol or letters on the product itself is required. *Wire and Cable - UL* Only the appropriate UL Mark – on the wire or cable

or on its packaging – is a valid indication of UL certification. UL assigns a unique E-number (E and a 3- to 6-digit number for wire and cable products) to each applicant in every product category. **DataPro's Guide to UL Cable Ratings** The Authorized Label Suppliers program specifically addresses the printing format and distribution

of the UL Certification Mark. When the UL Certification Mark and required safety-related information are printed on the same label, referred to as a combination or custom label, the label supplier must be an Authorized Label Supplier. The label must also meet the performance requirements

covered by the Marking and Labeling Systems program for that UL Certified end product.

Wire and Cable Marking Considerations - UL

The UL symbol or letters "UL" surface printed on the wire/cable is only a supplemental method of marking the product and should not be considered as evidence of UL coverage. UL's Guide Information

located in UL's Product IQ at product iq.UL.com will indicate if the UL symbol or letters on the wire/cable itself is required or permitted.
