Critically analyses the historical, cultural and political dimensions of white religious rage in America, past and present This book sheds light on the phenomenon of white rage, and maps out the uneasy relationship between white anxiety, religious fervour, American identity and perceived black racial progress. Contributors to the volume examine the sociological construct of the "e;white

labourer"e; , whose concerns and beliefs can be understood as religious in foundation, and uncover that white religious fervor correlates to notions of perceived white loss and perceived black progress. In discussions ranging from the Constitution to the Charlottesville riots to the evangelical community's uncritical support for Trump, the authors of this collection argue that it is not economics but religion and race that stand as the primary motivating factors for the rise of white rage and white supremacist sentiment in the United States.

In June 2019, the Committee on the Judiciary initiated a bipartisan investigation into the state of competition online, spearheaded by the Subcommittee on Antitrust, Commercial and Administrative Law. As part of a top-to-bottom review of the market, the Subcommittee examined the dominance of Amazon, Apple, Facebook, and Google,

and their business practices to determine how their power affects our economy and our democracy. Additionally, the Subcommittee performed a review of existing antitrust laws, competition policies, and current enforcement levels to assess whether they are adequate to address market power and anticompetitive conduct in digital markets. Over the course of our investigation, we collected extensive evidence from these companies as well as from third parties—totaling nearly 1.3 million documents. We held seven hearings to review the effects of market power online—including on the free and diverse press, innovation, and privacy—and a final hearing to examine potential solutions to concerns identified during the investigation and to inform this Report's recommendations. A year after initiating the investigation, we received testimony from the Chief Executive Officers of the investigated companies: Jeff Bezos, Tim Cook, Mark Zuckerberg, and Sundar Pichai. For nearly six hours, we pressed for answers about their business practices, including about evidence concerning the extent to which they have exploited, entrenched, and expanded their power over digital markets in anticompetitive and abusive ways. Their answers were often evasive and non-responsive, raising fresh questions about whether they believe they are beyond the reach of democratic oversight. Although these four corporations differ in important ways, studying their business practices has revealed common problems

Complaints about relationships consist of not understanding why someone said something in a demeaning manner, what did they mean? What are their motivations? While you're trying to act like you don't care, or analyze what they mean, you secretly wish you could take a step into their minds. This is what psychotherapists do; they step into their client's mind, for the purpose of helping them understand themselves and to heal. Here, we aren't doing this. We're analyzing the depths of their minds to ascertain their lost dreams, dark shadows, untapped potential, motivations, genuine meanings behind their strange behaviours, and unmet needs. We're not therapists with altruistic intentions. If you've picked up this book, you have the desire to control, manipulate, make people bend to your will. First, you'll need to go deep into the abyss of your victim's mind. With this book—you'll learn how.

A world-class thinker counts the 100 ways in which humans behave irrationally, showing us what we can do to recognize and minimize these “ thinking errors ” to make better decisions and have a better life. Despite the best of intentions, humans are notoriously bad—that is, irrational—when it comes to making decisions and assessing risks and tradeoffs. Psychologists and neuroscientists refer to these distinctly human foibles, biases, and thinking traps as “ cognitive errors. ” Cognitive errors are systematic deviances from rationality, from optimized, logical, rational thinking and behavior. We make these errors all the time, in all sorts of situations, for problems big and small: whether to choose the apple or the cupcake; whether to keep retirement funds in the stock market when the Dow tanks, or whether to take the advice of a friend over a stranger. The “ behavioral turn ” in neuroscience and economics in the past twenty years has increased our understanding of how we think and how we make decisions. It shows how systematic errors mar our thinking and under which conditions our thought processes work best and worst. Evolutionary psychology delivers convincing theories about why our thinking is, in fact, marred. The neurosciences can pinpoint with increasing precision what exactly happens when we think clearly and when we don ’ t. Drawing on this wide body of research, *The Art of Thinking Clearly* is an entertaining presentation of these known systematic thinking errors—offering guidance and insight into everything why you

shouldn ’ t accept a free drink to why you SHOULD walk out of a movie you don ’ t like it to why it ’ s so hard to predict the future to why shouldn ’ t watch the news. The book is organized into 100 short chapters, each covering a single cognitive error, bias, or heuristic. Examples of these concepts include: Reciprocity, Confirmation Bias, The It-Gets-Better-Before-It-Gets-Worse Trap, and the Man-With-A-Hammer Tendency. In engaging prose and with real-world examples and anecdotes, *The Art of Thinking Clearly* helps solve the puzzle of human reasoning.

From the internationally bestselling author and prizewinning economist--a highly original guide to the global economy. In his bestselling *23 Things They Don't Tell You About Capitalism*, Cambridge economist Ha-Joon Chang brilliantly debunked many of the predominant myths of neoclassical economics. Now, in an entertaining and accessible primer, he explains how the global economy actually works-in real-world terms. Writing with irreverent wit, a deep knowledge of history, and a disregard for conventional economic pieties, Chang offers insights that will never be found in the textbooks. Unlike many economists, who present only one view of their discipline, Chang introduces a wide range of economic theories, from classical to Keynesian, revealing how each has its strengths and weaknesses, and why there is no one way to explain economic behavior. Instead, by ignoring the received wisdom and exposing the myriad forces that shape our financial world, Chang gives us the tools we need to understand our increasingly global and interconnected world often driven by economics. From the future of the Euro, inequality in China, or

the condition of the American manufacturing industry here in the United States--*Economics: The User's Guide* is a concise and expertly crafted guide to economic fundamentals that offers a clear and accurate picture of the global economy and how and why it affects our daily lives.

As far as the writer knows, no treasure-trains were actually sent to the port of Lorient from the arsenal at Brest. The treasures remained at Brest.

Concerning the German armored cruiser *Augusta*, the following are the facts: About the middle of December she forced the blockade at Wilhelmshafen and ran for Ireland, where, owing to the complaisance of the British authorities, she was permitted to coal. From there she steamed towards Brest, capturing a French merchant craft off that port, another near Rochefort, and finally a third. That ended her active career during the war; a French frigate chased her into the port of Vigo and kept her there. To conclude, certain localities and certain characters have been sufficiently disguised to render recognition improbable. This is proper because " *The Lizard* " is possibly alive to-day, as are also the mayor of Paradise, Sylvia Elven, Jacqueline, and Speed, the latter having barely escaped death in the *Virginus* expedition. The original of *Buckhurst* now lives in New York, and remains a type whose rarity is its only recommendation. Those who believe they recognize the *Countess de Vassart* are doubtless in error. *Mornac*, long dead, is safe in his disguise; *Tric-Trac* was executed on the *Place de la Roquette*, and celebrated in doggerel by an unspeakable ballad writer. There remains *Scarlett*; dead or alive, I wish him well.

This book explores ways in which libraries can reach new levels of service, quality, and efficiency while minimizing cost by collaborating in acquisitions. In consortial acquisitions, a number of libraries work together, usually in an existing library consortia, to leverage size to support acquisitions in each individual library. In cross-functional acquisitions, acquisitions collaborates to support other library functions. For the library acquisitions manager, technical services manager, or the library director, awareness of different options for effective consortial and cross-functional acquisitions allows for the optimization of staff and resources to reach goals. This work presents those options in the form of case studies as well as useful analysis of the benefits and

challenges of each. By supporting each other ' s acquisitions services in a consortium, libraries leverage size to get better prices, and share systems and expertise to maximize resources while minimizing costs. Within libraries, the acquisitions function can be combined with other library functions in a unit with more than one purpose, or acquisitions can develop a close working relationship with another unit to support their work. This book surveys practice at different libraries and at different library consortia, and presents a detailed description and analysis of a variety of practices for how acquisitions units support each other within a consortium, and how they work with other library units, specifically collection management, cataloging, interlibrary loan, and the digital repository, in the form of case studies. A final section of the book covers fundamentals of collaboration.
