Before becoming the world's most notorious dictator, Kim Jong-Il ran North Korea's Ministry for Propaganda and its film studios. Conceiving every movie made, he acted as producer and screenwriter. Despite this control, he was overwhelmed by the available talent and took drastic steps, ordering the kidnapping of Choi Eun-Hee (Madam Choi)—South Korea's most famous actress—and her ex-husband Shin Sang-Ok, the country's most famous filmmaker. Madam Choi vanished first. When Shin went to Hong Kong to investigate, he was attacked and woke up wrapped in plastic sheeting aboard a ship bound for North Korea. Madam Choi lived in isolated luxury, allowed only to attend the Dear Leader's dinner parties. Shin, meanwhile, tried to escape, was sent to prison camp, and "re-educated." After four years he cracked, pledging loyalty. Reunited with Choi at the first party he attends, it is announced that the couple will remarry and act as the Dear Leader's film advisors. Together they made seven films, in the process gaining Kim Jong-Il's trust. While pretending to research a film in Vienna, they flee to the U.S. embassy and are swept to safety. A nonfiction thriller packed with tension, passion, and politics, author Paul Fischer's *A Kim Jong-Il Production* offers a rare glimpse into a secretive world, illuminating a fascinating chapter of North Korea's history that helps explain how it became the hermetically sealed, intensely stage-managed country it remains today.

And he and Sylvie were arguing as he drove down the slick road. No one ever says what they were arguing about. Other people think it's not important. They do not know there is another story. The story that lurks between the facts. What they do not know—the cause of the argument—is crucial. So let me tell you...

Under the Loving Care of the Fatherly Leader offers in-depth portraits of North Korea's two ruthless and bizarrely Orwellian leaders, Kim Il-Sung and Kim Jong-Il. Lifting North Korea's curtain of self-imposed isolation, this book will take readers inside a society, that to a Westerner, will appear to be from another planet. Subsisting on a diet short on food grains and long on lies, North Koreans have been indoctrinated from birth to follow unquestioningly a father-son team of megalomaniacs. To North Koreans, the Kims are more than just leaders. Kim Il-Sung is the country's leading novelist, philosopher, historian, educator, designer, literary critic, architect, general, farmer, and ping-pong trainer. Radios are made so they can only be tuned to the official state frequency. "Newspapers" are filled with endless columns of Kim speeches and propaganda. And instead of Christmas, North Koreans celebrate Kim's birthday--and he presents each child a present, just like Santa. The regime that the Kim Dynasty has built remains technically

at war with the United States nearly a half century after the armistice that halted actual fighting in the Korean War. This fascinating and complete history takes full advantage of a great deal of source material that has only recently become available (some from archives in Moscow and Beijing), and brings the reader up to the tensions of the current day. For as this book will explain, North Korea appears more and more to be the greatest threat among the Axis of Evil countries--with some defector testimony warning that Kim Jong-Il has enough chemical weapons to wipe out the entire population of South Korea.

Fearing the Black Body Basic Books (AZ)

Winner, 2020 Body and Embodiment Best Publication Award, given by the American Sociological Association Honorable Mention, 2020 Sociology of Sex and Gender Distinguished Book Award, given by the American Sociological Association How the female body has been racialized for over two hundred years There is an obesity epidemic in this country and poor Black women are particularly stigmatized as "diseased" and a burden on the public health care system. This is only the most recent incarnation of the fear of fat Black women, which Sabrina Strings shows took root more than two hundred years ago. Strings weaves together an eye-opening historical narrative ranging from the Renaissance to the current moment, analyzing important works of art, newspaper and magazine articles, and scientific literature and medical journals—where fat bodies were once praised—showing that fat phobia, as it relates to Black women, did not originate with medical findings, but with the Enlightenment era belief that fatness was evidence of "savagery" and racial inferiority. The author argues that the contemporary ideal of slenderness is, at its very core, racialized and racist. Indeed, it was not until the early twentieth century, when racialized attitudes against fatness were already entrenched in the culture, that the medical establishment began its crusade against obesity. An important and

original work, *Fearing the Black Body* argues convincingly that fat phobia isn't about health at all, but rather a means of using the body to validate race, class, and gender prejudice.

Margie opened her heart and her home to help those who needed her loving guidance. With unswerving devotion to her family and friends, she transformed lives and inspired joy and hope in everyone through her generosity, sense of fun, and unflinching faith. The many recollections within this uplifting tribute to a unique, sweet soul, portray Margie's loving legacy. Love, Care and Share will inspire you to find what is most important to you. You will discover your own truth, and how everyone, everywhere, every day has opportunities to make a positive difference. Margie always said, "We are the hands and fingers of God, but we have to use them." Praise for LOVE, CARE AND SHARE I started reading Love, Care and Share just after 7pm and it's now 9:20pm. I was deeply drawn into it and it was like being with Margie again, only through your eyes and words. For these past few hours she "Lived" again. Thank you for that. The raw emotion expressed comes through vividly, about a Son's Love for his Mother bringing her life into meaningful events and wanting her to be remembered as someone many of us Loved. I have often said to others that we go through life never really seeing others and ourselves but for our outer shells/bodies, instead of seeing the real entity that we are; which is the Soul. Margie saw the Soul and therefore was able to love as she did. - Chris Price I can't tell you how much I enjoyed reading about your Mom in Love, Care and Share. It was amazing and the stories just made me sorry I didn't know her myself. She must have had the biggest, kindest heart. Her willingness to give her time and her home and anything else which was needed made her very special indeed. You must miss her terribly. Your writing was lovely and by the end, I felt as though I knew all of you in a way I hadn't before. Thank you for sharing it with me my friend. - Love, Sherry

PULITZER PRIZE FINALIST • "A stunning exposé of why Black people in our society 'live sicker and die quicker'—an eye-opening game changer."—Oprah Daily From an award-winning writer at the *New York Times Magazine* and a contributor to the 1619 Project comes a landmark book that tells the full story of racial health disparities in

America, revealing the toll racism takes on individuals and the health of our nation. In 2018, Linda Villarosa's New York Times Magazine article on maternal and infant mortality among black mothers and babies in America caused an awakening. Hundreds of studies had previously established a link between racial discrimination and the health of Black Americans, with little progress toward solutions. But Villarosa's article exposing that a Black woman with a college education is as likely to die or nearly die in childbirth as a white woman with an eighth grade education made racial disparities in health care impossible to ignore. Now, in *Under the Skin*, Linda Villarosa lays bare the forces in the American health-care system and in American society that cause Black people to "live sicker and die quicker" compared to their white counterparts. Today's medical texts and instruments still carry fallacious slavery-era assumptions that Black bodies are fundamentally different from white bodies. Study after study of medical settings show worse treatment and outcomes for Black patients. Black people live in dirtier, more polluted communities due to environmental racism and neglect from all levels of government. And, most powerfully, Villarosa describes the new understanding that coping with the daily scourge of racism ages Black people prematurely. Anchored by unforgettable human stories and offering incontrovertible proof, *Under the Skin* is dramatic, tragic, and necessary reading.

A doctor on the front lines of hospital care illuminates one of the most important and controversial social issues of our time. It is harder to die in this country than ever before. Though the vast majority of Americans would prefer to die at home—which hospice care provides—many of us spend our last days fearful and in pain in a healthcare system ruled by high-tech procedures and a philosophy to "fight disease and illness at all cost." Dr. Ira Byock, one of the foremost palliative-care physicians in the country, argues that how we die represents a national crisis today. To ensure the best possible elder care, Dr. Byock explains we must not only remake our healthcare system but also move beyond our cultural aversion to thinking about death. *The Best Care Possible* is a compelling meditation on medicine and ethics told through page-turning life-or-death medical drama. It has the power to lead a new national conversation.
