India Migration Report 2015 Wilfrid Laurier Univ. Press

This book investigates how policy, family background, social class, gender and ethnicity influence young people's post-16 and post-18 employment and education access. It draws on existing literature, alongside new data gathered from a case study in a UK state secondary school, to examine how policy changes to the financial arrangements for further and higher education and the changing youth employment landscape have had an impact on young people's choices and pathways. Hoskins explores a number of topics, including the role of identity in young people's decision-making; the impact of changes to young people's financial arrangements, such as cuts to the Education Maintenance Allowance and increased university fees; and the influence of support from parents and teachers. The book will be of interest to students and researchers of Education and Sociology.

The Drama, Theatre and Performance Companion Mango Media Inc. Now in its third edition, this bestseller offers new data, recommendations, and observations that explore the choices for success available to students in the academic middle.

There has been a resurgence of interest in training programmes for higher education leaders and management (HELM) at African universities in recent times. Although there have been a few cases of evaluation studies of such programmes in Africa, a more systematic review of the lessons learnt through these programmes has not been done. This book aims to document and reflect on the learnings from intervention programmes at three African higher education councils. It is clear that university leaders face many leadership and management challenges. This is the starting point of the book.

For more than 15 years, *The Academic Job Search Handbook* has assisted job seekers in all academic disciplines in their search for faculty positions. The guide includes information on aspects of the search that are common to all levels, with invaluable tips for

those seeking their first or second faculty position. This new edition provides updated advice and addresses hot topics in the competitive job market of today, including the challenges faced by dual-career couples, job search issues for pregnant candidates, and advice on how to deal with gaps in a CV. The chapter on alternatives to academic jobs has been expanded, and sample resumes from individuals seeking nonfaculty positions are included. The book begins with an overview of the hiring process and a timetable for applying for academic positions. It then gives detailed information on application materials, interviewing, negotiating job offers, and starting the new job. Guidance throughout is aimed at all candidates, with frequent reference to the specifics of job searches in scientific and technical fields as well as those in the humanities and social sciences. Advice on seeking postdoctoral opportunities is also included. Perhaps the most significant contribution is the inclusion of sample vitas. *The Academic Job Search Handbook* describes the organization and content of the vita and includes samples from a variety of fields. In addition to CVs and research statements, new in this edition are a sample interview itinerary, a teaching portfolio, and a sample offer letter. The job search correspondence section has also been updated, and there is current information on Internet search methods and useful websites.

This volume takes an interdisciplinary approach to studying a wide range of subjects associated with the creation, performance and reception of 'opera' in varying social and historical contexts from the eighteenth to the twentieth centuries. Each essay attends to migrations between genres, cultures, literary and musical works, modes of expression, media of presentation and aesthetics. Although the directions the contributions take are diverse, they converge in significant ways, particularly with the rebuttal of the notion of the singular nature of the operatic work. The volume strongly asserts that works are meaningfully transformed by the manifold circumstances of their creation and reception, and that these circumstances have an impact on the life of those works in their many transformations and on a given audience's experience of them. migration into operatic genre; works that move across geographical and social boundaries into different cultural contexts; movements between media and/or genre as well as alterations through interpretation and performance of the composer's creation; the translation of spoken theatre to lyric theatre; the theoretical issues contingent on the rendering of 'speech' into 'song'; and the resultant effects of aesthetic considerations as they bear on opera. Crossing over disciplinary boundaries between music, literary studies, history, cultural studies and art history, the volume enriches our knowledge and understanding of the various

intersections associated with opera. The book will therefore appeal to those working in the field of music, literary and cultural studies, and to those with a particular interest in opera and musical theatre.

In a tech-dominated world, the most needed degrees are the most surprising: the liberal arts. Did you take the right classes in college? Will your major help you get the right job offers? For more than a decade, the national spotlight has focused on science and engineering as the only reliable choice for finding a successful post-grad career. Our destinies have been reduced to a caricature: learn to write computer code or end up behind a counter, pouring coffee. Quietly, though, a different path to success has been taking shape. In *You Can Do Anything*, George Anders explains the remarkable power of a liberal arts education - and the ways it can open the door to thousands of cutting-edge jobs every week. The key insight: curiosity, creativity, and empathy aren't unruly traits that must be reined in. You can be yourself, as an English major, and thrive in sales. You can segue from anthropology into the booming new field of user research; from classics into management consulting, and from philosophy into high-stakes investing. At any stage of your career, you can bring a humanist's grace to our rapidly evolving high-tech future. And if you know how to attack the job market, your opportunities will be vast. In this book, you will learn why resume-writing is fading in importance and why "telling your story" is taking its place. You will learn how to create jobs that don't exist yet, and to translate your campus achievements into a new style of expression that will make employers' eyes light up. You will discover why people who start in eccentric first jobs - and then make their own luck - so often race ahead of peers whose post-college hunt focuses only on security and starting pay. You will be ready for anything.

Psychology is one of the most popular college majors and can lead to a satisfying career in many different fields. If graduate school is not in your immediate plans, this book is for you. It will show you how to leverage your bachelors degree to find a career with intellectual, emotional, and perhaps even financial rewards. In this book, 28 professionals describe the scope of their work, level of career satisfaction, and how their bachelors degree in psychology helped get them there. You also get a snapshot of salary, benefits, and day-to-day pleasures and challenges in a variety of jobs as well as advice and questions to help you reflect on the classes, internships, experiences, and attitudes that will make you a success in your career of choice. In addition to the profiles, this book offers detailed instructions for how to use interest inventory and career search tools such as the Holland Self-Directed Search and O*NET database to refine your post-college plans. It candidly reviews best and worst strategies for resume building, job searching, and interviewing and offers up-to-date tips on how to combine personal networking and technology to get noticed. As a bonus, author Eric Landrum provides a backstage pass to the research behind this book, uncovering the process so you can appreciate the data or perhaps get some ideas for your next project.

Teaching Psychiatry to Undergraduates Ashgate Publishing, Ltd. 2018 Frederic W. Ness Book Award, AAC&U How can educators ensure that young people who attain a postsecondary credential are adequately prepared for the future? Matthew T. Hora and his colleagues explain that the answer is not simply that students need more specialized technical training to meet narrowly defined employment opportunities. *Beyond the Skills Gap* challenges this conception of the "skills gap," highlighting instead the value of broader twenty-first-century skills in postsecondary education. They advocate for a system in which employers share responsibility along with the education sector to serve the collective needs of the economy, society, and students. Drawing on interviews with educators in two- and four-year institutions and employers in the manufacturing and biotechnology sectors, the authors demonstrate the critical importance of habits of mind such as problem solving, teamwork, and communication. They go on to show how faculty and program administrators can create active learning experiences that develop students' skills across a range of domains. The book includes in-depth descriptions of eight educators whose classrooms exemplify the effort to blend technical learning with the cultivation of twenty-first-century habits of mind. The study, set in Wisconsin, takes place against the backdrop of heated political debates over the role of public higher education. This thoughtful and nuanced account, enriched by keen observations of postsecondary instructional practice, promises to contribute new insights to the rich literature on workforce development and to provide valuable guidance for postsecondary faculty and administrators.

The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site *The Professor is In*, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to

nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.
