*Understanding Business* Wiley Global Education  
Understanding Business by Nickels, McHugh, and McHugh has been the number one textbook in the introduction to business market for several editions for three reasons: (1) The commitment and dedication of an author team that teaches this course and believes in the importance and power of this learning experience, (2) we listen to our customers, and (3) the quality of our supplements package. We consistently look to the experts - full-time faculty members, adjunct instructors, and of course students - to drive the decisions we make about the text itself and the ancillary package. Through a series of focus groups, symposia, as well as full-book, single-chapter, revised manuscript reviews of both text and key ancillaries, we have heard the stories of more than 600 professors and their insights and experiences are evident on every page of the revision and in every

supplement. As teachers of the course and users of their own materials, the author team is dedicated to the principles of excellence in business education. From providing the richest most current topical coverage to using dynamic pedagogy that puts students in touch with today's real business issues, to creating groundbreaking and market-defining ancillary items for professors and students alike, Understanding Business leads the way.

This true story documents the extraordinary life of an "Every Man" who came from humble beginnings to realize substantial accomplishment in spite of harrowing experiences and difficult circumstances. Ed Freeman's birthright family trials and tribulations begin when his great-grandfather is abandoned at as a newborn on a pastor's doorstep in North Carolina in 1833. The baby boy grew into a young man and ended up fighting in the US Civil War, later migrating to the Great Plains where the family made a living connected to all things turning up dirt, tilling and plowing the rolling hills of Nebraska. At the end of the 1930s Dust Bowl the baby boy's great-grandson, young Ed Freeman, escaped a forced arrangement during the Great Depression in the middle of a freezing cold winter night by hopping on a railcar headed west, joining the ranks of hoboes and eventually settling in the coastal mountains of Oregon where he could be his own man in a land of opportunity. Leveraging the work ethic, skill sets, and accumulation of life experiences that typified the high quality tradesmen they had become, in 1969 Ed Freeman and his son Dugie formed a company that would build custom all welded commercial fishing boats in the small Pacific Coastal town of Gold Beach, Oregon. During the 1970s they were constructing the biggest aluminum boats built in the United States and specialized in markets of the Pacific Northwest including Alaska. The Freemans found dignity in taking on the jobs nobody else wanted and made things work no matter what. Over the course of the little firm's short life (12 years), the boats they built had a combined length of nearly four football fields and a total vessel weight of more than a million pounds. This is a straight-forward American story, both interesting and instructive, that is neither simple nor complex. It puts a face to personal struggles, applies respect that effort, creativity, hard work, absorption, reflection, striving, and persistence deserves, and connects a larger sphere of influencers that contributed to their success.
