## Macro Flash Tips & Techniques - Outdoor Photography

Professional photographers rely on aperture to control the amount of light passing through to the camera's image sensor. The term refers to the iris in the camera lens opening or closing to allow varying levels of light. The camera's aperture is measured in f-stops.

## Online Photography School

Many years ago, back in the days of wired telephones and film, most photographers did not give white balance (WB) or color temperature much thought. Those who did would carry around color-correction filters to screw onto the front of their lenses that would cancel out the color

casts of the artificial or natural light illuminating a scene. If you were paying attention back in those ancient ...
