Many years ago, back in the days of wired telephones and film, most photographers did not give white balance (WB) or color temperature much thought. Those who did would carry around color-correction filters to screw onto the front of their lenses that would cancel out the color casts of the artificial or natural light illuminating a scene. If you were paying attention back in those ancient ...

Photography, like any other art, demands both compelling content and expert technique to create a pleasing result. In my previous article, I discussed some of the aesthetic choices involved in creating a successful macro image. Technique, however, is an absolute must; it's the artist's tool to convey his artistic vision.
