This volume is a festschrift dedicated to James J. Jenkins, a pioneer in many areas of experimental psychology. It has three major goals: to provide a forum for debate on current theoretical issues in cognitive psychology, to capture the "state of the art" in reviews of research methods and results, and to generate ideas for new research directions and methodologies. Contributors -- including Jenkins' former students and present colleagues -- ponder fundamental questions such as: * How do people learn to read? * What happens during the processes of speech perception? * How do people acquire problem solving skills? * How do cognitive and motor skills develop and integrate with one another? Many chapters focus specifically on ecological and applied cognitive psychology. Specific topics covered include visual and speech perception, language, memory, motivation, child development, problem solving, and pedagogy.

Though Elvis Presley's music is widely credited as starting a sea change in American popular culture, his films are often dismissed as superficial. Beyond the formulaic plotlines and the increasingly weaker songs, however, the films are rich with resonance to the changing times in which they were produced

(roughly 1955–1970). They were also a means by which Elvis communicated deeply felt autobiographical material to his fan base, although in the guise of lighthearted escapist fare. This work takes a new stand, maintaining that Elvis's 31 Hollywood features and two documentaries reveal a profound statement from the star and auteur. Analyzing each film in detail and exploring the body of work as a whole, Brode reveals the Elvis persona as a contemporary *Candide*, attempting to navigate an ever changing social and political landscape.

This work explores the many ways in which the developing film industry of the early twentieth century influenced the writings of F. Scott Fitzgerald, focusing specifically on his novels *This Side of Paradise*, *The Great Gatsby*, *Tender Is the Night*, and the incomplete *The Last Tycoon*. *The Beautiful and the Damned* is also discussed briefly. Early chapters examine Fitzgerald's literary adaptation of visual film techniques (pans, freeze frames, slow motion) and aural cinematic concepts (sound effects, diegetic sound) within his most popular novels. The final chapter summarizes the effect such techniques had in augmenting and defining

Fitzgerald's unique literary style.

An Introduction to Literary Studies Lexington Books

Written by an Emmy-award-winning producer and director, this book focuses on the underlying principles of film and television production, emphasizing the creative rather than the technical aspects. The book describes how a film is created - from conception to screen - and provides a comprehensive overview of the entire production process. Not intended as a "how-to" book, this book presents only a limited amount of detailed technical information. Instead, it emphasizes the underlying principles and processes of primarily four kinds of films: feature, independently financed, made-for-network-television, and made-for-cable movies. For anyone interested in writing, directing, producing or acting for film/TV.

The *Film Experience* is a comprehensive introduction to film that treats students as the avid movie fans they are while surpassing all other texts in helping them understand the art form's full scope, breadth, and depth. Like other introductory texts, it offers strong coverage of film's formal elements, but goes further by situating this formal knowledge in the larger cultural contexts that inform the ways that we all view film. The authors' rich

narrative integrates the cultural history of film throughout and demonstrates how the elements, practices, economics, and history of the medium contribute to a film's many possible meanings. The outstanding art program — now in full color — visually reinforces all the key concepts and techniques discussed in the text.

Media aesthetics have gained prominence with the dramatic advances in the digital technology of video and electronic cinema. In this dynamic field, Herb Zettl's *Sight Sound Motion/Applied Media Aesthetics, Fifth Edition* is more applicable than ever. Drawing on a decade of their own research from the 2000 to 2012 U.S. presidential elections, Renita Coleman and Denis Wu explore the image presentation of political candidates and its influence at both aggregate and individual levels. When facing complex political decisions, voters often rely on gut feelings and first impressions but then endeavor to come up with a “rational” reason to justify their actions. *Image and Emotion in Voter Decisions: The Affect Agenda* examines how and why voters make the decisions they do by examining the influence of the media's coverage of politicians' images. Topics include the role of visual and verbal cues in communicating affective information, the influence of demographics on affective agenda setting, whether positive or negative tone is more powerful, and the role of emotion in second-level agenda setting. *Image and Emotion in Voter Decisions* will challenge readers to think critically about political

information processing and a new way of systematically thinking about agenda setting in elections.

"There is no better, smarter examination of the relationship between comics and film." --Mark Waid, Eisner Award-winning writer of *Kingdom Come* and *Daredevil*
In the summer of 2000 *X-Men* surpassed all box office expectations and ushered in an era of unprecedented production of comic book film adaptations. This trend, now in its second decade, has blossomed into Hollywood's leading genre. From superheroes to Spartan warriors, *The Comic Book Film Adaptation* offers the first dedicated study to examine how comic books moved from the fringes of popular culture to the center of mainstream film production. Through in-depth analysis, industry interviews, and audience research, this book charts the cause-and-effect of this influential trend. It considers the cultural traumas, business demands, and digital possibilities that Hollywood faced at the dawn of the twenty-first century. The industry managed to meet these challenges by exploiting comics and their existing audiences. However, studios were caught off-guard when these comic book fans, empowered by digital media, began to influence the success of these adaptations. Nonetheless, filmmakers soon developed strategies to take advantage of this intense fanbase, while codifying the trend into a more lucrative genre, the comic book movie, which appealed to an even wider audience. Central to this vibrant trend is a comic aesthetic in which filmmakers utilize digital filmmaking technologies to engage with the language and conventions of comics like never before. *The Comic Book Film Adaptation* explores this unique moment in which cinema is stimulated, challenged, and enriched by the once-dismissed medium of comics.

Has any film director had a greater impact on

popular culture than Steven Spielberg? Whether filming Holocaust heroes and villains, soldiers, dinosaurs, extraterrestrials, or explorers in search of the Holy Grail, Spielberg has given filmgoers some of the most memorable characters and wrenching moments in the history of cinema. Whatever his subject—war, cloning, slavery, terrorism, or adventure—all of Spielberg's films have one aspect in common: a unique view of the moral fabric of humanity. Dean A. Kowalski's *Steven Spielberg and Philosophy* is like a remarkable conversation after a night at the movie theater, offering new insights and unexpected observations about the director's most admired films. Some of the nation's most respected philosophers investigate Spielberg's art, asking fundamental questions about the nature of humanity, cinema, and Spielberg's expression of his chosen themes. Applying various philosophical principles to the movies, the book explores such topics as the moral demands of parenthood in *War of the Worlds*; the ultimate unknowability of the "other" in *Close Encounters of the Third Kind* and *Schindler's List*; the relationship between nature and morality in *Jurassic Park*; the notion of consciousness in *A.I.: Artificial Intelligence*; issues of war theory and ethics in *Munich*; and the foundation of human rights in *Amistad*. Impressive in scope, this volume illustrates the philosophical tenets of a wide variety of thinkers from Plato to Aquinas, Locke, and Levinas. Contributors introduce readers to philosophy while simultaneously providing deeper insight into Spielberg's approach to filmmaking. The essays consider Spielberg's movies using key philosophical cornerstones: metaphysics, epistemology, ethics, axiology, aesthetics, and political philosophy, among others. At the same time, *Steven Spielberg and Philosophy* is accessible to those new to philosophy, using the philosophical platform to ponder larger issues embedded in film and asking fundamental questions about the nature of cinema and how meanings are negotiated. The authors contend that

movies do not present philosophy—rather philosophy is something viewers do while watching and thinking about films. Using Spielberg's films as a platform for discussing these concepts, the authors contemplate questions that genuinely surprise the reader, offering penetrating insights that will be welcomed by film critics, philosophers, and fans alike.

Hitchcock and the Cinema of Sensations Pendragon Press

Women Through the Lens raises the question of how gender, especially the image of woman, acts as a visual and discursive sign in the creation of the nation-state in twentieth-century China. Tracing the history of Chinese cinema through the last hundred years from the perspective of transnational feminism, Shuqin Cui reveals how women have been granted a "privileged visibility" on screen while being denied discursive positions as subjects. In addition, her careful attention to the visual language system of cinema shows how "woman" has served as the site for the narration of nation in the context of China's changing social and political climate. Placing gender and nation in a historical framework, the book first shows how early productions had their roots in shadow plays, a popular form of public entertainment. In examining the "Red Classics" of socialist cinema as a mass cultural form, the book shows how the utopian vision of emancipating the entire proletariat, women included, produced a collective ideology that declared an end to gender difference. Cui then documents and discusses the cinematic spectacle of woman as essential to such widely popular films as Chen Kaige's *Farewell My Concubine* and Zhang Yimou's *Ju Do*. Finally, the author brings a feminist perspective to the issues of gender and nation by turning her attention to women directors and their self-representations.
