This book presents the first thoroughgoing analysis of the contractual effect of letters of comfort as it appears in both common law and civil law systems. The commentary draws on cases from a wide variety of jurisdictions and on the full range of legal scholarship on the subject in several languages. Among the specific issues and topics raised along the way are the following: the typology of letters of comfort; the legal nature of letters of comfort; the use of letters of comfort in corporate group and banking practice; the economic explanation for the use of letters of comfort; the contractual effect of letters of comfort in French law; ' ten commandments ' of letters of comfort; Clearly evoking the tension between business needs, the law, and judicial application, the book analyses what happens when the relationship between a lender and a creditor breaks down, or the latter becomes insolvent, and courts or arbitrators are asked to determine the legal status of a comfort letter. This is an area of practice in which lawyers in any field of business activity are inevitably concerned, and in which useful guidance is scarce. For this reason this detailed analysis will be very welcome.

Although several useful entry guides to China for business investors have appeared in recent years, this is the first book to focus on a business strategy that is becoming increasingly important - and attractive - to businesses in China: the takeover and restructuring of a listed company. This practice orientated book has an additional value, moreover, in that it fully takes into account not only the relevant regulations, most of which were promulgated or updated from 2005 to 2010, but also the actual structures and procedures of nearly ninety announced deals, right up to September 2010. In unprecedented details, the

author, an experienced M&A lawyer, describes China specific takeover and restructuring cases involving foreign investors as well as state-owned shareholders on the Shanghai Stock Exchange, the Shenzhen Stock Exchange and 'ChiNext'. The presentation and analysis covers such elements as the following: the standard bids, such as tender offers, negotiated transfers, indirect takeovers and subscriptions for new shares; the special accesses available to a foreign investor such as qualifying as a 'strategic investor' or 'qualified foreign institutional investor' (QFII); the particular situations where 'state-owned shareholder' (SS) is involved or where a share exchange occurs, including where a foreign investor subscribes by injecting, or acquires indirectly via, its 'onshore foreign invested enterprise'; the basic restructuring approaches of a listed company - public offering and private placement; and the full meaning and significance of the 'substantial asset restructuring' (SAR), which may be asset purchases, disposals or swaps, or the SAR in special cases - merger or separation deals. The author's illustration of deal structures and step-by-step procedures, visualized in over 150 charts and checklists, gives the reader a clear path to follow through what can seem like a forbiddingly difficult process - a path rendered more secure by the deal histories presented. For companies with operations in China, or considering such operations, as well as professionals advising on these companies, this book is a goldmine of crucially valuable information and guidance. There is nothing else available that comes close to its authority or expertise in this area.

Trade and Receivable Finance provides the definitive practical guide to the evaluation and mitigation of risk and the financing of international trade. This authoritative manual is built upon more than 42 years of experience in the trade and receivables finance market and carries the endorsement of The London Institute of Banking and Finance. The contents are comprehensive incorporating clause examples, specimen documents, financier checklists and diagrams. The traditional method of commercial lending assessment places primary importance on the ability of the borrower to repay the financier. However, this form of evaluation often results in insufficient credit appetite to release the required level of financial support for a company involved in cross border trade. When a trade-related proposition is properly evaluated so that the transactional risks are fully understood and mitigated to an acceptable level, and the source of repayment is identifiable and considered reliable, a well-structured trade and receivables finance facility reduces the risk of default when compared to conventional lending products and can generate additional credit appetite. This book will become a constant 'go-to' companion for transaction banking teams, bank relationship managers, specialist client-facing trade and invoice finance specialists, middle and back office trade advisory personnel, credit analysts, alternative market financiers, export development agencies and credit insurers. The techniques described in this book are applied to an extensive range of international trade scenarios in *The Trade and Receivables Finance Companion: A Collection of Case Studies and Solutions* (Palgrave, 2020).

Trade Finance provides a much-needed re-examination of the relevant legal principles and a study of the challenges posed to current legal structures by technological changes, financial innovation, and international regulation. Arising out of the papers presented at the symposium, *Trade Finance for the 21st Century*, this collection brings together the perspectives of scholars and practitioners from around the globe focusing on core themes, such as reform and the future role of the UCP, the impact of technology on letters of credit and other forms of trade finance, and the rise of alternative forms of financing. The book covers three key fields of trade finance, starting with the challenges to traditional trade financing by means of documentary credit. These include issues related to contractual enforceability, the use of "soft clauses", the doctrine of strict compliance, the fraud exception, the role of the correspondent bank, performance bonds, and conflict of laws problems. The second main area covered by the work is the technological issues and opportunities in trade finance, including electronic bills of exchange, blockchain, and electronically transferable records. The final part of the work considers alternative and complementary trade finance mechanisms such as open account trading, supply-chain financing, the bank payment obligation, and countertrade.

These two volumes of the papers of Chaim Weizmann, the first president of Israel, are essential for a complete understanding of Weizmann's thinking as a Jew, as a scientist, and as a political leader. They present statements deeply thought out, often polished before delivery, and intended for insertion into an historical record. This selection, which spans his life from 1898-1952, includes speeches (many of them to closed audiences and not previously published), private interviews, evidence before investigating committees, minutes of meetings, meirtbranda, and newspaper articles. It is evident from these papers that Weizmann had a larger vision of an audience before him: whether it be a group of listeners, a mass of readers, a government department, or an influential interlocuter. The earliest documents represent Weizmann's ideas alone; later ones reflect the views of like-minded Zionists and express the collective striving of his nation. These papers, together with the previously published twenty-three volumes of the letters of Chaim Weizmann, constitute a matchless commentary on over sixty years of dedication to building a nation-state on moral foundations.
