A powerful investigation into a
grisly political murder and the
authoritarian regime behind it: Do
Not Disturb upends the narrative
that Rwanda sold the world after
one of the deadliest genocides of
the twentieth century. We think we
know the story of Africa ' s Great
Lakes region. Following the
Rwandan genocide, an idealistic

group of young rebels overthrew the
brutal regime in Kigali, ushering in
an era of peace and stability that
made Rwanda the donor darling of
the West, winning comparisons
with Switzerland and Singapore.
But the truth was considerably
more sinister. Vividly sourcing her
story with direct testimony from
key participants, Wrong uses the
story of the murder of Patrick
Karegeya, once Rwanda ' s head of
external intelligence and a
quicksilver operator of supple
charm, to paint the portrait of a
modern African dictatorship
created in the chilling likeness of
Paul Kagame, the president who
sanctioned his former friend ' s
assassination.

The National Assessments of
Educational Achievement
Series introduces readers to
key concepts and issues
related to assessments of
student achievement levels.
The first volume focuses on

policy issues which should be addressed when designing and carrying out a national assessment. It features country case studies, and descriptions of major international and regional assessment programs. The remaining books in the series cover test development, sampling, data cleaning, statistics, report writing and using national assessment results to improve educational quality.

Dealing with mechanics and the solving of mechanical problems with the help of pure mathematics, this A-Level text introduces at an early stage an appreciation of the properties of vectors. Throughout the book problems are solved using vector methods where appropriate, and many worked examples are provided to illustrate each main development of a topic. A set of straightforward problems follows each section, and a selection of more challenging questions appears in the miscellaneous exercises at the end of most chapters, with multiple-choice questions on most topics.

The Art of Teaching Science emphasizes a humanistic, experiential, and constructivist approach to teaching and learning, and integrates a wide variety of

pedagogical tools. Becoming a science teacher is a creative process, and this innovative textbook encourages students to construct ideas about science teaching through their interactions with peers, mentors, and instructors, and through hands-on, minds-on activities designed to foster a collaborative, thoughtful learning environment. This second edition retains key features such as inquiry-based activities and case studies throughout, while simultaneously adding new material on the impact of standardized testing on inquiry-based science, and explicit links to science teaching standards. Also included are expanded resources like a comprehensive website, a streamlined format and updated content, making the experiential tools in the book even more useful for both pre- and in-service science teachers. Special Features: Each chapter is organized into two sections: one that focuses on content and theme; and one that contains a variety of strategies for extending chapter concepts outside the classroom Case studies open each chapter to highlight real-world scenarios and to connect theory to teaching practice Contains 33 Inquiry

Activities that provide opportunities to explore the dimensions of science teaching and increase professional expertise Problems and Extensions, On the Web Resources and Readings guide students to further critical investigation of important concepts and topics. An extensive companion website includes even more student and instructor resources, such as interviews with practicing science teachers, articles from the literature, chapter PowerPoint slides, syllabus helpers, additional case studies, activities, and more. The building sector contributes up to 40 per cent of greenhouse gas emissions, mostly from energy use during the life time of buildings. Identifying opportunities to reduce these emissions has become a priority in the global effort to reduce climate change. This publication provides an overview of current knowledge about greenhouse gas emissions from buildings, and presents opportunities for their minimisation.

 Concepts of Biology is designed

for the single-semester
 introduction to biology course
 for non-science majors, which
 for many students is their only
 college-level science course. As
 such, this course represents an
 important opportunity for
 students to develop the necessary
 knowledge, tools, and skills to
 make informed decisions as they
 continue with their lives. Rather
 than being mired down with facts
 and vocabulary, the typical non-
 science major student needs
 information presented in a way
 that is easy to read and
 understand. Even more
 importantly, the content should
 be meaningful. Students do
 much better when they
 understand why biology is
 relevant to their everyday lives.
 For these reasons, Concepts of
 Biology is grounded on an
 evolutionary basis and includes
 exciting features that highlight
 careers in the biological sciences
 and everyday applications of the
 concepts at hand. We also strive
 to show the interconnectedness
 of topics within this extremely
 broad discipline. In order to
 meet the needs of today's
 instructors and students, we
 maintain the overall organization
 and coverage found in most
 syllabi for this course. A strength
 of Concepts of Biology is that
 instructors can customize the
 book, adapting it to the
 approach that works best in their
 classroom. Concepts of Biology
 also includes an innovative art
 program that incorporates
 critical thinking and clicker

questions to help students understand--and apply--key concepts.

The European Union (EU) is a political and economic partnership that represents a unique form of cooperation among sovereign countries. The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe

unthinkable. The EU currently consists of 28 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. The EU has been built through a series of binding treaties. Over the years, EU member states have sought to harmonize laws and adopt common policies on an increasing number of economic, social, and political issues. EU member states share a customs union; a single market in which capital, goods, services, and people move freely; a common trade policy; and a common agricultural policy. Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed "Brexit") comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests. EU leaders are anxious about the Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system-especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a "foe" on trade but the Administration subsequently sought to de-escalate U.S.-EU tensions and signaled its intention to launch new U.S.-EU trade negotiations. Concerns also linger in Brussels about the implications of the Trump Administration's "America First" foreign policy and its positions on a range of international issues, including Russia, Iran, the Israeli-Palestinian conflict, climate change, and the role of multilateral institutions. This report serves as a primer on the EU. Despite the UK's vote to leave the EU, the UK remains a full member of the bloc until it officially exits the EU (which is scheduled to occur by October 31, 2019, but may be further delayed). As such, this report largely addresses the EU and its institutions as they currently

exist. It also briefly describes U.S.-EU political and economic relations that may be of interest.

This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study

recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub Saharan Africa.
