"This should be required reading by every school administrator, every teacher, every board member and all university faculty involved in the training of teachers. There is no doubt that we need to squeeze all blame, all coercion and all criticism out of any people-related business. Not until we realize that schools are in a people business will we ever be able to make meaningful changes." --Dr.

Albert Mamary, former superintendent of schools, Johnson City, New York

Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."--Page 4 of cover

The European Union (EU) is a political and economic partnership that represents a unique form of cooperation among sovereign countries. The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe unthinkable. The EU currently consists of 28 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. The EU has been built through a series of binding treaties. Over the years, EU member states have sought to harmonize laws and adopt common policies on an increasing number of economic, social, and political issues. EU member states share a customs union; a single market in which capital, goods, services, and people move freely; a common trade policy; and a common agricultural policy.

Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed "Brexit") comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, concerns about democratic backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests. EU leaders are anxious about the Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system-especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a

---

"foe" on trade but the Administration subsequently sought to de-escalate U.S.-EU tensions and signaled its intention to launch new U.S.-EU trade negotiations. Concerns also linger in Brussels about the implications of the Trump Administration's "America First" foreign policy and its positions on a range of international issues, including Russia, Iran, the Israeli-Palestinian conflict, climate change, and the role of multilateral institutions. This report serves as a primer on the EU. Despite the UK's vote to leave the EU, the UK remains a full member of the bloc until it officially exits the EU (which is scheduled to occur by October 31, 2019, but may be further delayed). As such, this report largely addresses the EU and its institutions as they currently exist. It also briefly describes U.S.-EU political and economic relations that may be of interest.

The building sector contributes up to 40 per cent of greenhouse gas emissions, mostly from energy use during the life time of buildings. Identifying opportunities to reduce these emissions has become a priority in the global effort to reduce climate change. This publication provides an overview of current knowledge about greenhouse gas emissions from buildings, and presents opportunities for their minimisation.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the

necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Linguistics – the close study of language and languages – is an indispensable foundation for all forms of knowledge. The African continent is blessed with hundreds of languages which act as local repositories of culture and interaction. South Africa alone has eleven official languages, plus

---

Sign Language, many heritage languages, and new languages of global movements and migration. Part of the linguist's business is to document, record and affirm languages and diversity. Applied linguists use their training to understand and enhance the role of language in education and upliftment, and the opportunities and challenges of new technologies of communication. The International Congress of Linguists meets every five years to reflect the development of the field and 2018 is the first time that the congress is being held in Africa. This book is a collection of the plenary and focus papers presented at the conference and thus represents current thinking in the major branches of language study as represented by leading local and international scholars. The papers discuss the history of languages, their structure, acquisition, diversity and use. At the same time due regard is paid to the African continent in connection with its linguistic diversity, multilingualism and educational and societal concerns. The Congress is meant to affirm the value of the languages of Africa, of languages and Linguistics in general, as well as to inspire and equip younger scholars to undertake advanced research into language in its many facets.

#### Learn Arabic - Level 1: Introduction to Arabic

Nelson Thornes

Over the past two decades, projects supported by the International Development Research Centre (IDRC) have critically examined the ways in which information and communications technologies (ICTs) can be used to improve learning, empower the disenfranchised, generate income opportunities for the poor, and facilitate access to healthcare in Africa, Asia, Latin America and the Caribbean. Considering that most development institutions and governments are currently

attempting to integrate ICTs into their practices, it is an opportune time to reflect on the research findings that have emerged from IDRC's work and research in this area. "Connecting ICTs to Development" discusses programmatic investments made by IDRC in a wide variety of areas related to ICTs, including infrastructure, access, regulations, health, governance, education, livelihoods, social inclusion, technical innovation, intellectual property rights and evaluation. Each chapter in this book analyzes the ways in which research findings from IDRC-supported projects have contributed to an evolution of thinking, and discusses successes and challenges in using ICTs as tools to address development issues. The volume also presents key lessons learned from ICT4D programming and recommendations for future work.

**Emerging Issues and Prospects in African E-Government** Oxford University Press, USA

How can Paulo Freire's progressive and vital contributions to curriculum planning can be made more relevant today for educators, policy makers and anybody involved in education? This book provides a necessary framework as it articulates

significant questions. The first deals with Freire's positions on curriculum planning, the second is devoted to the historical development and the character of his perspective on curriculum planning, and the third refers to the ways his perspective compares to others, as well as to its contemporary value. Freire's perspective comes into direct conflict with traditional views on curriculum planning, the content of which represents what is perceived as the highest expression of Western civilization. Freire also breaks with the dominant perspective of social efficiency on curriculum planning whose main aim is to supply, via behavioral objectives, the knowledge and skills deemed necessary for the efficient function of the economy and the society, treats learners as passive receivers of knowledge, and assigns to curriculum a technical character disarticulated from social, political or ideological conflicts. In addition, he does not focus on studying the learner in an abstract or a-historical framework, nor does he adopt an individualistic interpretation which fetishizes spontaneity. In contrast to traditional perspectives on the curriculum, Freire provides a fertile ground for teachers and any others who seek to transform schools and improve student's learning and lives."

*Pride and Prejudice* is an 1813 romantic novel of manners written by Jane Austen. Though it is mostly called a romantic novel, it can also be considered a satirical book. The novel follows the character development of Elizabeth Bennet, the dynamic protagonist of the book who learns about the repercussions of hasty judgments and comes to appreciate the difference between superficial goodness and actual goodness. The satire lies in its honest depiction of manners, education, marriage, and money during the Regency era in England.
