Engineering skills and knowledge are foundational to technological innovation and development that drive long-term economic growth and help solve societal challenges. Therefore, to ensure national competitiveness and quality of life it is important to understand and to continuously adapt and improve the educational and career pathways of engineers in the United States. To gather this understanding it is necessary to study the people with the engineering skills and knowledge as well as the evolving system of institutions, policies, markets, people, and other resources that together prepare, deploy, and replenish the nation's engineering workforce. This report explores the characteristics and career choices of engineering graduates, particularly those with a BS or MS degree, who constitute the vast majority of degreed engineers, as well as the characteristics of those with non-engineering degrees who are employed as engineers in the United States. It provides insight into their educational and career pathways and related decision making, the forces that influence their decisions, and the implications for major elements of engineering education-to-workforce pathways.

Following the five books listed above on an earlier page, the Egon Sohmen-Foundation herewith submits its sixth volume. Once again, it is a collection of academic papers that were discussed at a symposium sponsored by the Foundation and subsequently revised. Readers not familiar with the Foundation may be interested to know that it was established in 1987 by Helmut Sohmen of Hong Kong in memory of his late brother, Egon Sohmen (1930-1977). Egon Sohmen was an international economist highly respected in North America and in Europe, notably for his work on flexible exchange rates and on the economics of allocation and competition. Born in Linz (Austria) and educated as an economist in Vienna, Tiibingen, and Cambridge, Mass., Egon Sohmen held teaching posts in several places (M.I.T., Yale, Frankfurt, Saarbriicken, Minnesota, and Heidelberg). As an active participant in numerous international conferences and workshops, he truly belonged to the international research community of his time and age cohort. His lasting reputation greatly helped me to convene the active participants of this symposium.
