Recent decades have seen a flourishing interest in and speculation about the origins of photography. Spurred by rediscoveries of ‘ first ’ photographs and proclamations of photography ’ s death in the digital age, scholars have been rethinking who and what invented the medium. Photography and Its Origins reflects on this interest in photography ’ s beginnings by reframing it in critical and specifically historiographical terms. How and why do we write about the origins of the medium? Whom or what do we rely on to construct those narratives? What ’ s at stake in choosing to tell stories of photography ’ s genesis in one way or another? And what kind of work can those stories do? Edited by Tanya Sheehan and Andr é s Mario Zervig ó n, this collection of 16 original essays, illustrated with 32

colour images, showcases prominent and emerging voices in the field of photography studies. Their research cuts across disciplines and methodologies, shedding new light on old questions about histories and their writing. Photography and Its Origins will serve as a valuable resource for students and scholars in art history, visual and media studies, and the history of science and technology.

In the backwoods of Mississippi, a land of honeysuckle and grapevine, Jewel and her husband, Leston, are truly blessed; they have five fine children. When Brenda Kay is born in 1943, Jewel gives thanks for a healthy baby, last-born and most welcome. Jewel is the story of how quickly a life can change; how, like lightning, an unforeseen event can set us on a course without reason or compass. In this story of a woman's devotion to the child who is both her burden and God's singular way of smiling on her, Bret Lott has created a mother-daughter relationship of matchless intensity and beauty, and one of the finest, most indomitable heroines in contemporary American fiction.

This cutting edge collection of new and previously published articles by philosophers and social scientists addresses just what it means to invoke causal mechanisms, or powers, in the context of offering a causal explanation. A unique collection, it offers the reader various disciplinary and inter-disciplinary divides, helping to stake out a new, neo-Aristotelian position within contemporary debate.

America's Western Frontiers CIA Training Ltd. Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial

rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for intervention effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.

Rehabilitation should not stop when the disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurorehabilitation.

To Live Is Christ Harper Collins

Spies betray people. That's what we do. It becomes a - a habit. Difficult to break - even when it's not - not strictly necessary. Wormwood Scrubs Prison, London, 1961. One of Britain's most notorious double agents, George Blake, is serving a forty-two year sentence when he strikes up an unlikely friendship with Irish petty criminal, Sean Bourke. Both men are eccentric outsiders. Each sees in each other the possibility of escape and not just from prison. But once on the outside their mutual dependence faces mounting pressures from MI5, the KGB and indeed from themselves. Simon Gray's absorbing and deftly funny play explores how personal freedom is an illusion and how even friendship must have careful boundaries in a world where deception is a reflex response. Cell Mates premiered at the Yvonne Arnaud Theatre, Guildford, in January 1995 before transferring to the Albery Theatre, London. The play was revived at the Hampstead Theatre, London, in November 2017.

Mendoza the Jew combines a graphic history with primary documentation and contextual information to explore issues of nationalism, identity, culture, and historical methodology through the life story of Daniel Mendoza. Mendoza was a poor Sephardic Jew from East London who became the boxing champion of Britain in 1789. As a Jew with limited means and a foreign-sounding name, Mendoza was an unlikely symbol of what many Britons considered to be their very own "national" sport.

The difference between seeing and looking is essential--much like the difference, in music, between hearing and listening. In Creative Visualization, master photographer, photo educator and photo instructor Rick Sammon presents his proven methodology for creative digital photography. His signature inspiring and motivating approach opens creative avenues for photographers in a variety of genres. With easy-to-follow examples, Sammon shows you how simple changes--with visualization, composition, post-processing, and

more—can mean the difference between a snapshot and a great shot. This book, illustrated with more than 300 of Rick's photographs, includes invaluable information about exposure, composition, subject choice, lighting, mood, and depth. In the Food for Thought section, Rick offers guidelines for setting goals, getting motivated, connecting with a subject, learning, painting with light, thinking like a painter and more. In Develop Your Creative Vision, Rick takes you on an exploration of composition, exposure, making images with impact, creating a mood, altering reality, and pursuing your passion. Corrective and creative image processing techniques, as well as HDR, EDR, panoramas and black-and-white imaging, are covered in the Image Processing Specialties section. Rick also shares a chapter on self-assignments - photo challenges - that you can use to expand your photographic horizons. Canon Explorer of Light and master photographer Rick Sammon shares the secrets behind learning to see photographically, to make the necessary changes that will have a noticeable impact on your photographs. Includes easy-to-follow instruction for post-processing techniques in Lightroom and Photoshop. Tips for making the best HDR and EDR images are also included, as well as illustrations of how plug-ins can help photographers awaken the artist within. Uses clear, visual examples of "photo failures" photographs side-by-side with successful ones, outlining the small, but important changes—to composition, framing, exposure, etc.—that can immediately make a significant difference

Things Seen Harper Collins

"Annie Ernaux's work," wrote Richard Bernstein in the New York Times, "represents a severely pared-down Proustianism, a testament to the persistent, haunting and melancholy quality of memory." In the New York Times Book Review, Kathryn Harrison concurred: "Keen language and unwavering focus allow her to penetrate deep, to reveal pulses of love, desire, remorse." In this "journal" Ernaux turns her penetrating focus on those points in life where the everyday and the extraordinary intersect, where "things seen" reflect a private life meeting the larger world. From the war crimes tribunal in Bosnia to social issues such as poverty and AIDS; from the state of Iraq to the world's contrasting reactions to Princess Diana's death and the starkly brutal political murders that occurred at the same time; from a tear-gas attack on the subway to minute interactions with a clerk in a store: Ernaux's thought-provoking observations map the world's fleeting and lasting impressions on the shape of inner life.
