Daniel – a South African Chronicle Academic Conferences and publishing limited Language and Decoloniality in Higher Education brings together a collection of diverse papers that address, from various angles, the issue of decoloniality, language and transformation in higher education. It reflects the authors' cumulative years of experience as educators in higher education in different southern contexts. Distilled as case studies, the authors use a range of decolonial lenses to reflect on questions of knowledge, language and learning, and to build a reflexive praxis of decoloniality through multilingualism. Besides a number of decolonial perspectives which readers will be familiar with, this volume also explores a conceptual framework, Linguistic Citizenship, developed over the past two decades by scholars in southern Africa. In this collection, Linguistic Citizenship is used as a lens to 'think beyond' the inherited colonial matrices of language which have shaped this region (and many other southern contexts) for centuries, and to 're-imagine' multilingualism – and semiotics, more broadly – as a transformative resource in the broader project of social justice. Although each chapter has firm roots in the South African context, these studies have much to offer others in their 'quest for better worlds'. Of particular interest to global scholars are the authors' recounts of how they have grappled with leveraging the country's multilingual resources in the project of promoting academic access and success in the face of historical hierarchies of language and social power.

## **Explain Pain** African Sun Media

This book is not merely a new edition, but a complete and significantly expanded rewrite. It comprises over 900 pages of expert and in-depth exposition of this complex subject that has become so important in the modern global economy. Already established over four previous editions as the pre-eminent work on the subject it is a 'must-own book' for all students and practitioners of tax, whether from a legal, business or accounting

perspective. Professor Lynette Olivier and Michael Honiball are without peer in their understanding and clarity in this highly specialised field. Five new chapters have been added on: Taxation of individuals; Taxation of Companies and Dividends; Taxation of Partnerships; Cross-border VAT; and Interpretation of Statutes.

This book focuses on current policy discourse in Higher Education, with special reference to Europe. It discusses globalisation, Lifelong Learning, the EU 's Higher Education discourse, this discourse 's regional ramifications and alternative practices in Higher Education from both the minority and majority worlds with their different learning traditions and epistemologies. It argues that these alternative practices could well provide the germs for the shape of a public good oriented Higher Education for the future. It theoretically expounds on important elements to consider when engaging Higher Education and communities, discussing the nature of the term 'community' itself. Special reference is accorded to the difference that lies at the core of these ever-changing communities. It then provides an analysis of an 'on the ground project' in University community engagement, before suggesting signposts for further action at the level of policy and provision.

**Principles of Evidence** University of Chicago Press

Despite being written mainly in the third person, this book enables the perceptive reader to study a dramatic part of South Africa's history through the experiences of the main protagonist. Because of his legal background, Daniel is able to see how an initially fair legal system is corrupted in order to serve the increasingly desperate needs of the White minority. This is a mere backdrop, however, to a love story that grows closer to tragedy as time passes because the heroine is an alcoholic. The arrival of the computer alters the career of the hero dramatically and sends him on some overseas adventures to learn more about the legal implications of the new machine. As a leader of a missionary team to Malawi, Daniel also gets to grips with people with a totally different background and a differing worldview. The book is sensitive to background and atmosphere, and the hero encapsulates some of this in a few poems that form part of the main text. Jealousy, that green-eyed monster, also rears its head occasionally and further complicates relationships.

After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and

integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.

Imagine an orchestra in your brain. It plays all kinds of harmonious melodies, then pain comes along and the different sections of the orchestra are reduced to a few pain tunes. All pain is real. And for many people it is a debilitating part of everyday life. It is now known that understanding more about why things hurt can actually help people to overcome their pain. Recent advances in fields such as neurophysiology, brain imaging, immunology, psychology and cellular biology have provided an explanatory platform from which to explore pain. In everyday language accompanied by quirky illustrations, Explain Pain discusses how pain responses are produced by the brain: how responses to injury from the autonomic motor and immune systems in your body contribute to pain, and why pain can persist after tissues have had plenty of time to heal. Explain Pain aims to give clinicians and people in pain the power to challenge pain and to consider new models for viewing what happens during pain. Once they have learnt about the processes involved they can follow a scientific route to recovery. The Authors: Dr Lorimer Moseley is Professor of Clinical Neurosciences and the Inaugural Chair in Physiotherapy at the University of South Australia, Adelaide, where he leads research groups at Body in Mind as well as with Neuroscience Research Australia in Sydney. Dr David Butler is an international freelance educator, author and director of the Neuro Orthopaedic Institute, based in Adelaide, Australia. Both authors continue to publish and present widely.

This book is the first to cover marketing management issues in geographically remote industrial clusters (GRICs). The phenomena of GRICs have increased in importance, especially in the Nordic countries, due to changes in industry structures as well as political ambitions. The practice of marketing and marketing management is not singular to industry clusters in Nordic countries. Remote areas in parts of the United States, South and Central America, and South East Asia exhibit similar tendencies. The problems faced by many entrepreneurial managers managing start-up or even existing enterprises are complex and require an in-depth understanding not only of the problems themselves, but also of the contextual framework in which these problems need to be solved. This book contains original cases that cover issues like cluster formation, information gathering, marketing strategies and operations, and information-technology. Examples come from industries like textile & furniture, automobile, agro-machinery, food, wine, software, and management consulting.

"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

This book is essential for academics that enter the field of higher education and training, as it focuses on preparing teachers and trainers to respond appropriately to student success challenges. Student success is a burning issue, both globally and locally. While student achievement is determined by a combination of factors, teachers and their teaching practices do matter. Higher education teachers are expected to fulfil different roles at different times, such as planning for curriculum implementation, mentorship and coaching, facilitating learning, resource development, and student assessment. Against this background the primary purpose of Empowering novice academics for student success: Wearing different hats is building the capacity of novice teachers and trainers to play an influential role in increasing student success throughput.

'O Mother Lachumamma, your blouse is torn, Your hair is soiled, your sari in rags . . . Even in that condition what have you done? You planted saplings, walking backwards like a bull, In order to produce food from the mud.' Kancha Ilaiah Shepherd translates these words of the Telugu poet, singer, activist Gaddar to emphasize the productivity of the ordinary people, the Dalit-Bahujans of India, who receive so little in return. Arguing forcefully against spiritual fascism, which refuses equality or freedom to the majority, he commends the buffalo as a productive animal that epitomizes the qualities of the Dalit-Bahujans. This book contains a selection from Ilaiah Shepherd's columns in *The Hindu*, *Deccan Herald*, *Deccan Chronicle*, *Hindustan Times* among others, and journals such as *Mainstream* and *Economic and Political Weekly*. Of particular interest is the new Afterword that discusses his political and social programme for the Sudras of India, presenting his vision of a more just society.

The winners of the Nobel Prize in Economics upend the most common

assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the *Wall Street Journal*, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. *Poor Economics* shows that creating a world without poverty begins with understanding the daily decisions facing the poor.
