"American Politics and Government Today teaches students exactly what they need to know to succeed in the course and become informed citizens. The part structure and chapter organization clearly maps to the five AP® U.S. Government and Politics units, for close alignment with the course framework. In each chapter, integrated policy coverage allows students to see how social, economic, or foreign policy relates to real-life situations, while AP®-style multiple-choice questions and the full range of free response questions offer students practice opportunities at the end of each chapter"--

Intersections: A Contemporary Student Primer on Race, Gender, and Class W. W. Norton

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business,

local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

The Federalist Papers Holt McDougal

This text examines the expanding scope of government in the post-War period. Changes in the public's political agenda are identified, along with attitudes to the size of government, and its intervention in the economy, taxation, equality and security of the welfare state, plus the environment.

Intersections: A Contemporary Student Primer on Race, Gender, and Class provides students with an illuminating and timely collection of articles pertaining to these key social issues in American history and contemporary culture. Students learn how to recognize the intersections of race, gender, and class, how to navigate these intersections in academic and personal pursuits, and how to serve as change agents for social justice. The anthology is divided into four units: theoretical foundations, historical perspectives, American culture, and contemporary moments. In Unit 1, students read selections that introduce Black feminist thought and shed light on income disparity. Unit 2 includes readings that examine labor and race relations in American history and culture. The articles in Unit 3 focus on American popular culture and competing standards of beauty. The final unit offers selections that explore the politics of constructions of womanhood, manhood, motherhood, and fatherhood through the lens of the Obama White House. Each reading is supported by pre-reading questions that inspire critical thinking and self-reflection, as well as post-reading questions that challenge deeper analysis concerning issues of power and empowerment. A diverse collection of current scholarship, Intersections is well suited for courses in history, politics, economics, sociology, gender studies, ethnic studies, and popular culture. Maureen Elgersman Lee is an associate professor of history at Hampton University. She earned a doctorate of arts in humanities with a concentration in African-American studies and a M.A. in African and African-American studies from Clark Atlanta University. She is the author of *Unyielding Spirits: Black Women and Slavery in Early Canada and Jamaica* and *Black Bangor: African Americans in a Maine Community, 1880-1950*, for which she received the Leadership in History Award of Merit from the American Association for State and Local History, as well as the "Best of the Best of the University Presses - Outstanding Title" Award from the American Library Association. In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-

wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

In *American Foundations*, Mark Dowie argues that organized philanthropy is on the verge of an evolutionary shift that will transform America's nearly 50,000 foundations from covert arbiters of knowledge and culture to overt mediators of public policy and aggressive creators of new orthodoxy. He questions the wisdom of placing so much power at the disposal of nondemocratic institutions. As American wealth expands, old foundations such as Ford, Carnegie, Rockefeller, Pew, and MacArthur have grown exponentially, while newer trusts such as Mott, Johnson, Packard, Kellogg, Hughes, Annenberg, Hewlett, Duke, and Gates have surpassed them. Foundation assets now total close to \$400 billion. Though this is a tiny sum compared to corporate and government treasuries, and foundation grants still total less than 10 percent of contributions made by individuals, foundations have power and influence far beyond their wealth. Their influence derives from the conditional nature of their grant making, their power from its leverage. Unlike previous historians of philanthropy who have focused primarily on the grant maker, Dowie examines foundations from the public's perspective. He focuses on eight key areas in which foundations operate: education, science, health, environment, food, energy, art, and human services. He also looks at their imagination, or lack thereof, and at the strained relationship between American foundations and American democracy. Dowie believes that foundations deserve to exist and that they can assume an increasingly vital role in American society, but only if they transform themselves from private to essentially public

institutions. The reforms he proposes to make foundations more responsive to pressing social problems and more accountable to the public will almost certainly start an important national debate.

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Are the deep insights of Hugo Black, William Brennan, and Felix Frankfurter that have defined our cherished Bill of Rights fatally flawed? With meticulous historical scholarship and elegant legal interpretation a leading scholar of Constitutional law boldly answers yes as he explodes conventional wisdom about the first ten amendments to the U.S. Constitution in this incisive new account of our most basic charter of liberty. Akhil Reed Amar brilliantly illuminates in rich detail not simply the text, structure, and history of individual clauses of the 1789 Bill, but their intended relationships to each other and to other constitutional provisions. Amar's corrective does not end there, however, for as his powerful narrative proves, a later generation of antislavery activists profoundly changed the meaning of the Bill in the Reconstruction era. With the Fourteenth Amendment, Americans underwent a new birth of freedom that transformed the old Bill of Rights. We have as a result a complex historical document originally designed to protect the people against self-interested government and revised by the Fourteenth Amendment to guard minority against majority. In our continuing battles over freedom of religion and expression, arms bearing, privacy, states' rights, and popular sovereignty, Amar concludes, we must hearken to both the Founding Fathers who created the Bill and their sons and daughters who reconstructed it. Amar's landmark work invites citizens to a deeper understanding of their Bill of Rights and will set the basic terms of debate about it for modern lawyers, jurists, and historians for years to come.

"The Nation has lost sight of its public health goals and has allowed the system of public health to fall into 'disarray,'" from The Future of Public Health. This startling book contains proposals for ensuring that public health service programs are efficient and effective enough to deal not only with the topics of today, but also with those of tomorrow. In addition, the authors make recommendations for core functions in public health assessment, policy development, and service assurances, and identify the level of government—"federal, state, and local"—at which these functions would best be handled.
