The challenge of creating a fresh, incisive sermon every Sunday can sometimes seem overwhelming -- but if you have the all-new edition of CSS' acclaimed "Lectionary Preaching Workbook "at your fingertips, you'll never feel that way again! With penetrating reflections on Cycle B lectionary passages and a thorough discussion of preaching themes plus a treasure trove of supporting illustrations, this comprehensive volume is the perfect starting point for your weekly homiletic research. Carlos Wilton combines a scholar's deep insight into the biblical texts with a pastor's practical understanding of how to make them come alive for the people in your pews, and his astute commentary is sure to stimulate your thought process and provide plenty of seeds for developing messages with maximum impact. A handy, easy-to-use sermon planning template is also included to facilitate the process of building your sermon. The "Lectionary Preaching Workbook" is an indispensable tool that helps you to powerfully proclaim God's Word while getting the most out of your limited preparation time. Each Sunday's material includes: * a listing of applicable Revised Common, Roman Catholic, and Episcopal lectionary texts * a theme for the day * commentary on the Old Testament, New Testament, and Gospel lessons *

possible preaching approaches * a pastoral prayer * numerous illustrations to flesh out the message Carlos E. Wilton has been the pastor since 1990 of Point Pleasant Presbyterian Church, in Point Pleasant Beach, New Jersey. He previously served as assistant dean and director of admissions at the University of Dubuque Theological Seminary. Wilton is a graduate of Washington College (B.A.), Princeton Theological Seminary (M.Div.), and the University of St. Andrews, Scotland (M.Phil. and Ph.D.). In addition to his parish responsibilities, Wilton is also an adjunct professor at New Brunswick Theological Seminary and a member of the writing team for the online preaching resource "The Immediate Word" (www.csspub.com).

Alternative Press Index Houghton Mifflin

The busy preacher will find a multitude of ideas, illustrations, and sermon seeds for all the lectionary lessons. Anderson's commentaries for the Revised Common and Catholic lectionaries are accompanied by theological reflections exploring the relationships between the texts, a suggested sermon title for each week, Sermon Angles which briefly develop the theological themes for the day, and two to four illustrative stories per chapter. Other convenient features include wide margins for taking notes and a stay-flat binding.

The Art of War is an enduring classic that holds a special place in the culture and history of East Asia. An ancient Chinese text on the philosophy and politics of warfare and military strategy, the treatise was written in 6th century B.C. by a warrior-philosopher now famous all over the world as Sun Tzu. Sun Tzu's teachings remain as relevant to leaders and strategists today as they were to rulers and military generals in ancient times. Divided into thirteen chapters and written succinctly, The Art of War is a must-read for anybody who works in a competitive environment.

The Fourth Industrial Revolution John Wiley & Sons

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “ smart factories ” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

SRA Open Court Reading John Wiley & Sons

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
